

Honorifics In Korean Language

Andrew David Jackson,Codruța Sîntionean,Remco E. Breuker,CedarBough Saeji

Korean Honorifics and Politeness in Second Language Learning Lucien Brown,2011 This book investigates the ways that advanced speakers of Korean as a second language perceive, use and learn the complexities of the Korean honorifics system. Despite their advanced proficiency in Korean, the study shows that the honorifics use of these speakers diverges in crucial ways from native speaker norms. It is argued that, rather than reflecting the language competence of these speakers as such, this usage is linked to questions of the identity of language learners and foreigners in Korean society. In addition, it shows the influence of conflicting ideologies regarding the meaning of politeness . This argument is backed up by rich data collected through mixed methods (discourse completion tests, role-plays, natural interactions, introspective interviews), allowing for a detailed picture of how the honorifics use of second language speakers emerges in context. The book concludes by discussing the implications of the study for politeness research, interlanguage pragmatics and language pedagogy.

Missionary Grammars and the Language of Translation in Korea (1876-1910) Paweł Kida,2024-03-27 Missionary Grammars and the Language of Translation in Korea (1876–1910) embraces the Enlightenment period in Korea (1876–1910) after the opening of the so-called Hermit Nation in describing the Korean language and missionary works. This book includes a comprehensive analysis and description of works published at that time by John Ross (1877, 1882), Felix-Clair Ridel (1881), James Scott (1887, 1893), Camille Imbault-Huart (1893), Horace Grant Underwood (1890, 1914), James Scrath Gale (1894, 1903), and Annie Laurie Baird (1911) with the particular focus on missionary activities, linguistic practices, grammatical content, and the language of translation from Korean into a native language. The topic of missionary grammar was raised by Otto Zwartjes (2012, 2018) with a focus on South America, North America, and Portuguese missions in Asia and Africa. Still, so far, Korea had not been mentioned, and there has been missing content about missionary grammar in Korea. A necessary study has been made within the framework of AMG (Average Missionary Grammar). The author has concluded that missionary works played an essential role in the formation of further linguistic research in Korea. The Greek-Latin approach applied by Western missionaries to the language is still relevant in the grammatical description of the Korean language. This book will primarily appeal to Korean language educators, researchers, and historical linguists. Postgraduates interested in missionary grammar will also benefit from the content of this volume.

The Language of Hallyu Jieun Kiaer, 2023-07-10 The Language of Hallyu will re-examine the language of the Korean Wave by looking at popular K-content. In doing so, it will expose the meanings that get lost in translation, hidden under subtitles. Over the past decade, hallyu (the Korean wave) has exploded in popularity around the globe. K-films, K-drama, and K-pop were once small subcultures, known mostly by Korea's East and Southeast Asian neighbours and Korean diaspora. Now, K-content has entered the international mainstream. Consequently, interest in Korean language has grown, while interest in language learning in general has decreased. Many textbooks emphasise that Korean is a 'polite' language, but this book will highlight that this is not the case. The Language of Hallyu examines popular K-content, including *Parasite* (2019), *Minari* (2020), *Squid Game* (2021), and *Pachinko* (2022). The author introduces language stylistics to explain how Koreans style their language to suit every occasion. She argues that they do this via a process of visual scanning and social tuning, whereby visual clues are assessed in tangent with an individual's sociocultural awareness. The author concludes by highlighting the danger of the jondaemal/banmal (polite/casual speech) divide, demonstrating that Korean language is so much more than polite. This book will be of interest to students and researchers in Korean language and culture, particularly those interested in linguistics and pragmatics.

The Routledge Handbook of Asian Linguistics Chris Shei, Saihong Li, 2022-07-28 The Routledge Handbook of Asian

Linguistics provides a comprehensive overview of the ways in which Asian languages should be conceptualized as a whole, the distinct characteristics of each language group, and the relationships and results of interactions between the languages and language families in Asia. Asia is the largest and the most populous continent on Earth, and the site of many of the first civilizations. This Handbook aims to provide a systematic overview of Asian languages in both theoretical and functional perspectives, optimally combining the two in intercultural settings. In other words, the text will provide a reference for researchers of individual Asian languages or language groups against the background of the entire range of Asian languages. Not only does the Handbook act as a reference to a particular language, it also connects each language to other Asian languages in the perspective of the entire Asian continent. Cultural roles and communicative functions of language are also emphasized as an important domain where the various Asian languages interact and shape each other. With extensive coverage of both theoretical and applied linguistic topics, The Routledge Handbook of Asian Linguistics is an indispensable resource for students and researchers working in this area.

Politeness in East Asia Dániel Z. Kádár, Sara Mills, 2011-09-08 We use politeness every day when interacting with other people. Yet politeness is an impressively complex linguistic process, and studying it can tell us a lot about the social and cultural values of social groups or even a whole society, helping us to understand how humans 'encode' states of mind in their words. The traditional, stereotypical view is that people in East Asian cultures are indirect, deferential and extremely polite - sometimes more polite than seems necessary. This revealing book takes a fresh look at the phenomenon, showing that the situation is far more complex than these stereotypes would suggest. Taking examples from Japanese, Korean, Chinese, Vietnamese and Singaporean Chinese, it shows how politeness differs across countries, but also across social groups and subgroups. This book is essential reading for those interested in intercultural communication, linguistics and East Asian languages.

The Oxford Guide to the Transeurasian Languages Martine Robbeets, Alexander Savelyev, 2020 This volume provides a comprehensive treatment of the Transeurasian languages. It offers detailed structural overviews of individual languages, as well as comparative perspectives and insights from typology, genetics, and anthropology. The book will be an indispensable resource for anyone interested in Transeurasian and comparative linguistics.

Minimal Languages in Action Cliff Goddard, 2021-05-24 This edited book explores the rising interest in minimal languages - radically simplified languages using cross-translatable words and grammar, fulfilling the widely-recognised need to use language which is clear, accessible and easy to translate. The authors draw on case studies from around the world to demonstrate how early adopters have been putting Minimal English, Minimal Finnish, and other minimal languages into action: in language teaching and learning, 'easy language' projects, agricultural development training, language revitalisation, intercultural education, paediatric assessment, and health messaging. As well as reporting how minimal

languages are being put into service, the contributors explore how minimal languages can be adapted, localised and implemented differently for different purposes. Like its predecessor *Minimal English for a Global World: Improved Communication Using Fewer Words* (Palgrave Macmillan, 2018), the book will appeal to students and scholars of applied linguistics, language education and translation studies, as well as to professionals in any field where accessibility and translatability matter.

Applied Language Learning ,2006

Education in Languages of Lesser Power Craig Alan Volker, Fred E. Anderson, 2015-02-15 The cultural diversity of the Asia-Pacific region is reflected in a multitude of linguistic ecologies of languages of lesser power, i.e., of indigenous and immigrant languages whose speakers lack collective linguistic power, especially in education. This volume looks at a representative sampling of such communities. Some receive strong government support, while others receive none. For some indigenous languages, the same government schools that once tried to stamp out indigenous languages are now the vehicles of language revival. As the various chapters in this book show, some parents strongly support the use of languages other than the national language in education, while others are actively against it, and perhaps a majority have ambivalent feelings. The overall meta-theme that emerges from the collection is the need to view the teaching and learning of these languages in relation to the different needs of the speakers within a sociolinguistics of mobility.

Heritage Language Development Kimi Kondo-Brown, 2006-12-13 This collection of studies investigates the individual, micro-psychological, and macro-societal factors that promote or discourage the development of child and young adult heritage language learners' spoken and written skills in East Asian languages (Chinese, Japanese, and Korean). The research presented in this book is based on empirical data from various learning and social settings in the United States and Canada. The contributors are themselves mostly from East Asian immigrant backgrounds and have worked closely with students from such backgrounds. This book also speaks to the needs for future research within East Asian communities that will (a) promote East Asian heritage language development in applied linguistics, (b) encourage parental, community, and national support for East Asian heritage language development, and (c) improve the teaching of oral and written skills for heritage learners of East Asian languages in various educational settings.

Humour in Asian Cultures Jessica Milner Davis, 2022-06-30 This innovative book traces the impact of tradition on modern humour across several Asian countries and their cultures. Using examples from Japan, Korea, Indonesia and Chinese cultures in Mainland China, Hong Kong and Taiwan, the contributors explore the different cultural rules for creating and sharing humour. Humour can be a powerful lubricant when correctly interpreted; mis-interpreted, it is likely to cause considerable setbacks. Over time, it has emerged and submerged in different periods and different forms in all these countries but today's conventions still reflect traditional attitudes to and assumptions about what is appropriate in creating and using humour.

Under close examination, Milner Davis and her colleagues show how forms and conventions that differ from those in the west can also be seen to possess elements in common. With examples including Mencian and other classical texts, Balinese traditional verbal humour, Korean and Taiwanese workplace humour, Japanese laughter ceremonies, performances and cartoons, as well as contemporary Chinese-language films and videos, they engage with a wide range of forms and traditions. This fascinating collection of studies will be of great interest to students and scholars of many Asian cultures, and also to those with a broader interest in humour studies. It highlights the increasing importance of understanding a wider range of cultural values in the present era of globalized communication and the importance of reliable studies of why and how cultures that are geographically related differ in their traditional uses of and assumptions about humour.

Computational Linguistics and Intelligent Text Processing Alexander Gelbukh, 2004-03-08 CICLing 2004 was the 5th Annual Conference on Intelligent Text Processing and Computational Linguistics; see www.CICLing.org. CICLing conferences are intended to provide a balanced view of the cutting-edge developments in both theoretical foundations of computational linguistics and the practice of natural language text processing with its numerous applications. A feature of CICLing conferences is their wide scope that covers nearly all areas of computational linguistics and all aspects of natural language processing applications. These conferences are a forum for dialogue between the specialists working in the two areas. This year we were honored by the presence of our invited speakers Martin Kay of Stanford University, Philip Resnik of the University of Maryland, Ricardo Baeza-Yates of the University of Chile, and Nick Campbell of the ATR Spoken Language Translation Research Laboratories. They delivered excellent extended lectures and organized vivid discussions. Of 129 submissions received (74 full papers and 44 short papers), after careful international reviewing 74 papers were selected for presentation (40 full papers and 35 short papers), written by 176 authors from 21 countries: Korea (37), Spain (34), Japan (22), Mexico (15), China (11), Germany (10), Ireland (10), UK (10), Singapore (6), Canada (3), Czech Rep. (3), France (3), Brazil (2), Sweden (2), Taiwan (2), Turkey (2), USA (2), Chile (1), Romania (1), Thailand (1), and The Netherlands (1); the figures in parentheses stand for the number of authors from the corresponding country.

Invented Traditions in North and South Korea Andrew David Jackson, Codruța Sîntionean, Remco E.

Breuker, CedarBough Saeji, 2021-11-30 Almost forty years after the publication of Hobsbawm and Ranger's *The Invention of Tradition*, the subject of invented traditions—cultural and historical practices that claim a continuity with a distant past but which are in fact of relatively recent origin—is still relevant, important, and highly contentious. *Invented Traditions in North and South Korea* examines the ways in which compressed modernity, Cold War conflict, and ideological opposition has impacted the revival of traditional forms in both Koreas. The volume is divided thematically into sections covering: (1) history, religions, (2) language, (3) music, food, crafts, and finally, (4) space. It includes chapters on pseudo-histories, new religions, linguistic politeness, literary Chinese, p'ansori, heritage, North Korean food, architecture, and the invention of children's pilgrimages in the DPRK. As the first comparative study of invented traditions in North and South Korea, the book takes the reader on a journey through Korea's epic twentieth century, examining the revival of culture in the context of colonialism, decolonization, national division, dictatorship, and modernization. The book investigates what it describes as "monumental" invented traditions formulated to maintain order, loyalty, and national identity during periods of political upheaval as well as cultural revivals less explicitly connected to political power. *Invented Traditions in North and South Korea* demonstrates that invented traditions can teach us a great deal about the twentieth-century political and cultural trajectories of the two Koreas. With contributions from historians, sociologists, folklorists, scholars of performance, and anthropologists, this volume will prove invaluable to Koreanists, as well as teachers and students of Korean and Asian studies undergraduate courses.

Politeness Across Cultures F. Bargiela-Chiappini, D. Kádár, 2010-12-08 This is the first edited collection to examine politeness in a wide range of diverse cultures. Most essays draw on empirical data from a wide variety of languages, including some key-languages in politeness research, such as English, and Japanese, as well as some lesser-studied languages, such as Georgian.

Task-Based Approaches to Teaching and Assessing Pragmatics Naoko Taguchi, YouJin Kim, 2018-08-15 This volume is the first book-length attempt to bring together the fields of task-based language teaching (TBLT) and second language pragmatics by exploring how the teaching and assessment of pragmatics can be integrated into TBLT. The TBLT-pragmatics connection is illustrated in a variety of constructs (e.g., speech acts, honorifics, genres, interactional features), methods (e.g., quantitative, quasi-experimental, conversation analysis), and topics (e.g., instructed SLA, heritage language learning, technology-enhanced teaching, assessment, and discursive pragmatics). Chapters in this volume collectively demonstrate

how the two fields can together advance the current practice of teaching language for socially-situated, real-world communicative needs.

Topics in Korean Language and Linguistics Ho-min Sohn, 2013

East Asian Pragmatics Xinren Chen, Doreen Dongying Wu, 2022-08-26 Most of the innovative and exciting work done by East Asian pragmatists on their languages, past and present alike, is written and published in local languages. As a result, research published in and about a particular East Asian language has been largely unavailable to those who do not speak the language. The contributors seek to present a comprehensive survey of existing outputs of pragmatics research on three major East Asian languages (Chinese, Japanese and Korean). The survey concentrates on a number of core pragmatic topics such as speech acts, deixis, discourse markers, conversation analysis, discourse analysis, and face/(im)politeness. To complement and compare with the picture of research work published in the local languages, the volume also includes a survey of internationally published, English-mediated articles and books studying the regional languages or contrasting them with other languages. A riveting discourse on pragmatics research, it will be a valuable read for students and scholars alike.
