Confluence of Policy and Leadership in Academic Health Science Centers Steven A. Wartman, 2022-02-22

Academic Health Science Centers are complex organizations with three principal functions: the education of the next generation of health professionals; the conduct of biomedical and clinical research that leads to new treatments and approaches to disease; and the delivery of comprehensive and advanced patient care. This is the first comprehensive book that describes in detail the knowledge and skill base necessary to successfully lead these complex organizations. Written by the world's leading authorities it combines the science of leadership, organizational structure, financial and personnel management, public relations and communications, trainee and student policy, community relations, and globalization. This volume focuses on policy considerations that provide the foundation for AHSCs to thrive. While the legislation, challenges, and strategies will change over time, the need for strong policy to influence and guide organizational and individual behavior will not. AHSCs are complex organizations that must continue to evolve to face the multifactorial nature of health care problems. How they do so will depend to a great extent not only on having appropriate policies in place but also on their success in translating these policies into effective implementation. Andrew M. Ibrahim and M. Roy Wilson, in the Foreword

The Midwest Thomson Gale,Thomson Gale Staff,2005-11 In four volumes, this reference book brings together a wide range of hard-to-locate data to answer questions concerning American cities. Each volume focuses on a different geographic region: South, West, Midwest and Northeast. Within each volume, you'll find thorough coverage of the area's largest or fastest-growing cities, or those with a particular historical, political, industrial or commercial significance.

Handbook on Well-Being of Working Women Mary L. Connerley,Jiyun Wu,2015-07-27 This handbook provides an overview and synthesis of relevant literature related to the issue of the well-being of working women. This focus addresses a gap that currently exists in the quality-of-life and well-being fields. The work of the authors answers the following broad questions: Does gender matter in the well-being of working women? Do prejudices against and stereotypes of women still play a role in inter-personal interactions in the workplace that could hinder women from flourishing professionally? Does the

organizational context, such as organizational culture, reward systems, and leadership, contribute to the well-being of working-women? What impact does the national context have on the well-being of working women? And finally, how can public policies help enhance the well-being of working women? These are important issues for academics, researchers, and graduate students interested in gender issues in the fields of management, sociology, psychology, social psychology, economics, and quality of life studies. Policy makers and practitioners will also find this book beneficial. Equitable treatment and outcomes for all, regardless of gender, remains a challenging goal to achieve, with various barriers in different contexts and different cultures, and this book provides strong coverage of this important topic of well-being of working women.
