**Does it Matter?** Graham Dunstan Martin,2005 Materialists claim that the mind, consciousness, life, evolution and the universe can be explained as the purposeless dance of unconscious particles, governed by chance. This books asks, does materialism make sense?Graham Dunstan Martin delves into areas as diverse as quantum physics, cosmology, artificial intelligence, brain science, biology, mysticism and philosophy, to assess the probabilities that the materialists are right. Are we, he asks, living souls? Does our universe in fact have a Designer?He concludes that computers will never become conscious; that the mind is not the same as the brain; that we genuinely and creatively possess free will; and that our experience of diverse levels of consciousness simply cannot be explained by materialism.This book is for all enquiring minds who are dissatisfied with the current reigning creed.
