Philosophy and the City Sharon M. Meagher, 2008-01-10 Using philosophical works from ancient Greece to contemporary times, *Philosophy and the City* demonstrates both why philosophy matters to the city and how cities matter to philosophy. The collection addresses questions that remain central to urban planning and everyday urban life, such as, What is a city? What does it mean to be a good citizen? By bringing various perspectives together, Sharon M. Meagher provides readers the opportunity to better understand key philosophical debates concerning not only social and political philosophy but also place and identity formation, aesthetics, philosophy of race and diversity, and environmental philosophy.

The City in Geography Benedict Anderson, 2019-03-15 Monumental in scale and epic in development, cities have become the most visible and significant symbol of human progress. The geography on and around which they are constructed, however, has come to be viewed merely in terms of its resources and is often laid to waste once its assets have been stripped. *The City in Geography* is an urban exploration through this phenomenon, from settlement to city through physical geography, which reveals an incremental progression of removing terrain, topography and geography from the built environment, ushering in and advancing global destruction and instability. This book explains how the fall of geography in relationship to human survival has come through the loss of contact between urban dwellers and physical terrain, and details the radical rethinking required to remedy the separations between the city, its inhabitants and the landscape upon which it was built.

The City As a Sacred Center Bardwell L. Smith, Holly Baker Reynolds, 1987-01-01

The City James A. Clapp, 2014-01-31 *The City* is the best, funniest, saddest, and most thought-provoking compilation ever assembled on the urban scene. James A. Clapp has arranged more than three thousand quotations—epigrams, epithets, verses, proverbs, scriptural references, witticisms, lyrics, literary references, and historical observations—on urban life from antiquity until the present. These quotes are drawn from the written and spoken words of more than one thousand writers throughout history. This volume, with contributions from speakers, poets, song writers, politicians philosophers, scientists, religious leaders, historians, social scientists, humorists, architects, journalists, and travelers from and to many lands is designed to be used by writers, speechmakers, students, and scholars on cities and urban life. Clapp's text is striking for its sharp contrasts of urban and rural life and the urbanization process in different historical times and geographical areas. This second edition includes four hundred new entries, updated birth dates and occupations of quoted authors, and an expanded and updated introduction and preface. Clapp also added new introduction pages for each section containing pictures and unique quotations. The indexes have also been expanded to include more subjects and cities. The scope of this book is international, including entries on most major and many minor cities of the world. It is noteworthy for its pleasures as well as its insights.

The Materiality of Literary Narratives in Urban History Lieven Ameel, Jason Finch, Silja Laine, Richard Dennis, 2019-08-12 *The Materiality of Literary Narratives in Urban History* explores a variety of geographical and cultural contexts to examine what literary texts, grasped as material objects and reflections on urban materialities, have to offer for urban history. The contributing writers' approach to literary narratives and materialities in urban history is summarised within the conceptualisation 'materiality in/of literature': the way in which literary narratives at once refer to the material world and actively partake in the material construction of the world. This book takes a geographically multipolar and multidisciplinary approach to discuss cities in the UK, the US, India, South Africa, Finland, and France whilst examining a wide range of textual genres from the novel to cartoons, advertising copy, architecture and urban planning, and archaeological writing. In the process, attention is drawn to narrative complexities embedded within literary fiction and to the dialogue between narratives and historical change. *The Materiality of Literary Narratives in Urban History* has three areas of focus: literary fiction as form of urban materiality, literary narratives as social investigations of the material city, and the narrating of silenced material lives as witnessed in various narrative sources.

What is Urban History? Shane Ewen, 2016-02-01 Urban history is a well-established and flourishing field of historical research. Written by a leading scholar, this short introduction demonstrates how urban history draws upon a wide variety of methodologies and sources, and has been integral to the rise of interdisciplinary and comparative approaches to history since the second half of the twentieth century. Shane Ewen offers an accessible and clearly written guide to the study of urban history for the student, teacher, researcher or general reader who is new to the field and interested in learning about past approaches as well as key themes, concepts and trajectories for future research. He takes a global and comparative viewpoint, combining a discussion of classic texts with the latest literature to illustrate the current debates and controversies across the urban world. The historiography of the field is mapped out by theme, including new topics of interest, with a particular focus on space and social identity, power and governance, the built environment, culture and modernity, and the growth and spread of transnational networking. By discussing a number of historic and fast-growing cities across the world, *What is Urban History?* demonstrates the importance of the history of urban life to our understanding of the world, both in the present and the future. As a result, urban history remains pivotal for explaining the continued growth of towns and cities in a global context, and is particularly useful for identifying the various problems and solutions faced by fast-growing megacities in the developing world.

Encyclopedia of Community DAVID LEVINSON, KAREN CHRISTENSEN, 2003-06-30 Click 'Additional Materials' for downloadable materials and samples Incredibly, this is the first encyclopedia to focus on community as concept and experience, so stands alone in its field as the one title any library must buy to cover this topic. Essential for all readerships.--CHOICEA timely, comprehensive, and very welcome overview of a rich and rapidly growing field of inquiry.--Robert D. Putnam, Professor at Harvard University and author of *Bowling Alone* With every passing minute, it becomes more and more apparent that our world is one community. The *Encyclopedia of Community* serves as recognition of this trend and as a needed resource. The four-volume set not only explains the emerging buzz words of community such as 'social capital' or 'civic engagement' but also tells many stories of community institutions that work, such as public libraries. --Sarah Ann Long, Past President, (1999-2000) American Library Association As we yearn to connect with our fellow citizens during these uncertain times, we have a unique moment to encourage greater participation in our democracy and reinvigorate our

communities. The Encyclopedia of Community provides a timely, diverse array of theories and practices that will help citizens understand the value of engaging together to make the critical choices that enrich the way we live, learn, work and govern in our local communities. The Encyclopedia deserves a prime spot in the libraries, homes, and offices of all communities that want to invest in a brighter future for their residents and their children.--Nancy Kranich, Past President of the American Library Association, whose presidential theme was Libraries: The Cornerstone of Democracy (2000-2001) American politicians often pair the word 'community' with the word 'freedom' to describe our basic values. Yet, though used constantly, the word community is defined in widely different and contested ways. Most people like the idea of community, but some intellectuals worry that it might imply collectivism. The great value of this new Encyclopedia is that it gives readers a chance to sample the many uses of the term and gain clarity about the issues at stake. It is a major contribution to a more coherent understanding of this fundamental idea.--Robert Bellah, Professor of Sociology, Emeritus, University of California, Berkeley and co-author of *Habits of the Heart* SAGE Publications is proud to announce the Encyclopedia of Community, a major reference work that summarizes the many fascinating and important concepts of a global topic. Community itself is a concept, an experience, and a central part of being human. Whether the reader is a student, researcher, or professional in the field of psychology, sociology, or even economics, this three-volume work will provide the necessary definitions of community beyond traditional views. Arranged in an A-to-Z fashion, the Encyclopedia can also be viewed topically via a Reader's Guide. This allows for interdisciplinary compare and contrast among topics such as types of communities, social capital, technology, urban life, politics and law, community design, and global studies. Edited by the award-winning team at Berkshire Reference and assisted by an editorial board of world-renowned scholars, the Encyclopedia of Community will prove to be one of the most widely used reference works in your collection. Pivot Cities in the Rise and Fall of Civilizations Ahmet Davutoğlu, 2021-09-30 Based on the author's long experience in academic life and the public realm, especially in foreign policy, this book argues that a single categoric classification of cities is inadequate, and that cities have had different and varied impacts and positions throughout the history of civilization. The author examines how the formation, transformation, destruction or reestablishment of many civilizational cities reveals a

clearer picture of the cornerstones of the course of human history. These cities, which play a decisive and pivotal role in the direction of the flow of history as well as providing us with a compass to guide our efforts to understand and interpret this flow, are conceptualized by the author as civilizations' pivot cities. This innovative book explores the role of great cities in political historical change, presenting an alternative view of these pivot cities from a culturalist perspective. Within this framework, the role played by pivot cities in the history of civilization may be considered under seven distinct headings: pioneering cities which founded civilizations; cities which were founded by civilizations; cities which were transplanted during the formation of civilizations; ghost cities which lost their importance through shifts in political power and civilizational transformation; lost cities which were destroyed by civilizations; cities on lines of geocultural/geoeconomic interaction; and cities which combine, transform or are transformed by different civilizations. The author's concept of pivot cities explores the interplay between vital cities and civilizations, which bears on the future of globalization at a time of instability, as projected continuing de-Westernization becomes a theme in studies of global history. This book provides highly productive discussions relevant to the literature on city-civilization relationships and the historicity of pivot cities. Its clear language, rich content, deep and original perspective, interdisciplinary approach and rich bibliography will ensure that it appeals to students and scholars in a variety of disciplines, including cultural studies, political science, comparative urban studies, anthropology, history and civilizational studies.

The Delicious History of the Holiday Fred Inglis, 2005-11-28 Our holidays lie near the heart of our emotional life, enjoyed for a fortnight, fed on imagination for eleven months of the year. What we want from our holidays tells a lot about who we are and what we wish we were. In this charming account, Fred Inglis traces the rise of the holiday from its early roots in the Grand Tour, through the coming of Thomas Cook and his Blackpool packages, to sex tourism and the hippie trail to Kathmandu. He celebrates the bodily pleasures of generations of tourists - from Edwardian banquets in Paris to fish and chips on the beach, from the Bright Young Things on the Riviera to the chosen hardships of the sea, the desert wastes and the mountain tops. He considers the ideals and the spiritual aspirations which are part of what we look for in a holiday, but he also warns of a darker current - how we have increasingly destroyed what we take most pleasure in and how the dealings between those who have much and those who have little, can seldom, however good our intentions, avoid the taint of exploitation.

Barcelona: An Urban History of Science and Modernity, 1888-1929 Oliver Hochadel, Agustí Nieto-Galan, 2016-04-14 The four decades between the two Universal Exhibitions of 1888 and 1929 were formative in the creation of modern Barcelona. Architecture and art blossomed in the work of Antoni Gaudi and many others. At the same time, social unrest tore the city apart. Topics such as art nouveau and anarchism have attracted the attention of numerous historians. Yet the crucial role of science, technology and medicine in the cultural makeup of the city has been largely ignored. The ten articles of this book

recover the richness and complexity of the scientific culture of end of the century Barcelona. The authors explore a broad range of topics: zoological gardens, natural history museums, amusement parks, new medical specialties, the scientific practices of anarchists and spiritists, the medical geography of the urban underworld, early mass media, domestic electricity and astronomical observatories. They pay attention to the agenda of the bourgeois elites but also to hitherto neglected actors: users of electric technologies and radio amateurs, patients in clinics and dispensaries, collectors and visitors of museums, working class audiences of public talks and female mediums. Science, technology and medicine served to exert social control but also to voice social critique. Barcelona: An urban history of science and modernity (1888-1929) shows that the city around 1900 was both a creator and facilitator of knowledge but also a space substantially transformed by the appropriation of this knowledge by its unruly citizens.
