Soccerwomen Gemma Clarke,2019-04-16 From Michelle Akers to Megan Rapinoe, bold and inspiring profiles of the pioneers, champions and future heroines of women's soccer around the world. Women's soccer has come a long way. The first organized games on record -- which took place three hundred years ago in the Scottish Highlands -- were exhibition matches, where single women played against married women while available men looked on, seeking a potential mate. Today, champions like Mia Hamm, Abby Wambach, Brazil's Marta and China's Sun Wen, have inspired girls around the world to pick up the beautiful game for love of the sport. Inevitably, given the hardships and discrimination they face, women who play soccer professionally are so much more than elite athletes. They are survivors, campaigners, political advocates, feminists, LGBTQ activists, working moms, staunch opponents of racial discrimination and inspirational role models for many. Based on original interviews with over 50 current and former players and coaches, this book celebrates these remarkable women and their achievements against all odds.

Where the Opium Grows Hajra Panezai,2014-12-06 This is a stunning memoir of one woman's escape from a deprived region of Pakistan, Quetta, known for opium trade and influx of refugees post-Soviet war, to becoming a successful actress, capturing the attention of the country's most eminent figure, Imran Khan. Hajra Panezai's brave account of surviving abuse as a child, to her trials finding love and a compassionate purpose in life provides a rare insight into what being a modern, sensuous, thinking woman in 21st century Pakistan means today. 'Where the Opium Grows' is a brutally honest, page-turning read from a rebellious woman, seeking justice for all women, minorities, animals, gays and all those denied rights in Pakistan - an unassuming woman who refused to be silenced.

CURRICULUM REFORM IN PAKISTAN Amna Afreen, 2022-02-25 I have written this book in an effort to explore how the history of Pakistan has resulted in the critical problems weighing down its education system. The book examines the questions: Why and how has a small elite class come to rule Pakistan? And how has their rule worsened the country's problems? The focus will be to critically examine the elements of the Pakistani national curriculum and madrasas and their effects on Pakistani society. The book represents the fusion of my experiences in Pakistan with extensive literature analysis, interviews, and textbook analysis. This research began when I came to the United States in January 2015 through the SAR program. I wanted to know the answers to profoundly unsettling questions. How can a society be so intolerant that a scholar educated solely in Pakistan is disregarded and assassinated while many Western-educated scholars with traditional insular thoughts are not only appreciated but flourishing? I wanted to know why Pakistani elites have so much power and freedom while lower classes are profoundly oppressed. Elites who barely pay taxes have been in power for generations while those that pay taxes suffer from sky-high inflation. The influential religious leaders mostly belong to the elite class while their followers are mostly lower class. Ruling families and social classes mostly control appointed positions. Do those in power not have a responsibility to speak on issues of social justice rather than limiting themselves in claiming that theirs is the only true form of Islam? Why don't they work to end the disparity of quality education between classes in Pakistan? Instead, many elites run their own lucrative elite Islamic schools. More importantly, why do the ulama (which literally means "those who possess knowledge [ilm], particularly of Islam") maintain a tight hierarchical system in the madrasa (Islamic seminary) community that rarely allows poor intelligent students to attain leadership positions? Why are the ulama silent in the face of ruthless murder of and discrimination against Pakistani minorities? Book Review: Pakistan Educational Reforms is a major study of education in Pakistan and its national and madrasa curriculum that fosters national and religious sectarian divisions, intolerance and conflicts. Dr. Amna Afreen documents the political, socio-economic and religious causes-limited government funding, widespread poverty and illiteracy and the poor training and performance of teachers- that have produced a failed educational system at urban and rural government and religious schools (madrasa) and offers a series of potential solutions and reforms. -- John L. Esposito, University Professor and Founding Director of The Alwaleed Center for Muslim-Christian Understanding, Georgetown University.

The Other Divide Yanna Krupnikov, John Barry Ryan, 2022-01-20 There is little doubt that increasing polarization over the last decade has transformed the American political landscape. In *The Other Divide*, Yanna Krupnikov and John Barry Ryan challenge the nature and extent of that polarization. They find that more than party, Americans are divided by involvement in

politics. On one side is a group of Americans who are deeply involved in politics and very expressive about their political views; on the other side is a group much less involved in day-to-day political outcomes. While scholars and journalists have assumed that those who are most vocal about their political views are representative of America at large, they are in fact a relatively small group whose voices are amplified by the media. By considering the political differences between the deeply involved and the rest of the American public, Krupnikov and Ryan present a broader picture of the American electorate than the one that often appears in the news.

Medicinal and Aromatic Plants of India Vol. 1 Ákos Máthé,Irfan Ali Khan,2022-07-07 This book is the 8th volume of the popular series 'Medicinal and Aromatic Plants of the World'. Like the previous volumes, this volume is being introduced in a monographic format containing an extremely rich and diverse medicinal flora of India. Both well-known and somewhat still ignored species have been described in view of their traditional, present day and prospective uses. The scientific and technological achievements are also included aptly in this volume, together with a careful and critical consideration to our contemporary knowledge of this vast interdisciplinary domain with an Indian focus. In the era of global climate change and pandemics, building on the huge Indian traditions, this volume will make an important contribution to the better knowledge and understanding of MAPs. The Indian flora has always been recognized for its medicinal and aromatic plant values and this volume is explicitly focusing in that direction. With the rapidly expanding scope of natural nutraceuticals and herbal formulations, this book will be a fruitful acquisition for the interested readers globally.

Non-Wood Forest Products of Asia A. Z. M. Manzoor Rashid,Niaz Ahmed Khan,Mahmood Hossain,2022-07-22 This book highlights the importance of non-wood forest products (NWFPs) and their crucial role in sustaining the livelihood of rural and indigenous communities in Asia. The authors depict how the preservation of forests and the associated major non-wood resources may provide an important avenue to reduce poverty. The local practices and knowledge on harvesting NWFPs are often rooted in tradition, and vary from one region to the other. This made it difficult to develop and establish research focus on a greater scale in the past. Readers of this volume will gain an often-missed, broader perspective from these new studies. The authors put a special emphasis on the nexus between conservation and livelihood from an Asian point

of view. This addresses a knowledge gap in the current literature and offers important clues on conducting similar research around the world. The volume provides a useful reference guide for the relevant researchers, practitioners and policy makers.

Disaster Risk, Resilient Agriculture and Livelihood Asraful Alam, Rukhsana, 2024-09-09 This volume discusses important issues associated with agricultural disaster risk, resilient agriculture, and livelihood. It highlights the role of sustainable development goals in reducing the impact of climate change on agriculture. The contributions found in this volume discuss methodological and innovative resilience approaches to various natural hazards including flood, landslide, environmental challenges, strategies of disaster risk management, livelihood, ecosystem services, and agricultural sustainability. It explores the relationship between climatic change and agricultural transformation. While throwing light on the role of ecosystem services in disaster risk reduction, the book explores the impact of land degradation and change on growth of agricultural production and food production. The book will be useful for students and researchers of geography, environmental sciences, disaster management, and environmental geology. It will also be useful for geographers, environmentalists, hydrologists, geomorphologists, planners, and professionals working on related ideas.

Coal and Coalbed Gas Romeo M. Flores, Tim A. Moore, 2024-01-24 Coal and Coalbed Gas: Future Directions and Opportunities, Second Edition introduces the latest in coal geology research and the engineering of gas extraction. Importantly, the second edition examines how, over the last 10 years, research has both changed focus and where it is

conducted. This shift essentially depicts a tale of two worlds—one half (Western Europe, North America) moving away from coal and coalbed gas research and production towards cleaner energy resources, and the other half (Asia-Pacific region, Eastern Europe, South America) increasing both research and usage of coal. These changes are marked by a precipitous fall in coalbed gas production in North America; however, at the same time there has been a significant rise in coal and coalbed gas production in Australia, China, and India. The driver for higher production and its associated research is a quest for affordable energy and economic security that a large resource base brings to any country like Australia's first large-scale coalbed gas to liquid natural gas projects supplying the demand for cleaner burning LNG to the Asian-Pacific region. Since the last edition of this book, global climate change policies have more forcibly emphasized the impact of methane from coal mines and placed these emissions equal to, or even more harmful than, CO₂ emissions from fossil fuels in general. Governmental policies have prioritized capture, use, and storage of CO₂, burning coal in new highly efficient low emission power plants, and gas pre-drainage of coal mines. The Organization for Economic Cooperation and Development (OECD) countries and China are also introducing new research into alternative, non-fuel uses for coal, such as carbon fibers, nanocarbons, graphene, soil amendments, and as an unconventional ore for critical elements. New to this edition: Each chapter is substantially changed from the 1st edition including expanded and new literature citations and reviews, important new data and information, new features and materials, as well as re-organized and re-designed themes. Importantly, three new chapters cover global coal endowment and gas potential, groundwater systems related to coalbed gas production and biogenic gas generation as well as the changing landscape of coal and coalbed gas influenced by global climate change and net-zero carbon greenhouse gas emissions. FOREWORD When I reviewed the first edition of this book, my initial thought was, Do we need another book on coal geology? and then I read it and realised, Yes, we need this book and my students downloaded copies as soon as it was available. So now we come to 2023, and a lot has happened in the past decade. For a different reason we might ask if we still need this book, or even coal geoscientists and engineers, as the world aims for rapid decarbonisation of the energy sector and a reduction of coal as a feedstock for industrial resources, like steel manufacture.

Environmental Humanities in India Debajyoti Biswas,John C. Ryan,2024-10-25 This open access book offers an introduction to the field of the environmental humanities in India. The environmental humanities, often referred to as 'EH', are a multifaceted, relatively new, and swiftly evolving field of scholarship that integrates the theories and approaches of various disciplines - from anthropology, art, communications, cultural studies, philosophy and ecology to history, literature, media, music, performance, politics, sociology, theology and theater. Practitioners of this considerably integrative and widely ranging field aim to address and, in certain cases, confront today's urgent ecological and cultural challenges, namely climate change, urban sustainability, biodiversity conservation, species decline, energy policy, the exigencies of the Anthropocene, environmental activism, and Indigenous peoples' justice. Although the environmental humanities have been relatively slow to gain traction in South Asia, an increasing momentum towards transdisciplinary approaches to ecology and sustainability is palpable in India. Comprising fourteen chapters, this contributed volume is the first major publication to call attention to current work in the environmental humanities in India. The volume foregrounds particular ecohumanist theories and methodologies evolving from Indian biocultural contexts. Towards this aim, the book consists of four thematic sections: Indigenous Perspectives: Conservation, Spirituality, and Language; Theoretical Grounding: Education, Law, and Ethics;

Literary Formulations: Memoir, Parable, and Storyworlds; and Popular Narratives: Myth, Travel, and Music. The volume is of interest to undergraduates, postgraduates, early career scholars, and more established researchers in the environmental humanities and the allied fields of ecopoetics, ecocriticism, ecomusicology, environmental art, cultural ecology, postcolonial studies, and South Asian studies. This is an open access book.
