Internal Conflict in Nineteenth-Century Literature Stefan Bolea, 2020-10-07 *Internal Conflict in Nineteenth-century Literature: Reading the Jungian Shadow* examines the genealogy of the Jungian shadow in Romantic and post-Romantic literature. Stefan Bolea analyzes the way the crisis of identity in nineteenth-century literature prefigures our contemporary “inner discord” by means of the philosophy of literature, combining literary criticism with psychoanalytical phenomenology. This book provides a deep analysis of the connection between this “inner discord” and the century that brought us industrialization, nationalism, modernity, and the unconscious by comparing Jung’s theory of the shadow with Nietzsche’s and Cioran’s versions of Antihumanism in a highly interdisciplinary landscape. Scholars of psychology, philosophy, literature, media studies, and history will find this book particularly useful.

Interpreting Conflict Oded Balaban, 2005 This book offers a thought-provoking analysis of the controversial Camp David II peace negotiations between the Palestinians and the Israelis in July 2000 and the ensuing political events. The author's understanding of Middle Eastern politics is fresh and unconventional. Oded Balaban argues that the true political positions in the conflict do not coincide with traditional divisions between left and right, East and West, Israeli and

Palestinian. Although his insights are surprising his reasoning is always rigorous and logical. This book is recommended to all those interested in new approaches to political analysis.

Visual Journaling Barbara Ganim, Susan Fox, 1999-10-01 Most people who journal use words. But words come from the left brain, which interprets experiences through our learned beliefs and expectations. As this breakthrough book demonstrates, there is a more effective way to journal---using images. Simple drawings, crayon art, even doodles and stick figures can help anyone---even those who believe they can't draw---move beyond thought into deep reaches of feeling and intuitive knowing. Barbara Ganim and Susan Fox have developed their Visual Journaling technique into an acclaimed workshop. This book, beautifully illustrated with black and white and color drawings from the journals of students in their workshops, makes this enjoyable tool for personal exploration accessible to everyone. A six-week plan of exercises and interpretive activities teaches readers a lifelong practice that can reduce stress, explore conflicts, and overcome obstacles. Its simple techniques can help everyone gain access to soul-based inner wisdom.

Gratia in Augustine's Sermones ad Populum during the Pelagian Controversy Anthony Dupont, 2012-10-12 During the last decades, the doctrine of grace of Augustine of Hippo (354-430) has been studied in depth. The occurrence of grace in Augustine's ca. 580 sermones ad populum has not yet been systematically analysed. This monograph studies the presence of grace in sermones preached during the period of the Pelagian controversy - a debate precisely on the relation between divine grace and human freedom. Does Augustine deal with grace differently in these sermones and his anti-pelagian tractates? First, the gratia content of the sermones does not differ from that of the systematic treatises. Second, the treatment of this topic differs on occasion, a difference determined by the biblical, liturgical, rhetorical and contextual framework of the sermones. This book explores the anthropological-ethical perspective of grace in Augustine, which results in a correction of the image of an Augustine overemphasising God and neglecting man, and in a plea to see continuity in his thinking on grace.

Dorothy Wordsworth and Hartley Coleridge N. Healey, 2012-04-05 This book provides a reassessment of the writings of Hartley Coleridge and Dorothy Wordsworth and presents them in a new poetics of relationship, re-evaluating their relationships with William Wordsworth and Samuel Taylor Coleridge to restore a more accurate understanding of Hartley and Dorothy as independent and original writers.

Educational Ministry in the Logic of the Spirit James E. Loder, 2018-07-20 In November 2001, James E. Loder Jr., Professor of the Philosophy of Christian Education for forty years at Princeton Theological Seminary, suddenly died. He was a creative and profound thinker who had just completed a promising book. In it he developed a compelling interdisciplinary model to disclose how the divine Spirit affirms, reconstitutes, and transforms the human spirit to bring new energy and creativity into human experience. He called it redemptive transformation. You now hold that book in your hands. Those who know Loder's work are confident that Educational Ministry in the Logic of the Spirit, though delayed for over fifteen years,

will still become the best introduction to his complex thought. More important, it offers the imaginative means by which we may learn to attune ourselves and our faith communities to what God is doing in our fractured, distracted, and self-destructive world to bring about a revolution of love—the fruit of Christ’s Spirit and the center of our human vocation.

Weakness of Will in Renaissance and Reformation Thought Risto Saarinen, 2011-06-30 The question of why people act against their better judgment has always been prominent in philosophy. Risto Saarinen presents the first study of ideas about weakness of the will between 1350 and 1650. He shows how the understanding of human conduct and free will changed in this formative period between medieval times and modernity.

The White Devil Discover'd Frederick O. Waage, 1984 This is the first extensive close reading of John Webster's masterpiece of drama, *The White Devil*, and includes a study of its literary associations. The play is examined as an intricate texture of motifs and images, expressed through an organic form of «movements», rather than through act and scene structure. In addition, connections of the play with Mary Magdalen, rogue pamphlets, Sir Walter Raleigh's trial, Thomas Adam's «White Devil» sermon, and John Donne's *Biathanatos*, are newly explored.

Moral Emotion, Moral Cognition, and (Im)Moral Behavior in the Workplace Peixu He, Hongdan Zhao, Cuiling Jiang, Chuangang Shen, 2023-09-27 Moral behavior is subject to socially accepted moral norms and also has a pervasive influence on organizational performance. With the emergence of ethical issues found in organizations, practitioners and scholars pay increasing attention to ethics management. Therefore, workplace moral behavior (e.g., pro-social behavior and organizational citizenship behavior - OCB) and immoral behavior (e.g., interpersonal abusive behavior, deviant/counterproductive behavior, and unethical pro-organizational behavior) have also received substantial research interests over the past decades. To date, the most common framework used to study moral behavior has been the cognitive approach, with abundant evidence demonstrating that emotion and cognition are the two core elements in generating and influencing workplace (im)moral behavior. However, limited studies have been conducted to explore the emotional/cognitive processes or integrative moral emotion-cognition system relevant to workplace moral behavior. Despite our knowledge of the antecedents and consequences of workplace (im)moral behaviors, more research on the generating mechanism, influencing mechanism, transformation mechanism, and governance strategies is needed. For example, it is unclear how exhibiting (im)moral behavior in the workplace would impact the actor’s and the third-party observer’s emotions, thoughts, feelings, and subsequent behavior. Besides, the question of whether ethical/unethical leader behavior would trigger a “trickle-down effect” is underdeveloped, which refers to the fact that how the behavior or perception of the top leaders affects employees from top to bottom along the formal vertical power chain. In addition, we have little knowledge on when, how, and why the ethical employees (the so-called “good soldiers”) would engage in workplace immoral behavior, and vice-versa.

Grief and Its Transcendence Adele Tutter, Léon Wurmser, 2015-09-16 Grief and its Transcendence: Memory, Identity,

Creativity is a landmark contribution that provides fresh insights into the experience and process of mourning. It includes fourteen original essays by pre-eminent psychoanalysts, historians, classicists, theologians, architects, art-historians and artists, that take on the subject of normal, rather than pathological mourning. In particular, it considers the diversity of the mourning process; the bereavement of ordinary vs. extraordinary loss; the contribution of mourning to personal and creative growth; and individual, social, and cultural means of transcending grief. The book is divided into three parts, each including two to four essays followed by one or two critical discussions. Co-editor Adele Tutter's Prologue outlines the salient themes and tensions that emerge from the volume. Part I juxtaposes the consideration of grief in antiquity with an examination of the contemporary use of memorials to facilitate communal remembrance. Part II offers intimate first-person accounts of mourning from four renowned psychoanalysts that challenge long-held psychoanalytic formulations of mourning. Part III contains deeply personal essays that explore the use of sculpture, photography, and music to withstand, mourn, and transcend loss on individual, cultural and political levels. Drawing on the humanistic wisdom that underlies psychoanalytic thought, co-editor Léon Wurmser's Epilogue closes the volume. *Grief and its Transcendence* will be a must for psychoanalysts, psychotherapists, psychiatrists, and scholars within other disciplines who are interested in the topics of grief, bereavement and creativity.

Subjects of the World Paul Sheldon Davies, 2014-06-22 Being human while trying to scientifically study human nature confronts us with our most vexing problem. Efforts to explicate the human mind are thwarted by our cultural biases and entrenched infirmities; our first-person experiences as practical agents convince us that we have capacities beyond the reach of scientific explanation. What we need to move forward in our understanding of human agency, Paul Sheldon Davies argues, is a reform in the way we study ourselves and a long overdue break with traditional humanist thinking. Davies locates a model for change in the rhetorical strategies employed by Charles Darwin in *On the Origin of Species*. Darwin worked hard to anticipate and diminish the anxieties and biases that his radically historical view of life was bound to provoke. Likewise, Davies draws from the history of science and contemporary psychology and neuroscience to build a framework for the study of human agency that identifies and diminishes outdated and limiting biases. The result is a heady, philosophically wide-ranging argument in favor of recognizing that humans are, like everything else, subjects of the natural world—an acknowledgement that may free us to see the world the way it actually is.

Image of a Man Alex Belsey, 2020 Post-war British artist Keith Vaughan (1912-77) was not only a supremely accomplished painter; he was an impassioned, eloquent writer. *Image of a Man* provides a comprehensive critical reading of his extraordinary journal, uncovering the attitudes and arguments that shaped and reshaped Vaughan's identity as a man and as an artist.

Human Conflict in Shakespeare S. C. Boorman, 2021-03-30 Conflict is at the heart of much of Shakespeare's drama.

Frequently there is an overt setting of violence, as in Macbeth, but, more significantly there is often 'interior' conflict. Many of Shakespeare's most striking and important characters - Hamlet and Othello are good examples - are at war with themselves. Originally published in 1987, S. C. Boorman makes this 'warfare of our nature' the central theme of his stimulating approach to Shakespeare. He points to the moral context within which Shakespeare wrote, in part comprising earlier notions of human nature, in part the new tentative perceptions of his own age. Boorman shows Shakespeare's great skill in developing the traditional ideas of proper conduct to show the tensions these ideas produce in real life. In consequence, Shakespeare's characters are not the clear-cut figures of earlier drama, rehearsing the set speeches of their moral types - they are so often complex and doubting, deeply disturbed by their discordant natures. The great merit of this fine book is that it displays the ways in which Shakespeare conjured up living beings of flesh and blood, making his plays as full of dramatic power and appeal for modern audiences as for those of his own day. In short, this book presents a human approach to Shakespeare, one which stresses that truth of mankind's inner conflict which links virtually all his plays.
