**Games, Changes, and Fears: The Philippines from Duterte to Marcos Jr.** Aries Arugay, Jean Encinas-Franco, 2024-05-03 Rodrigo Duterte's rise and the Marcoses' return to power have captivated Southeast Asia watchers and the rest of the world. That the spectacle of strongman rule has allured most Filipinos is no longer in doubt, with the strong electoral mandate garnered by Ferdinand Marcos Jr. in 2022. Whether their capture of state power is in any way connected and what this portends about the country's democratic future is a key theme marking *Games, Changes, and Fears*. In this volume, Filipino academics and practitioners provide much needed analysis about this political succession and what it means for Asia's oldest republic. Packed with thirteen chapters depicting insightful trends and prognosis on the Philippine economy, domestic politics, foreign policy, and society, this volume offers scholars, students, and policymakers with the analytical repertoire to understand developments in the Philippines. Overall, the chapters suggest that while some policies and practices continue under the Marcos Jr. administration, there have been pivotal changes indicating a break from the past. The chapters offer key policy recommendations critical in recalibrating Philippine political, economic, and social conditions that could address democratic backsliding, economic challenges, and societal polarization. This carefully curated volume offers a judicious assessment of the political legacy of Rodrigo Duterte in key policy areas and the continuities and changes marking the transition to the Ferdinand Marcos, Jr. administration. *Games, Changes, and Fears* lays out a number of important insights—the formation of dynastic cartels, erosion of democratic values and civil liberties, securitization of governance, politicization of the information ecosystem, emergence of new political actors, and politics of fear, violence, and misogyny—that deepen our understanding of Philippine politics and society while providing portents of, and object lessons in, the struggle for substantive democracy in neighbouring Southeast Asian countries and the world. -- Caroline S. Hau, Professor, Center for Southeast Asian Studies, Kyoto University In the wake of Rodrigo Duterte's populist rule, the Philippines stands at a critical juncture, grappling with the aftermath of profound political and policy changes. As the nation enters a new era under Marcos Jr.'s presidency, questions loom large over the future of democracy and governance. This edited volume offers a multifaceted analysis of Duterte's legacy, providing essential insights into the trajectory of Philippine politics and society. -- Yuko Kasuya, Professor, Faculty of Law, Keio University This is a superb survey of Philippine politics during the Rodrigo Duterte administration and the early years of the Bongbong Marcos presidency. Written by Filipino

scholars based in Philippine universities and research institutions, this unique compilation of essays provides a keen and grounded analysis of political developments in the country. In doing so, this volume showcases the strength and value of Filipino scholarship on Philippine politics. It is essential reading for anyone who wants to understand the impact and legacy of the Duterte years. -- Erik Martinez Kuhonta, Associate Professor, McGill University

The Future of Philippine Agriculture under a Changing Climate Mark W. Rosegrant, Mercedita A. Sombilla, 2018-11-30  
The Philippine economy has grown rapidly since 2010, but despite this growth, poverty and inequality remain high. Two-thirds of the poor live in rural areas, and the weak performance of the agriculture sector has contributed to the slow improvement in livelihoods. The challenge for agriculture will further increase, with climate change posing a growing threat to the sector. But agricultural transformation to spur sustained growth and reduce poverty is still possible under climate change with aggressive institutional reforms and implementation of the right mix of policies and programmes. The identification of the suitable policy and programme combination requires an accurate assessment of the key drivers of agricultural growth and food security; the impacts of climate change on agriculture and the overall economy; and the effectiveness of policies for adaptation and growth. This book addresses these big issues, focusing on enhancing the adaptation capacity of the Philippine agriculture sector. It is designed to provide a much-needed base of knowledge and menu of policy options to support decision- and policymaking on agriculture, climate change, and food security. The volume uses newly generated data, modelling outputs, and innovative analyses to provide a scientific basis for a variety of adaptation measures under different sets of climate change scenarios to guide decision-makers in strategic planning and policy formulation. "As we have actually experienced in Leyte, an island province in the Visayas where Super Typhoon Yolanda (Haiyan) struck, disasters caused by natural hazards could completely negate economic gains, devastate families and shatter dreams. Our greatest challenge is to make ourselves better prepared for and be more resilient to such disasters. Natural hazards need not always lead to loss of so many lives and properties. This book shows us ways and provides tools to draw up climate change and socioeconomic scenarios at the regional and provincial levels, allowing us to identify strategies for mitigating climate change risks." — Ernesto M. Pernia, Secretary of Socioeconomic Planning, National Economic and Development Authority, Philippines "This book by top Philippine researchers combines state-of-the-art biophysical and economic modeling of climate impacts and adaptation policies with in-depth synthesis of agriculture, natural resources, climate trends, and policies. It provides a comprehensive assessment of climate change impacts on agriculture and the broader economy to provide important insights for Philippine policymakers." — Dr Cynthia Rosenzweig, Head, Climate Impacts Group, NASA Goddard Institute for Space Studies and Co-Founder of the Agricultural Model Inter-comparison and Improvement Project (AgMIP)

*The Philippines* Steven Rood, 2019-09-10 Since the colonization of the Philippines by Spain in the sixteenth century, the

island archipelago has been at the center of global trade flows. And from its status as the main base of Spain's Pacific galleon trade to its conquest centuries later by late-arriving imperial powers like the United States and Japan, it has been a focal point of economic and military rivalry too. Decolonized in 1946, this enormously diverse country is ruled today by a classic modern authoritarian, Rodrigo Duterte, and is embroiled in a series of as-of-yet minor disputes with the East Asia region's rising superpower, China. As it has globalized, its population has migrated across the world too, and Filipino now comprise the second-largest population of Asian-Americans in the United States. In *The Philippines: What Everyone Needs to Know®*, Steven Rood draws from more than 30 years of residence in and study of the Philippines in order to provide a concise overview of the nation. Arranged in a question-and-answer format, this guide shares concise, nuanced analysis and helps readers find exactly what they seek to learn about Filipino geography and geology, history, culture, economy, politics through the ages, and prospects for the future. This book is an ideal primer on an enormously diverse country that has been and will likely remain a key site in world affairs.

**Climate Change Strategies: Handling the Challenges of Adapting to a Changing Climate** Walter Leal Filho, Marina Kovaleva, Fátima Alves, Ismaila Rimi Abubakar, 2023-06-01 This book includes information, experiences, practical initiatives and projects around the subject matter and makes it available to a wide audience. It addresses the scientific, social, political and cultural aspects of climate change impacts and respective solutions in an integrated and coherent way. Climate change as a global phenomenon imposes new challenges for survival. Extreme weather events including heat waves, storms, droughts as well as rising sea levels, warming oceans and melting glaciers threaten people's livelihoods and communities, ecosystems and habitats. Furthermore, it affects the entire food chain and increases competition for natural resources fuelling socioeconomic tensions. The results of the latest IPCC report highlight the urgent need for combating climate change. The adaptation measures to be undertaken range across sectors, thematic fields and geographical locations. Based on this need, the book focuses on the high-quality, interdisciplinary contributions on the scientific, social, economic, political and cultural aspects of climate change challenges and solutions

*Disaster Management and Human Health Risk* Kirsty Duncan, C. A. Brebbia, 2009 Today the world faces unparalleled threats from human-made disasters that can be attributed to failure of industrial and energy installation as well as to terrorism. Added to this is the unparalleled threat of emerging and re-emerging diseases, with scientists predicting events such as an influenza pandemic.

**OFDA Annual Report** United States. Agency for International Development. Office of U.S. Foreign Disaster Assistance, **Natural Hazards and Peoples in the Indian Ocean World** Greg Bankoff, Joseph Christensen, 2016-07-09 This book examines the dangers and the patterns of adaptation that emerge through exposure to risk on a daily basis. By addressing the influence of environmental factors in Indian Ocean World history, the collection reaches across the boundaries of the

natural and social sciences, presenting case-studies that deal with a diverse range of natural hazards – fire in Madagascar, drought in India, cyclones and typhoons in Oman, Australia and the Philippines, climatic variability, storms and flood in Vietnam and the Philippines, and volcanic eruptions, earthquakes and tsunamis in Indonesia. These chapters, written by leading international historians, respond to a growing need to understand the ways in which natural hazards shape social, economic and political development of the Indian Ocean World, a region of the globe that is highly susceptible to the impacts of seismic activity, extreme weather, and climate change.

*Disasters in the Philippines* Glenda Tibe Bonifacio, Roxanna Balbido Epe, 2023-04-28 Bringing together the voices of local scholars in the Philippines, this book offers critical insights into one of the world's most disaster-prone regions. The Asia-Pacific region is one of the most vulnerable regions in the world, with the effects of climate change contributing to rising sea levels and increasingly frequent typhoons and floods. Case studies in this book examine such disasters, including the aftermath of 2013 super typhoon Haiyan. Discussions are centered around four themes: women and empowerment, economics and recovery, community and resilience, and religion and spirituality. Through its analysis, the book demonstrates the scopes, inequities, and inefficiencies of policies and responses, as well as forms of empowerment and resilience, in meeting challenges in disaster-afflicted communities in the Philippines. Its conclusions provide a more nuanced and grounded perspective of policies, practices, and approaches in the sociology of disasters today.

**The Philippine Archipelago** Yves Boquet, 2017-04-19 This book presents an updated view of the Philippines, focusing on thematic issues rather than a description region by region. Topics include typhoons, population growth, economic difficulties, agrarian reform, migration as an economic strategy, the growth of Manila, the Muslim question in Mindanao, the South China Sea tensions with China and the challenges of risk, vulnerability and sustainable development.

**The Microseismic Program of the U.S. Navy** U.S. Coast and Geodetic Survey, Dean S. Carder, Robert A. Eppley, 1959

**Disaster Management** Alejandro Lopez-Carresi, Maureen Fordham, Ben Wisner, Ilan Kelman, Jc Gaillard, 2013-11-12 There is a perennial gap between theory and practice, between academia and active professionals in the field of disaster management. This gap means that valuable lessons are not learned and people die or suffer as a result. This book opens a dialogue between theory and practice. It offers vital lessons to practitioners from scholarship on natural hazards, disaster risk management and reduction and developments studies, opening up new insights in accessible language with practical applications. It also offers to academics the insights of the enormous experience practitioners have accumulated, highlighting gaps in research and challenging assumptions and theories against the reality of experience. Disaster Management covers issues in all phases of the disaster cycle: preparedness, prevention, response and recovery. It also addresses cross-cutting issues including political, economic and social factors that influence differential vulnerability, and key areas of practice such as vulnerability mapping, early warning, infrastructure protection, emergency management, reconstruction, health care and

education, and gender issues. The team of international authors combine their years of experience in research and the field to offer vital lessons for practitioners, academics and students alike.

*World Disasters Report* International Federation of Red Cross and Red Crescent Staff CP,1993-04-29 Disaster response has been described as the last resort of the amateur: an unkind assessment but not without a grain of truth. Disaster generates an emotional response, and new disaster organisations are born with each new disaster. Lessons of the past on disaster management have to be learned anew. The need to increase the professionalism of disaster response is evident. All the more so as, in disaster terms, the world is getting worse, not better. Disasters become more complex, frequently involving the interaction of a disaster event, politics and technology. The last few years have also seen a growth in research into the area of disaster response. Too often, however, disaster researchers and disaster organisations have gone their separate ways. There is a need for these two groups to get together to devise more practical and professional approaches to disaster response. The World Disasters Report, produced by the International Federation of Red Cross and Red Crescent Societies with the Centre for Research on the Epidemiology of Disasters, is a contribution to this effort of professionalisation. It provides facts and statistics, analysis and an exploration of trends, to dispel a number of myths about disasters and to define and advocate good practice. This is the first volume of Annual Reports which will become a vital tool for all those involved in the area of disaster response.

### **Contemporary legal issues in the southeast asian region** Steve Ngo,Jose I. dela Rama, Jr.,Yanti

Fristikawati,Ratnaria Wahid,Nik Muhammad Syaamil Nik Ismail,Kenny Manurung,Mary Kimberlie C. See,Natalia Yeti Puspita,Garry Gumelar Pratama,Agustinus Supriyanto,V. Selvie Sinaga (Editor),2022-11-17 Southeast Asia is sub-region of Asia that consists of 11 countries that spread out from the eastern China to India and are so rich in religion, culture, and history diversities. Ten of the 11 countries are members of the Association of Southeast Asian Nations (ASEAN). In terms of economy, most of them are within the World Bank classification of lower-middle income economies. Although classified as the lower-middle income economies, Southeast Asian countries have been praised as having buoyant economies, healthy

investment, and growing trade ties. These economic potentials are in conjunction with the dynamic political sphere in the Southeast Asian countries. Recent increasing confrontation between China and the U.S. have also created the geopolitical uncertainty which threatens the economic growth in the region. All these economic and political events in the region are closely related to international law since they are dealt with legal entities beyond their own jurisdiction. This book would discuss various contemporary issues of international law that occurred in or related to countries located in the Southeast Asian region. There are 9 articles in this book. The articles would exhibit the relationship of international law and national law
