**La fotografía paso a paso** Michael John Langford,Michael Langford,1990-12 CONTENIDO: Las bases de la fotografía - El manejo de la cámara - La elaboración de la imagen - Revelado y positivado en blanco y negro - Equipo y técnicas profesionales - Técnicas profesionales de laboratorio - Fotografía a color - Procesado y positivado en color - La maduración del estilo.

**La fotografía** Rouillé, André,2017-04-19 Más allá de la historia, la verdadera apuesta de este libro es poner -la fotografía al derecho-: pensarla como una técnica en continuo proceso de transformación, fluida y plural, inherentemente vinculada a la praxis económica y social. Lejos de concebir a la fotografía instrumentalmente como una herramienta para representar personas, cosas y acciones, Rouillé la entiende como una técnica productiva y reproductiva que opera dialécticamente en el seno de la cultura capitalista.

**Fotografía de creación** José Gómez Isla,2016-06-30 El presente ensayo pretende ofrecer una amplia panorámica del uso heterogéneo y dispar que los creadores contemporáneos han venido haciendo con la fotografía, sobre todo en las últimas cuatro décadas. Resulta complejo, por no decir fútil, delimitar la frontera entre fotografía de creación y cualquier otro tipo de práctica fotográfica, pues buena parte de estos artistas han promovido la amateurización y el mestizaje del medio fotográfico como recurso estético, contraviniendo así las tesis clásicas que defendían el virtuosismo, o el profundo conocimiento técnico, como condiciones indispensables para legitimar cualquier discurso genuino de autor. Con el apoyo de una amplia selección de obras fotográficas de los creadores más emblemáticos de las últimas décadas, y un discurso tan accesible como pleno de datos, la obra permite recorrer la historia de la fotografía contemporánea y dilucidar sus principales claves. De indudable interés para estudiantes, aficionados y especialistas de la fotografía, la obra resulta igualmente atractiva para un público general más amplio, atento a la creación contemporánea y a la que es, sin duda, una de sus disciplinas más productivas e innovadoras.

**La imagen fotográfica** Luis Castelo Sardina,Jaime Munárriz Ortiz,2007-10-01 En este libro se estudian los diferentes conceptos y técnicas propios de la fotografía, subrayando la importancia de los resultados del proceso fotográfico, es decir,

de las fotografías. Este estudio se desarrolla atendiendo a los aspectos significativos de la actividad fotográfica en la actualidad y, en particular, a los relacionados con el cambio de tecnologías, sin olvidar que el planteamiento básico es el de la consideración de la fotografía como arte. Dichos conocimientos se describen y analizan recurriendo a la idea de la fotografía como sistema, observándola desde el punto de vista de los procedimientos. Sin embargo, también desarrolla una exposición del resultado del proceso fotográfico partiendo de las fotografías mismas, ya sea abordándolas en tanto que referentes a elementos del lenguaje, como en tanto que pertenecientes a la historia de la fotografía. Esto supone una exposición de los elementos variables y controlables concernientes a la imagen, así como una introducción al lenguaje fotográfico y a la relación de éste con la significación propia de las imágenes fotográficas.

*Manual fotografía de calle* David Gibson, 2021-02-09 Este manual celebra el espíritu de la fotografía de calle con instrucciones inspiradoras que le ayudarán a captar el momento urbano perfecto. A través de 20 tutoriales de proyectos sencillos, así como cautivadores perfiles ilustrados de 20 fotógrafos de calle de renombre internacional, entre ellos Bruce Gilden, Michelle Groskopf y Trent Parke, el autor le ofrece un recorrido visual por el medio, perfecto para el aspirante a fotógrafo de calle.

La desmaterialización fotográfica José Pablo Concha, 2011 El propósito de este libro es pensar las implicancias filosóficas de la desmaterialización del soporte fotográfico y las resonancias metafísicas del paso de la imagen análoga a la digital o numérico-binaria. Para ello, la fotografía será vista como imagen, en general, en el pensamiento filosófico, lo que permite comprenderla como la culminación visual de la tradición imaginaria de Occidente. Luego, la fotografía se considerará como objeto cultural configurador de mundo. Finalmente, la modificación de soporte, desde una materialidad hacia una codificación, será interpretada como una declinación de las maneras de descifrar al sujeto contemporáneo y sus sistemas de significación. Con dicho recorrido, este libro se transforma en fundamental para todo aquel al que le interese conocer la importancia de la representación, y en particular de la fotografía, en el pensamiento filosófico desde sus inicios hasta hoy.

*Technopolitics* Constantino Pereira Martins (Ed.), 2024-09-24 Technopolitics is a follow-up book that intends to depart and expand the concept of Cyberpolitics to all the dimensions and effects of technology in our lives but placing politics at the center of debate and thought. Most investigations in the fields of Humanities have highlighted the impact of digitization and social virtualization and mapped the transition from the Industrial Revolution, and mass disciplinary society, to the digital revolution, telework and social atomism. The fusion of disruptive technologies is changing the fundamentals of our world almost roaming on its own towards a near future with unprecedented and unpredictable outcomes. This new technological reason implies a rupture and a paradigm shift in the radical transition from an instrumental reason (auxiliary) to an autonomous reason (essential). This means the impossibility of further sustaining the illusion of technological neutrality.

Science, culture and technology appear to be merging and in combat simultaneously. And all fields of knowledge are alert to a main idea: how deep is technology shaping our societies and politics? Regardless of the outcome, an age of instability is also an age of challenges. In our era of uncertainty, and while our civilization moves forward toward a hyper-technological future, we should not forget to discuss and reflect on the values and ethics we would like to survive the ruin of time and to pass on to the next generations.

Barcelona, City of Margins Olga Sendra Ferrer, 2022-01-27 Barcelona, City of Margins studies the creation of a space of dissent in the 1950s and 1960s that became the pillar of the protest movements during the final years of the Franco dictatorship and the transition to democracy. This space of dissent took shape in the margins of what is considered the official space of the city of Barcelona, revealing the interconnection of urbanism, literature, and photography in the formation of the political, social, and cultural movements to come in the 1970s. Olga Sendra Ferrer draws from theoretical readings on built environments, neighbourhoods, housing projects and developments, and everyday life within Spanish urban spaces. Literature and photography demonstrate the political value of cultural production and forms of cultural representation that occur from peripheral zones - those pushed aside by exclusionary politics, fascist forms of control, surveillance, and homogenization. In search of the origins of the protest movements and counter culture that would come in the final years of the Franco regime, Barcelona, City of Margins asserts the value of urban movement and cultural practice as a challenge to the spatial and urbanistic regime of Francoism.

La cámara de Pandora Joan Fontcuberta, 2012-08-20 El cambio de paradigma tecnológico al que la fotografía se ha visto sometida en los últimos años no sólo ha puesto de nuevo de manifiesto la naturaleza fotográfica de nuestra cultura, sino que ha zarandeado algunos de los fundamentos que parecían formar parte indisociable de lo fotográfico. A través del estilo desenfadado e irónico que siempre ha caracterizado a Joan Fontcuberta, La cámara de Pandora aborda la refundación de este medio en el nuevo entorno digital para repensar aquellas cuestiones que van más allá de lo estrictamente fotográfico y para abrirse a los nuevos principios que se plantean con la nueva fotografía. Con artículos de marcado tono lúdico como muestran sus propios títulos -'Yo conocí a las Spice Girls' o 'El misterio del pezón desaparecido'-, el autor retoma el hilo conductor que ya marcara en El beso de Judas. Fotografía y verdad y, en esta nueva entrega de dieciséis ensayos, desgrana lo que queda de la fotografía: los restos de la autenticidad, los restos de lo documental, los restos de unos valores que hicieron que la fotografía moldeara la mirada moderna y contribuyera a nuestra felicidad. Y, fiel al principio de que una fotografía vale más que mil mentiras, el autor elucida la naturaleza de la nueva fotografía (digital) y sus extravíos. De ahí derivan reflexiones críticas y evocaciones poéticas que rastrean los empeños de una posmoderna cámara de Pandora que ya no se limita a describir nuestro entorno sino que ambiciona poner orden y transparencia en los sentimientos, la memoria y la

vida.

**El estilo en fotografía** Michael Freeman,1999-02-02

**Arcana del pensamiento del siglo XX** Cristina Basili,Roberto Navarrete,José Luis Vilacañas,2021-07-06 Este libro se pregunta por el movimiento del pensar en el siglo XX, no para exponer de forma académica un aspecto u otro del pensamiento de los grandes autores del siglo pasado, sino para identificar sus arcana: aquellas conexiones filosóficas veladas en una obra o autor que, aunque ocultas, en reserva o latentes, determinaron posiciones importantes, decidieron las acuñaciones conceptuales, los giros temáticos y las orientaciones, y generaron los estratos de sentido de los conceptos y los compromisos vinculantes. La obra propone así ejercer el poder de la crítica en el campo de la filosofía, mediante la búsqueda de nuevos estímulos evolutivos y sendas no transitadas en las que está en juego la historia de los conceptos, evitando al mismo tiempo caer en la mitificación de las conexiones germinales establecidas y mostrando potencialidades todavía no agotadas que permitan renovar nuestra conciencia histórica al margen del futurismo acelerado de la Modernidad.

**Del cuento al relato híbrido** Christoph Rodiek,2008 Estudio que se centra en el relato híbrido, o bimedial, y trata de esclarecer la relación entre novedad-experimento y narratividad-narrabilidad en un autor que sigue mirando a la vanguardia en una época de pleno neorrealismo.

**El ojo del fotógrafo** Michael Freeman,2021-01-12 El diseño es el factor más importante para crear una buena fotografía. La capacidad para intuir el potencial de una imagen potente y luego organizar los elementos gráficos en una composición efectiva y convincente ha sido siempre uno de los requerimientos más fundamentales de la fotografía. Desde su primera edición en 2007, El ojo del fotógrafo se ha posicionado como la obra esencial sobre este tema, y está considerado un libro clave para los fotógrafos contemporáneos. Explora todos los enfoques tradicionales con respecto a la composición y el diseño, y también, muy importante, cubre posibilidades creativas como las técnicas de unión de imágenes y HDR. La nueva reproducción digital, no disponible cuando se imprimió la primera edición, proporciona a la fotografía del autor un nuevo aspecto al tiempo que conserva el saber hacer que ha proporcionado objetivos innovadores a una generación de fotógrafos.

**Drawing (...) City (...) Body, Dwelling on Earth** Pedro António Janeiro,2019-01-08 This international seminar's fifth edition, dedicated to the theme Desenho (...) Cidade (...) Corpo, Habitando a Terra (Drawing [...] City [...] Body, Inhabiting the Earth) was held as a joint activity between: this C.I.A.U.D./F.A./U.Lisboa Research Project, the University of São Paulo, represented by the Maria Antônia University Centre, and the Faculty of Architecture and Urbanism of the Federal University of Juiz de Fora. Its objectives were threefold: To discuss how Drawing in/of the City and the elements that identify it

(geographical area, inhabitants, natural landscape and/or built landscape; present, desired or memorable facts and data) are represented and identified through the presence and/or action of the body, in the form of gestures, movements, interventions, displacements or permanence. To problematise the association between Drawing and City from the starting point of the perception of the Body, assuming this mediation as a condition for the particular construction of that relationship. To identify the presence of the Body in the Representations/Drawings of the City, submitting this event or phenomenon to analysis, aiming for cognitive production. The contributions will be of interest to artists, academics and professionals in the fields of drawing and the arts, architecture, sociology, philosophy, urbanism and design.
