Notes for the Private Pilot Gihan Ganesh,2024-09-24 Learning to fly is an exciting adventure and challenge. Learning aviation theory is part of that. To help you on that journey we wanted to create the most modern, concise, and beautifully presented aviation theory guides out there. There are many aspects of aviation theory that are tested in the six subjects of the New Zealand PPL syllabus. Each subject and its component topics could be studied in exhaustive detail, much of which is excessive to the private pilot and detracts from the key points. We focussed this book on those key points and is presented in a question-and-answer conversational style that helps you understand and remember the information. This single book covers the entire CAA (NZ) syllabus for the private pilot. The book is divided into six parts, covering each subject. The book is fully indexed and contains over 200 figures.

Flying Safety ,1986

Professional Helicopter Pilot Studies Croucher Phil,2007-01-01 Based on the author's EASA approved ATPL(H) modular distance learning course, this book provides all the material required for the EASA exams, including the PPL(H), CPL(H) and ATPL(H), plus a few extras, like the Instrument Rating. The book has been specially designed for the needs of professional or military pilots seeking to gain an alternative licence, but newcomers to the industry can use it, too, since it assumes no previous knowledge.

The MATS Flyer ,1958

Private Helicopter Pilot Studies JAA BW Phil Croucher,2007-10-03 The complete syllabus for the EASA PPL(H) and for other licences too. It is intended for people who are going to progress to a professional licence, which is why it is based on an ATPL(H) distance learning course.

EASA Enroute Instrument Rating Phil Croucher,2014-09-24 Until recently, the only option for instrument rating training in Europe was a full course requiring up to 200 hours of theoretical knowledge instruction, but the Enroute and Competency-Based Instrument ratings (for aeroplanes only) are a part of a new approach that is supposed to make instrument flying more accessible, because the original courses were designed as part of a commercial course and were necessarily intense. This book is for people who already hold an ICAO IR, and who can simply convert to the EASA version by completing the skill test and demonstrating to the examiner (during the skill test) an adequate knowledge of air law, meteorology and flight planning. It contains all the information needed to answer the examiner's questions, plus tip and tricks not usually taught on such a basic course.
