William A. Horstman

Contact Carl Sagan, 2016-12-20 Pulitzer Prize-winning author and astronomer Carl Sagan imagines the greatest adventure of all—the discovery of an advanced civilization in the depths of space. In December of 1999, a multinational team journeys out to the stars, to the most awesome encounter in human history. Who—or what—is out there? In *Cosmos*, Carl Sagan explained the universe. In *Contact*, he predicts its future—and our own.

Contact Carl Sagan, 1997-07 Carl Sagan's fictional account of humankind's first contact with extraterrestrial intelligence. Movie tie-in.

Contact Carl Sagan, 1986 Beautiful astrophysicist Rebecca Blake deciphers long-awaited signals from space, persuades world leaders to construct a machine that many consider a Trojan Horse, and journeys into space for an epochal encounter

The Making of the New Spirituality James A. Herrick, 2004-12-02 James A. Herrick offers an intellectual history of the New Religious Synthesis, examining the challenges it poses to Judeo-Christian tradition, demonstrating its sources and manifestations in contemporary culture, and questioning its acceptance in church and society.

Are We Alone in the Cosmos? The Search for Alien Contact in the New Millennium Ben Bova, Byron Preiss, 2010-07-15 Are we alone in this cosmos, or do we yet have to come to terms with the actual existence of alien life? Never before has so much time and concentrated effort been spent by so many scientists and writers in the pursuit of the answer to this fundamental question. In this extraordinary book, major scientists involved in the search for extraterrestrial intelligence known as SETI explain their work and reveal their secret thoughts. Now, in joining them here, are some of the best speculative thinkers, from Arthur C. Clarke and Isaac Asimov to Gregory Benford, who address the major philosophical questions involved. Intriguing, suspense-filled and intense, this book promises to deliver more than just mundane facts and theory.

Astrotheology Dr. Ted F. Peters Martinez Hewlett, Martinez Hewlett, Joshua M. Moritz, Robert John Russell, 2018-07-12 *Astrotheology: Science and Theology Meet Extraterrestrial Life* looks at both ends of the telescope: the unfathomable reaches of cosmic space and the excited stirrings within the human psyche. It takes a scientist to explain what we are looking at. It takes a theologian to understand who is doing the looking. This book's scientific authors update readers on astrobiology's search for extraterrestrial life. Theologians add to the science a theological analysis of the place of space in understanding God's creative work, the prospects of sharing God's creation with extraterrestrial neighbors, and the question of whether one

or many incarnations are required for cosmic redemption. Finally, these scholars lay the foundations for an ethic of space exploration. This book introduces a comprehensive astrotheology with an accompanying astroethic.

The Semantic Web: Research and Applications Grigoris Antoniou, Marko Grobelnik, Elena Simperl, Bijan Parsia, Dimitris Plexousakis, Pieter De Leenheer, Jeff Z. Pan, 2011-06-11 The books (LNCS 6643 and 6644) constitute the refereed proceedings of the 8th European Semantic Web Conference, ESWC 2011, held in Heraklion, Crete, Greece, in May/June 2011. The 57 revised full papers of the research track presented together with 7 PhD symposium papers and 14 demo papers were carefully reviewed and selected from 291 submissions. The papers are organized in topical sections on digital libraries track; inductive and probabilistic approaches track; linked open data track; mobile web track; natural language processing track; ontologies track; and reasoning track (part I); semantic data management track; semantic web in use track; sensor web track; software, services, processes and cloud computing track; social web and web science track; demo track, PhD symposium (part II).

Intelligent Design William A. Dembski, 2002-07-12 In this book William A. Dembski brilliantly argues that intelligent design provides a crucial link between science and theology. This is a pivotal work from a thinker whom Phillip Johnson calls one of the most important of the 'design' theorists.

Alien Physics Ronald F. Avery, 2002-09-25 The world asks Christians tough questions, and we ask equally tough questions of ourselves. In this book thirty contributing authors of seventeen denominational backgrounds and an agnostic share their understandings about fifty-seven challenges to our faith including such hot button issues as war, abortion, homosexuality, what it means to take up our cross, what sin is and what it can do, why we are convinced of God's existence, and why we believe the resurrection wasn't faked.

Unit Test Frameworks Paul Hamill, 2004-11-02 Unit test frameworks are a key element of popular development methodologies such as eXtreme Programming (XP) and Agile Development. But unit testing has moved far beyond eXtreme Programming; it is now common in many different types of application development. Unit tests help ensure low-level code correctness, reduce software development cycle time, improve developer productivity, and produce more robust software. Until now, there was little documentation available on unit testing, and most sources addressed specific frameworks and specific languages, rather than explaining the use of unit testing as a language-independent, standalone development methodology. This invaluable new book covers the theory and background of unit test frameworks, offers step-by-step instruction in basic unit test development, provides useful code examples in both Java and C++, and includes details on some of the most commonly used frameworks today from the XUnit family, including JUnit for Java, CppUnit for C++, and NUnit for .NET. Unit Test Frameworks includes clear, concise, and detailed descriptions of: The theory and design of unit test frameworks Examples of unit tests and frameworks Different types of unit tests Popular unit test frameworks And more It

also includes the complete source code for CppUnit for C++, and NUnit for .NET.

Narrative and Cognition in Literature and Science Michael Sinding, Aura Heydenreich, Klaus Mecke, 2025-07-21 This volume explores cognitive perspectives on how science and narrative shape one another. Narrative is a principle of cognition, and cognition is fundamental to narrative. This duality enables a deeper mapping of the feedback between story and the natural sciences. Science, as a culturally-organized and systematic mode of knowing the world, may seem opposed to narrative thinking. Yet they are deeply interwoven. Scientists tell many kinds of stories, across genres and media. In thought experiments, lab experiments, written arguments, and histories and philosophies of fields, they recount and interpret unfoldings of events at often uncanny scales—from particle collisions to the evolution of life to cosmic expansion. Science stories go beyond science. Early science is entwined with myth, religion and magic. We still mythologize beneficent or evil geniuses, the promises and perils of technology. Teachers, journalists, politicians and lawyers all tell science stories for their own purposes. Literary artists use scientific ideas and forms, reimagining physical forces, causality and time in storyworlds, themes and figures. This is the first cognition-focused multi-disciplinary analysis of these narrative-science relations.

Knowing Tomorrow? Patrick A. Duin, 2007 In *Knowing Tomorrow*, well known futures researchers from around the world [e.g., Italy, the U.K., the U.S.A, the Netherlands, Taiwan, and Australia) discuss how the future is being dealt with in different sciences. They describe how scientists have incorporated the future in their theories, thereby often taking a historical perspective. The findings of this book can offer strong support to the scientific foundations of futures research and thus improve futures research as a scientific discipline.--BOOK JACKET.

The origin and end of time Ulisses Capozzoli, 2020-03-04 In this third volume of the *Science in Everyday Life* series, journalist and PhD in science Ulisses Capozzoli deals with the question of time, resorting to knowledge in areas such as physics, astronomy, philosophy and history. Capozzoli writes: Time has been a fascinating mystery ever since the earliest man. In chapters such as *The magical time nurtured by the Mayas*, *The distinct times of physics and philosophy*, *The time of humankind* and *Intriguing possibilities of time travel*, the author investigates the nature and presence of time, that, in spite of not revealing itself, marks every form of life. This collection is published exclusively as ebook - in English and Portuguese editions.

The Ashgate Encyclopedia of Literary and Cinematic Monsters Jeffrey Andrew Weinstock, 2016-04-01 From vampires and demons to ghosts and zombies, interest in monsters in literature, film, and popular culture has never been stronger. This concise Encyclopedia provides scholars and students with a comprehensive and authoritative A-Z of monsters throughout the ages. It is the first major reference book on monsters for the scholarly market. Over 200 entries written by experts in the field are accompanied by an overview introduction by the editor. Generic entries such as 'ghost' and 'vampire' are cross-listed with important specific manifestations of that monster. In addition to monsters appearing in English-language

literature and film, the Encyclopedia also includes significant monsters in Spanish, French, Italian, German, Russian, Indian, Chinese, Japanese, African and Middle Eastern traditions. Alphabetically organized, the entries each feature suggestions for further reading. The Ashgate Encyclopedia of Literary and Cinematic Monsters is an invaluable resource for all students and scholars and an essential addition to library reference shelves.

Musings of a Private Man William A. Horstman,2025-01-13 The most important thing I learned about Bill was his experience with Carl Sagan's book Contact. There is a story in this collection that Bill wrote called Contact. It's not a finished piece, nor is it a very cohesive piece, but the experience he is trying to capture is one of the most fascinating and extraordinary events I have ever heard of, and it's something I will never forget. As you'll read, when Bill was about 30 years old, he was on a flight home from California, and he had the book Contact that he began reading on that flight. Early in the book a few things jump out to Bill. First, the location of the novel begins in a Wisconsin town near a lake, just like how Bill had grown up near Lake Michigan. Then we find out the main character has lost her father while she's in grade school, in a sudden way, just as Bill had. But to confirm that this book, which Carl Sagan wrote in 1985, was indeed connected to Bill, was the passage that read his exact name. The sentence is: Billy Horstman, who sat next to her, gently reached out and placed his hand over hers. This book was created by Sally Riessen Hunt (Horstman), Brooke Laufer and Barbara Monier, who together lovingly gathered and organized Bill's writings with the shared conviction that he was a wondrous man.

The Design of Life William A Dembski,Jonathan Wells,2008 The Design of Life, written by two leading intelligent design theorists, offers the clearest, most comprehensive treatment of intelligent design on the market, with answers to Darwinists' objections drawn unrelentingly from the recent science literature.

Cosmos 1999 - The Third Year of Space 1999 John K. Balor,2019-07-10 What does Gerry Anderson's television series SPACE 1999 have in common with Carl Sagan's award-winning television documentary COSMOS? Not very much, one might expect, but this book documents an Online Alpha discussion where fans of the science fiction series discuss and debate differences and similarities from a wide range of perspectives, some of them arguing that two series may be so closely connected that it might be natural to think of COSMOS as the third year of SPACE 1999. This book is written on an idealistic basis. It is sold at the lowest price the publisher was willing to accept. A free e-book version can be downloaded at www.lulu.com.

Passages through Enclosures and the Spacetime Continuum in English and American Science Fiction Iren Boyarkina,2022-02-08 This book focuses on the analysis of various passages across enclosures and the spacetime continuum

in science fiction literature. It provides a rich arsenal of analytical instruments for the study of these very popular concepts in the genre of science fiction, and synthesizes current practical and theoretical approaches in science fiction written by active researchers and practitioners in this field. Taking this into consideration, this book will serve as a bedrock to help educators, researchers and students to conduct their research in the field of literature in general and in science fiction in particular. The volume brings together cutting-edge research in the fields of narrative analysis, literary and linguistic analysis, quantum physics, and astrophysics, among others, while the complexity and novelty of the eight essays gathered here offer fresh views on the topic and will stimulate the intellectual curiosity of various readers across different fields of research.
