*The Grants Register 2025* Palgrave Macmillan,2024-08-23 The Grants Register 2025 is the most authoritative and comprehensive guide available of postgraduate and professional funding worldwide. It contains international coverage of grants in almost 60 countries, both English and non-English speaking; information on subject areas, level of study, eligibility and value of awards; and information on over 5,100 awards provided by over 1,300 awarding bodies. Awarding bodies are arranged alphabetically with a full list of awards to allow for comprehensive reading. The Register contains full contact details including telephone, fax, email and websites as well as details of application procedures and closing dates. It is updated annually to ensure accurate information.

**Handbook of Research Methods in Corporate Social Responsibility** David Crowther,Linne Lauesen,2017-12-29 Corporate social responsibility now touches upon most aspects of the interaction between business and society. The approaches taken to research in this area are as varied as the topics that are researched; yet this is the first book to address the whole range of methods available. The book identifies the methods available, evaluates their use and discusses the circumstances in which they might be appropriate. It also includes forward-thinking guidance from experienced academics on the future directions of research in the area.

*Gower Handbook of Programme Management* D Lock,Reinhard Wagner,2020-07-26 In the ten years since this Gower Handbook was first published, Programme Management has been transformed to become the vehicle of choice for realising the objectives of large scale, complicated, business, government and social investment. The Second Edition of this Gower Handbook is a completely new text; designed as a definitive guide to the current state of Programme Management. To that end the text offers foundation theory and knowledge around key issues such as, managing programme contracts, people and know-how, complexity and uncertainty, benefits and success measures, as well as every stage of the programme life cycle. The main central section of the book provides theory, tools, advice and examples of practical application from an industry context and covers sectors including construction, energy, aerospace and defence, IT, automotive and the public sector. The Handbook also includes a section with chapters on assessing and improving programme competences and developing

maturity. Discrete chapters relate programme management to the international baselines and standards. Collectively, the Gower Handbook of Programme Management is most comprehensive guide to the subject that you can buy.

**Contemporary Design Education in Australia** Lisa Scharoun, Deanna Meth, Philip Crowther, Dean Brough, Lindy Osborne Burton, Muge Fialho Leandro Alves Teixeira, 2023-09-04 This book offers a range of approaches to teaching higher education design students to learn to design collaboratively and creatively, through transdisciplinary, multidisciplinary, cross-disciplinary and interdisciplinary learning experiences. It highlights that the premise of traditional disciplinary silos does little to advance the competencies needed for contemporary design and non-linear career paths. It makes the point that higher education should respond to the impacts of a changing society, including fluctuating market demands, economic variations, uncertainties, and globalization. Chapters highlight approaches that address this changing landscape, to meet student, industry and societal needs and reflect a range of design education contexts in which the authors have taught, with a focus on experiences at the Queensland University of Technology, Australia, but also including collaborations and comparative discussions elsewhere in Australia and globally, spanning Europe, Asia, the Middle East, and the United States. The book is positioned not as a definitive theoretical model for transdisciplinary design education but instead as a collective of chapters in which many forms of learning are explored through overarching themes of curriculum design and experiential and authentic learning and collaboration, transforming professional identities, and design cultures.

Mediating Health Information N. Wathen, S. Wyatt, R. Harris, 2008-08-29 Welcome or not, most citizens in Western countries are unable to go through a day without receiving a dose of health information. This book examines the ways in which ordinary people locate and digest the amount of health information available today, focusing on the unexplored 'middle' place of human and technical mediators.

*Struggles and Successes in the Pursuit of Sustainable Development* Tay Keong Tan, Milenko Gudic, Patricia Flynn, 2020-06-03 The challenges associated with the struggles for attainment of the Sustainable Development Goals (SDGs) and objectives are as diverse and complex as the variety of human societies, national conditions and natural ecosystems worldwide. Despite decades of economic growth and technological advances, our world is plagued by poverty, hunger, disease, conflicts and inequality, and many societies are under the strain of environmental changes and governance failure. Such global-scale challenges call for the SDGs to be translated beyond bold concepts and aspirational targets into concrete

programs and feasible plans that are substantively valuable, locally acceptable, pragmatic and operationally implementable. In the pursuit of the SDGs, positive results are far from guaranteed. Success is uncertain. Instead, the path forward requires difficult learning, experimentation and adaptation by multiple stakeholders. Loss and sacrifice are foreseeable and often inevitable. This important book captures the lessons from ongoing struggles and the early successes. Productive failures and emerging practices are identified, analyzed and promulgated for interdisciplinary learning by, and for the inspiration of, like-minded individuals, organizations, communities and nations worldwide. They can also inform and enrich the curricula in universities, training institutions and schools to prepare future generations of citizens, leaders and activists with the ethos and values of sustainability and social responsibility. The book offers a platform for academics, practitioners and concerned global citizens to identify pathways forward on the immense challenges of sustainability.

**Process Management** Jörg Becker, Martin Kugeler, Michael Rosemann, 2013-06-05 Process Management is a comprehensive compendium for the contemporary design of process-oriented organizations. It presents a proven methodology for the introduction and sustainable management of business processes. This book discusses each phase of a business process lifecycle model in the light of current research. A continuous case study provides interesting insights into the actual experiences with this lifecycle model and adds to the credibility of the presented contents. This also includes recommendations which are summarized in pragmatic checklists for each stage of the project. This book is of relevance for business analysts, business process managers, consultants, and all practitioners dealing with the analysis and re-design of business processes. It is also a valuable resource for lecturers and students in the disciplines of Business, Information Systems and Engineering.

**Ergonomics and Business Policies for the Promotion of Well-Being in the Workplace** Montoya-Reyes, Mildrend, Mendoza-Muñoz, Ismael, Jacobo-Galicia, Gabriela, Cruz-Sotelo, Samantha E., 2022-01-07 In recent years, employee health and well-being have been of increasing importance to companies as they attempt to move toward more sustainable business models and futures. Taking health into account in business policies helps ensure sustainable production systems. The role of ergonomics in companies can contribute to creating a more sustainable work environment, which accelerates the performance of the organization and promotes professional development, impacting the health and well-being of workers in a broad and positive way. Ergonomics and Business Policies for the Promotion of Well-Being in the Workplace presents the new trends in sustainable work through the analysis and application of methods to evaluate and improve the interaction of human beings with their work, their work area, and their environment. Covering topics such as mental health and organizational

environments, this publication is ideal for academics, researchers, industry professionals, policymakers, business owners, instructors, and students.

International Handbook of Women and Small Business Entrepreneurship Sandra L. Fielden, Marilyn Davidson, 2005

Sandra Fielden and Marilyn Davidson, already well known for their contributions to gender issues in management, have brought together an absorbing collection of articles that serve to enhance our understanding of a complex area within organisation studies. . . this particular Handbook is not a mere glossary. The editors provide a forum for scholarly works in a specialised area of small business and entrepreneurship research. And the International Handbook of Women and Small Business Entrepreneurship provides a rich resource collectively, the papers serve to summarise and re-examine much of the relevant research to date. . . an accessible book that follows a logical and coherent pattern. . . the range of this book is significant, and the accomplishment considerable. . . the International Handbook of Women and Small Business Entrepreneurship is a serious contribution to a niche area of entrepreneurship scholarship. The editors and authors have established a place for women in the literature, confirming that gender issues cannot be dismissed as a mere adjunct to the broader field of entrepreneurship study. This collection offers the reader intelligent engagement with the range of research and ways of knowing about women and entrepreneurship. Established scholars will find much of interest, and we would also confidently recommend the Handbook to interested newcomers. Robyn Walker and Kate Lewis, *Women in Management Review* Sandra L. Fielden and Marilyn J. Davidson have put a great deal of work into producing this compilation of scientific studies on women and small business entrepreneurship. In this book, the editors have managed to put together an excellent compilation of studies that look at topics that have aroused the highest interest in this field in recent years. . . It offers a good balance between theory and practice-oriented studies and presents an academic viewpoint that comes extremely close to the real, current situation of this phenomenon. This book therefore provides a useful tool both for the academic community in general and for students, particularly at a postgraduate or doctorate level, who wish to gain a state-of-the-art overview of this business phenomenon. It may also be put to good use by women in management and entrepreneurship as well as policymakers and small service providers, given its high empirical content, supported by a sound empirical framework, which deals with real-life issues for women who wish to start up and manage their own businesses. María Ángeles Escribá Moreno, *Entrepreneurship Management* . . . a truly international, unique and impressive contribution to our knowledge and understanding of issues for females starting, running and growing businesses. . . an important read for anyone with an interest in female entrepreneurship, including researchers, support agents and policymakers. Moreover, this book may be of interest to those concerned with the theoretical development of the study of entrepreneurship. Laura Galloway, *International Journal of Entrepreneurship and Innovation* . . . this book can be recommended as an insightful and interesting work on

women s entrepreneurship from a broad perspective. Wing Lam, International Small Business Journal This truly international Handbook makes a significant contribution to the field of women s entrepreneurship by broadening the scope of the conversation, hearing voices that are often unheard, and providing a framework that organizes the current body of knowledge but also presents pathways for future research and practice. Patricia G. Greene, Babson College, US This Handbook is a breakthrough collection. Women worldwide are now starting small businesses and entrepreneurial ventures at a faster rate than men. Though small in size, these initiatives represent a significant factor in economic growth, highlighting their importance. This collection sheds light on the motivations, personality and behaviors of women entrepreneurs, the constrai

**Transforming IT education** Christine Bruce,George M. Mohay,Glenn Smith,Ian Stoodley,Robyn Tweedale,2006 It is by now an obvious observation that much of the world depends on information technology. Our infrastructure relies on IT: our buildings, finance systems, roads, airplanes, cars, televisions, washing machines and bread makers; as does much of what we do: our banking, learning and communicating. Almost everyone today uses information technology, but few know how it works, and very few indeed understand the mysteries of how to build new systems. This imbalance between 'users' and 'knowers' grows worse every year. With the 'dot com collapse', the number of students studying computers, and information technology more generally, has been shrinking steadily. In the long run, this trend is not likely to be a good thing, either in

Australia or elsewhere. What can we do about this? IT courses worldwide report falling enrolments and high attrition. The glamour of computing – seemingly effortless graphics and animations, and the management of massive computations and data sets – is at odds with the reality of how difficult it can be to coax computers into exhibiting these advanced capabilities; and many students find the transition from the dream to reality too difficult to master. One possibility is to reconceptualize both what and how we teach, making IT more attractive to students without sacrificing the rigour and depth needed to produce graduates capable of life-long learning against the backdrop of rapidly evolving technologies. The Faculty of Information Technology at QUT has long sought to develop curricula and pedagogies that make this possible. The results of this search show in innovative curricula, real-world engagement, and a dominant position in our local market for IT education. QUT's strategic plan, the 'QUT Blueprint'\*, exhorts the University to be bold, experiment, and engage with the real world in order to ensure we remain relevant and attuned to the needs of both our graduates and the industries that will employ them. The contents of this book report on a significant part of our response to this challenge. I'm honoured to be able to write this preface only a year after I joined QUT; the work herein is a credit to my two predecessors as Deans of the Faculty, Professors Dennis Longley and John Gough, and to all the staff of the Faculty, both academic and professional, and current and past. Hopefully it will also help to inspire a new generation of staff and students. To you, the reader, this book is best thought of as a snapshot of a long quest to discover the secrets of how best to approach the moving feast that is IT education. It will be of interest to those looking to develop new curricula of their own, or benchmark their own journeys of discovery. We should never imagine that we have all the answers; indeed, it's our hope that readers will learn from, and improve on, what we have achieved, and share their insights with us in return, so that the co-evolution of ICT teaching around the world can be facilitated.

**Handbook on Business Process Management 2** Jan vom Brocke, Michael Rosemann, 2014-08-28 Business Process Management (BPM) has become one of the most widely used approaches for the design of modern organizational and information systems. The conscious treatment of business processes as significant corporate assets has facilitated substantial improvements in organizational performance but is also used to ensure the conformance of corporate activities. This Handbook presents in two volumes the contemporary body of knowledge as articulated by the world's leading BPM thought leaders. This second volume focuses on the managerial and organizational challenges of BPM such as strategic and cultural alignment, governance and the education of BPM stakeholders. As such, this book provides concepts and methodologies for

the integration of BPM. Each chapter has been contributed by leading international experts. Selected case studies complement their views and lead to a summary of BPM expertise that is unique in its coverage of the most critical success factors of BPM. The second edition of this handbook has been significantly revised and extended. Each chapter has been updated to reflect the most current developments. This includes in particular new technologies such as in-memory data and process management, social media and networks. A further focus of this revised and extended edition is on the actual deployment of the proposed theoretical concepts. This volume includes a number of entire new chapters from some of the world's leading experts in the domain of BPM.
