Quotes from a Wise Fool William Frasca,2024-01-17 During my life, seldom did I accept things at face value, so I was always trying to understand why myself and others did the things we did. For the happy and enjoyable days of my life, that were few and far between. I didn't find the need to expand the search for what caused those events to transpire; on the days where I was challenged and found myself in over my head yet again, I dug deeper to help me find out why I acted poorly or why my choices were not the most popular ones in the history of the world. The early part of my life left quite a bit to be desired and along with a poor beginning came many poor choices that made me unpopular, but they did create excitement for the viewing audience. Struggling to fit in and being misunderstood are kind of my thing, and those decisions that made others view me as hostile and sometimes unwanted were captured in a series of private thoughts that were both put to paper and others that needed no documentation because they ran on a constant loop through my cavernous mind and gave me a constant reminder of how unpopular one man can become with hardly any effort. How complete my examination on my past is not for me to decide. I will leave that to the reader, but I can 100 percent guarantee that this information is factual and, at times, for me, more than a little heartbreaking. This is not an attempt for sympathy, that dream was crushed in my first few years of life, waiting for a kind word or a much-needed hug as a child were things I saw in movies but not in my home. I hope that I have made my vision of these times interesting enough so that you have enjoyed the experience of reading this book enough for it to be worthy of your time. Each of these ideas of mine are shared as quotes and explained in very plain terms, and on occasion, the pain of spending a lifetime of being judged harshly by those who have helped craft this person who has fallen from grace.

Euripides and Quotation Culture Matthew Wright, 2024-07-11 Presenting a new approach to Euripides' plays, this book explores the playwright's ancient tragedies in relation to quotation culture. Treating extant works and lost works side-by-side, Matthew Wright presents a selective survey of ways in which Euripidean tragedy was quoted within antiquity, both in social contexts (on the comic stage, at symposia, in law courts, in education) and in different literary genres (drama, biography, oratory, philosophy, literary scholarship, history and anthologies). There is also a discussion of the connection between quotability and classic status, where Wright asks what quotations can tell us about ancient reading habits. The implication is that Euripides actively participated in quotation culture by deliberately making certain portions of his plays stand out as especially quotable. Within classical antiquity, Euripides was the most widely quoted author apart from Homer. His plays are full of 'quotable quotes', which were repeated so often that they acquired a life of their own. Hundreds of famous verses from Euripidean drama circulated widely within the ancient world, even after the plays in which they originally featured became forgotten or vanished completely. Indeed, the majority of Euripides' tragedies now survive only in the form of scattered quotations, otherwise known to us as 'fragments'. It is this corpus of fragmentary quotations, along with his extant plays, that makes Euripides such an interesting case study in the world of quotation culture. This book is the first of its kind to understand Euripides' work through this lens, as well as opening up quotation culture as a major theme of interest within classical scholarship.

O'Leary, 2020-05-18 *Lessons for Non-Profit and Start-Up Leaders: Tales from a Reluctant CEO* uses the experiences of a real company, Community Connections, to bring to life the practical dilemmas that an organization founded on a mission and guided by a set of ideals must confront and solve if it is to thrive. With no business or financial background, Maxine Harris and her partner Helen Bergman grew a tiny startup into a \$35 million business. Through trial and error, they learned how to manage finances, hire staff, overcome barriers, and adapt to changing business models. In *Lessons for Non-Profit and Start-Up Leaders*, Harris shares her insights, struggles, and mistakes with the goal of helping others who may be starting and running non-profit organizations. She spells out the ways in which creativity, tenacity, and the power of relationships helped her and her partner overcome barriers that often cause start-ups to flounder in their first years of operation. Centering Humanism in STEM Education Bryan Dewsbury, Susannah McGowan, Sheila S. Jaswal, Desiree Forsythe, 2024-09-24 Research demonstrates that STEM disciplines perpetuate a history of exclusion, particularly for students with marginalized identities. This poses problems particularly when science permeates every aspect of contemporary American life. Institutions' repeated failures to disrupt systemic oppression in STEM has led to a mostly white, cisgender, and male scientific workforce replete with implicit and/or explicit biases. Education holds one pathway to disrupt

systemic linkages of STEM oppression from society to the classroom. Maintaining views on science as inherently objective isolates it from the world in which it is performed. STEM education must move beyond the transactional approaches to transformative environments manifesting respect for students' social and educational capital. We must create a STEM environment in which students with marginalized identities feel respected, listened to, and valued. We must assist students in understanding how their positionality, privilege, and power both historically and currently impacts their meaning making and understanding of STEM.

International Handbook of Education for Spirituality, Care and Wellbeing Marian de Souza, LESLIE J. FRANCIS, James O'Higgins-Norman, Daniel G. Scott, 2009-10-13 Acknowledging and understanding spiritual formation is vital in contemporary education. This book explores the dynamic relationship between education and wellbeing. It examines the theory underpinning the practice of education in different societies where spirituality and care are believed to be at the heart of all educational experiences. The book recognizes that, regardless of the context or type of educational experience, education is a caring activity in which the development of the whole person - body, mind and spirit - is a central aim for teachers and educators in both formal and informal learning. The chapters in this handbook present and discuss topics that focus on spirituality as an integral part of human experience and, consequently, essential to educational programs which aim to address personal and communal identity, foster resilience, empathy and compassion, and promote meaning and connectedness.

Non-Invasive Data Governance Robert S. Seiner, 2014-09-01 Data-governance programs focus on authority and accountability for the management of data as a valued organizational asset. Data Governance should not be about command-and-control, yet at times could become invasive or threatening to the work, people and culture of an organization. Non-Invasive Data Governance™ focuses on formalizing existing accountability for the management of data and improving formal communications, protection, and quality efforts through effective stewarding of data resources. Non-Invasive Data Governance will provide you with a complete set of tools to help you deliver a successful data governance program. Learn how:

- Steward responsibilities can be identified and recognized, formalized, and engaged according to their existing responsibility rather than being assigned or handed to people as more work.
- Governance of information can be applied to existing policies, standard operating procedures, practices, and methodologies, rather than being introduced or emphasized as new processes or methods.
- Governance of information can support all data integration, risk management, business intelligence and master data management activities rather than imposing inconsistent rigor to these initiatives.
- A practical and non-threatening approach can be applied to governing information and promoting stewardship of data as a cross-organization asset.
- Best practices and key concepts of this non-threatening approach can be communicated effectively to leverage strengths and address opportunities to improve.
