Elizabeth Tasha Alexander, 2024-03-19 Queen Elizabeth I defends her throne, her empire, and her life in this saga of love and war by the New York Times–bestselling historical novelist. The reign of Queen Elizabeth I was a time of war, passion, and spectacular achievement. Elizabeth: The Golden Age finds Elizabeth facing bloodlust for her throne and familial betrayal. Growing keenly aware of the changing religious and political tides of late sixteenth-century Europe, Elizabeth faces an open challenge from the Spanish King Philip II, who is determined to restore England to Catholicism with his powerful army and dominating armada. Preparing to go to war to defend her empire, Elizabeth struggles to balance ancient royal duties with an unexpected vulnerability: her love for the seafarer Sir Walter Raleigh. But he remains forbidden for a queen who has sworn body and soul to her country. Yet as she charts her course abroad, treachery is the rot behind the glittering royal throne. Her most trusted adviser uncovers an assassination plot that could topple the throne, and the traitors may even include Elizabeth's own cousin Mary Stuart. Based on the sequel to the Academy Award®-winning Elizabeth, Elizabeth: The Golden Age tells the thrilling tale of an era—the story of one woman's crusade to control love, crush enemies, and secure her position as a beloved icon of the Western world. Biography and History in Film Thomas S. Freeman, David L. Smith, 2019-10-14 The essays in this volume seek to analyze biographical films as representations of historical individuals and the times in which they lived. To do this, contributors examine the context in which certain biographical films were made, including the state of knowledge about their subjects at that moment, and what these films reveal about the values and purposes of those who created them. This is an original approach to biographical (as opposed to historical) films and one that has so far played little part in the growing literature on historical films. The films discussed here date from the 1920s to the 2010s, and deal with males and females in periods ranging from the Middle Ages to the end of the twentieth century. In the process, the book discusses how biographical films reflect changing attitudes towards issues such as race, gender and sexuality, and examines the influence of these films on popular perceptions of the past. The introduction analyses the nature of biographical films as a genre: it compares and contrasts the nature of biography on film with written biographies, and considers their relationship with the discipline of history. As the first collection of essays on this popular but understudied genre, this book will be of interest to historians as well as those in film and cultural studies.

Representing Royalty Julia Kinzler, 2018-07-27 Since the early days of cinema, filmmakers have been intrigued by the lives and loves of British monarchs. The most recent productions by ITV and Netflix show that the fascination with British royalty continues unabated both in Britain and around the world. This book examines strategies of representing power and the staging of myths of power in seven popular films about British monarchs that were made after the mid-1990s revival of the “royal biopic” genre. By combining approaches from cultural studies with concepts and theories from the humanities, such as film studies and art history, it offers a comprehensive understanding of the cinematic portraits of royalty. In addition, the volume opens up new perspectives on how meaning is generated in films about the monarchy and on the connections between the biographical narratives. The introductory chapter to the case studies reviews the different academic positions on representations of royalty, provides a toolkit for studying the subject and demonstrates ways to approach the films. The book addresses questions of historical context and goes beyond a mere exploration of historical accuracy to reveal the films’ underlying ideological aims. As such, it makes a distinctive new contribution to the growing body of interdisciplinary work on the British monarchy in general and its cinematic representations in particular. It is the first monograph about representational mechanisms of royal identities and British past(s) in royal films such as *Elizabeth*, *The Queen* and *The King’s Speech*.

Adaptation, Intermediality and the British Celebrity Biopic Márta Minier, Maddalena Pennacchia, 2016-03-23 Beginning with the premise that the biopic is a form of adaptation and an example of intermediality, this collection examines the

multiplicity of 'source texts' and the convergence of different media in this genre, alongside the concurrent issues of fidelity and authenticity that accompany this form. The contributors focus on big and small screen biopics of British celebrities from the late twentieth and twenty-first centuries, attending to their myth-making and myth-breaking potential. Related topics are the contemporary British biopic's participation in the production and consumption of celebrated lives, and the biopic's generic fluidity and hybridity as evidenced in its relationship to such forms as the bio-docudrama. Offering case studies of film biographies of literary and cultural icons, including Elizabeth I, Elizabeth II, Diana Princess of Wales, John Lennon, Shakespeare, Jane Austen, Beau Brummel, Carrington and Beatrix Potter, the essays address how British identity and heritage are interrogated in the (re)telling and showing of these lives, and how the reimagining of famous lives for the screen is influenced by recent processes of manufacturing celebrity.

Women during the English Reformations K. Kramer, Julie Chappell, 2014-11-19 Catholic or Protestant, recusant or godly rebel, early modern women reinvented their spiritual and gendered spaces during the reformations in religion in England during the sixteenth century and beyond. These essays explore the ways in which some Englishwomen struggled to erase, rewrite, or reimagine their religious and gender identities.
