Professional Practice 101 Andrew Pressman,2021-05-30 Professional practice courses often suffer from a boring reputation, but there's nothing dull about this updated, cornerstone edition of Professional Practice 101, which renders accessible the art and science of contemporary architectural practice. With its unique focus on links between design thinking and practice, this third edition brings an inspiring and fresh perspective to the myriad issues involved in successful architectural practice. The process of providing architectural services in today's constantly evolving practice environment must be just as creative, intellectually rigorous, and compelling as wrestling with design problems. In this new edition, packed with invaluable advice from leading experts, Andrew Pressman bridges the knowledge and experience gap between school and practice covering topics such as: Ethics, social responsibilities, and obligations to the environment Design firm types, culture, and leadership Financial, project, and time management Service and project delivery; leveraging emerging technologies Entrepreneurial business models and business development Legal issues, including AIA contract document analysis Collaboration and negotiating with clients and stakeholders Practice-based research Students and early-career professionals will discover the fundamentals they need to launch their careers as well as more sophisticated strategies that will allow them to thrive as their roles evolve and they assume increasing responsibilities. Professional Practice 101 is a learning tool that will readily deliver the knowledge and background for success in current architectural practice.

Shaping Identities in a Holy Land Gil Fishhof,2023-12-21 In the 88 years between its establishment by the victorious armies of the First Crusade and its collapse following the disastrous defeat at Hattin, the Latin Kingdom of Jerusalem was the site of vibrant artistic and architectural activity. As the crusaders rebuilt some of Christendom's most sacred churches, or embellished others with murals and mosaics, a unique and highly original art was created. Focusing on the sculptural, mosaic, and mural cycles adorning some of the most important shrines in the Kingdom (such as the Church of the Holy Sepulchre, The Basilica of the Annunciation, and the Church of the Nativity), this book offers a broad perspective of Crusader art and architecture. Among the many aspects discussed are competition among pilgrimage sites, crusader manipulation of biblical models, the image of the Muslim, and others. Building on recent developments in the fields of patronage studies and reception theory, the book offers a study of the complex ways in which Crusader art addressed its diverse audiences (Franks, indigenous eastern Christians, pilgrims) while serving the intentions of its patrons. Of particular interest to scholars and students of the Crusades and of Crusader art, as well as scholars and students of medieval art in general, this book will appeal to all those engaging with intercultural encounters, acculturation, Christian-Muslim relations, pilgrimage, the Holy Land, medieval devotion and theology, Byzantine art, reception theory and medieval patronage.

Childrearing Values in the United States and China Bloomsbury Publishing,2001-07-30 Hong Xiao examines the linkage between social structure and child-rearing values in the United States and China. Her primary objectives are to examine the underlying structure of childrearing values, discover the dynamics of the structural-level, family-level, and

individual-level determinants of childrearing values, and to compare patterns of value orientations in the two countries. Three value dimensions--autonomy, conformity, and a care orientation--are identified in both the United States and China samples via factor analyses. Furthermore, despite cross-national differences in political system, economic development, and culture history, Professor Xiao finds Americans and Chinese are quite similar in their thinking of the kinds of things to teach children at home. Among the top six qualities endorsed within each country, five are identical. However, sources of value variations are drastically different in the two countries. For example, in the United States, while the influence of class on men's values for children has become muted overtime, class differences in values continue to exist among women. And neither gender nor motherhood is related to the care orientation. In China, valuation of children's autonomy or conformity is conditioned heavily by political conformity, age, and family size. Of particular interest to scholars, students, and other researchers involved with gender and family studies, sociology, and Asian Studies.

The Future of Luxury Brands Annamma Joy, 2022-02-07 The concepts of artification and sustainability are now both at the heart of luxury brand marketing strategies; artification as an ongoing process of transformation in the world of art and sustainability as an indispensable response to the issues of our times. *The Future of Luxury Brands* examines three interrelated luxury-marketing segments—the art world, fashion and fine wines including hospitality services—through the dual lenses of sustainability and artification. From safeguarding human and natural resources to upholding labor rights and protecting the environment, sustainability has taken center stage in consumer consciousness, embodying both moral authority and sound business practices. At the same time, artification—the process by which non-art is reconceived as art—applies the cachet of art to business, affording commercial products the sacred status accorded to works of art. When commercial products enter the realm of aesthetic creation, artification and consumer engagement inevitably increases. This pioneering book examining artification and sustainability as strategic pillars of marketing strategies in the luxury industry will be essential reading for practitioners working in luxury product companies, as also students of luxury brand marketing.
