

Crculo De Lingstica Aplicada A La Comunicacin

Silvia Luraghi, Tatiana Nikitina, Chiara Zanchi

Manual de lingüística del hablar Óscar Loureda, Angela Schrott, 2021-01-18 The Manual presents the state of the art of the research about discourse and communication within the Romance languages. It offers introductory articles which explain in a simple and clear way the current research topics of a broad variety of disciplines like Linguistics, Pragmatics, Discourse Analysis, Communication Theory, Text Linguistics and Philology. The authors of the Manual collectively explain complex theoretical problems concerning communication and discourse, and texts as its products. The contrastive descriptions contain examples in different Romance languages which show the outreach of the theoretical approaches and address a public with interests in a variety of disciplines and languages. Furthermore, it shows possibilities of application and transfer of the research about communication in different professional contexts.

Explorando las relaciones intradiscursivas Catalina Fuentes Rodríguez, Víctor Pérez Béjar, 2024-11-29 Explorando las relaciones intradiscursivas: Un enfoque multidimensional takes a multifaceted approach to provide a complete and integrative analysis of intra-discursive relationships. This edited collection approaches intra-discursive relationships from different discursive dimensions (such as informative, argumentative, or modal) which influence the construction of the text to identify common and functional relationships to any type of discourse. Covering a wide range of topics from multiple perspectives, the volume arrives at a global, multidimensional, and integrated vision that allows the study of relationships to be defined without apriorism or exclusions. Drawing on real texts from various corpora of Spanish, the contributions explore the connections between the basic units of the text in order to construct a linguistic model that goes beyond the sentence level. This research offers both general and focused studies on specific phenomena of great interest within a well-constructed and comprehensive framework. This innovative volume is ideal for researchers and teachers of discourse analysis, linguistics, and Spanish as a foreign language. Additionally, Explorando las relaciones intradiscursivas complements undergraduate and graduate studies in pragmatics and linguistics. -----

----- Explorando las relaciones intradiscursivas: Un enfoque multidimensional adopta un enfoque poliédrico para ofrecer un análisis completo e integrador de las relaciones intradiscursivas. Los diferentes trabajos que componen esta obra abordan las relaciones intradiscursivas desde diferentes dimensiones discursivas (como la informativa, la argumentativa o la modal) que influyen en la construcción del texto para identificar las relaciones entre enunciados que

subyacen a todo tipo de discursos. La obra abarca un amplio abanico de temas y permite el diálogo de diferentes modelos de análisis. Se ofrece así una visión global, multidimensional e integrada que permite definir el estudio de las relaciones sin apriorismos ni exclusiones. A partir de textos reales procedentes de diversos corpus del español, las contribuciones exploran las conexiones entre las unidades básicas del texto, los enunciados, con el fin de construir un modelo lingüístico que vaya más allá del nivel oracional. Estas investigaciones ofrecen estudios tanto generales como centrados en fenómenos específicos de gran interés dentro de un marco bien construido y exhaustivo. Este innovador trabajo es fundamental para investigadores y profesores de análisis del discurso, lingüística y español como lengua extranjera. Además, complementa los estudios de grado y posgrado en pragmática y lingüística.

Dialog Systems Teresa Lopez-Soto, 2021-03-10 This book focuses on dialog from a varied combination of fields: Linguistics, Philosophy of Language and Computation. It builds on the hypothesis that meaning in human communication arises at the discourse level rather than at the word level. The book offers a complex analytical framework and integration of the central areas of research around human communication. The content revolves around meaning but it also gives evidence of the connection among different points of view. Besides discussing issues of general interest to the field, the book triggers theoretical argumentation that is currently under scientific discussion. It examines such topics as immanent reasoning joined with Recanati's *lekta* and free enrichment, challenges of internet conversation, inner dialogs, cognition and language, and the relation between assertion and denial. It proposes a dialogical framework for intra-negotiation and gives a geolinguistic perspective on spoken discourse. Finally, it examines dialog and abduction and sheds light on a generation of dialog contexts by means of multimodal logic applied to speech acts.

Grammaticalization and Pragmatics: Facts, Approaches, Theoretical Issues Corinne Rossari, Claudia Ricci, Adriana Spiridon, 2012-11-02 The studies collected in this volume deal with pragmatic factors involved in the evolution of grammatical or lexical forms or in the emergence of complex syntactic structures in various languages (Dutch, French, Italian, Portuguese, Romanian, Serbian and Spanish). They are set against the theoretical framework of grammaticalization. The main methodological tools are cross-linguistic contrastive analysis and diachronic perspective. The two main issues that emerge from these studies are the place of pragmatic factors in language change (input, output or setting/frame of the process) and the existence or otherwise of a prevailing mechanism for explaining change phenomena.

The Functional Perspective on Language and Discourse María de los Ángeles Gómez González, Francisco José Ruiz de Mendoza Ibáñez, Francisco González García, Angela Downing, 2014-05-15 Over the last forty years, the functionalist approach to linguistic description and explanation has given rise to several major schools of thought that share two crucial assumptions: (i) form is not independent of meaning/function or language use; and (ii) linguistic description and explanation need to take into account the communicative function of language. This volume offers readers interested in functional

linguistics a selected sample of studies that jointly prove the efficacy of the analytical tools and procedures broadly accepted within the functionalist tradition in order to investigate language and discourse, with special focus on key pragmatic/discourse notions such as contextualization, grammaticalisation, reference, politeness, (in-)directness, discourse markers, speech acts, subjective evaluation and sentiment analysis in texts, among others. In addition, this volume offers specific corpus-based techniques for the objective contextualisation of linguistic data, which is crucial given the central role allotted to context in both functional linguistics and pragmatics/discourse analysis.

Profiling Discourse Participants Barbara De Cock, 2014-08-15 The construction of discourse is a challenging field where many discourse structures and interactional effects remain poorly understood. This analysis provides a systematic explanation for the way in which discourse participants (speaker and hearer) are construed in Spanish through a corpus-driven analysis of informal conversation, TV-debates and parliamentary debates. It deals not only with person deixis, but with the full range of possibilities speakers choose from when profiling their self or their relationship with the interlocutor. This analysis also offers new insights into the operationalization of the concepts of subjectivity and intersubjectivity as tools for the analysis of person reference and genre comparison. The comparative and corpus-driven approach offers methodological tools for genre analysis that can be transposed to other languages and/or genres. The detailed description of three socially highly relevant discourse types from a cognitive-functional perspective makes this book a useful resource not only for pragmatists but also for researchers in political and media discourse.

Definiteness Effects Susann Fischer, Tanja Kupisch, Esther Rinke, 2016-08-17 This volume explores in detail the empirical and conceptual content of the definiteness effect in grammar. It brings together a variety of relevant observations from a typological, diachronic and a bilingual/second language acquisition perspective, and provides a general overview of different approaches concerned with the syntactic, morphological, semantic, and pragmatic properties of the Definiteness Effect in a series of European and non-European languages.

Sex in Language Eliecer Crespo-Fernández, 2015-08-27 Metaphor has long provided a rich way to speak about the unspeakable, to refer to delicate issues. Sex is one such area. This book follows a cognitive-linguistic and relevance-theoretic approach to the language of sex, considering metaphor as a bridge that brings together mind and language. It does this through the analysis of the antithetical mechanisms of verbal mitigation and offence. These two mechanisms are (more commonly known as) euphemism and (its lesser known companion term) dysphemism. The volume reflects on the social and communicative functions that sexual metaphors perform in a sample of almost two hundred postings taken from internet forums. How do people think about sex? How do people avoid talking about sex? How do people paraphrase sexual topics? It offers an account of how real language users understand sexual taboo in present-day English and also a great grounding in manual corpus work on a qualitative level.

The Routledge Handbook of Language and Culture Farzad Sharifian, 2014-12-17 The Routledge Handbook of Language and Culture presents the first comprehensive survey of research on the relationship between language and culture. It provides readers with a clear and accessible introduction to both interdisciplinary and multidisciplinary studies of language and culture, and addresses key issues of language and culturally based linguistic research from a variety of perspectives and theoretical frameworks. This Handbook features thirty-three newly commissioned chapters which cover key areas such as cognitive psychology, cognitive linguistics, cognitive anthropology, linguistic anthropology, cultural anthropology, and sociolinguistics offer insights into the historical development, contemporary theory, research, and practice of each topic, and explore the potential future directions of the field show readers how language and culture research can be of practical benefit to applied areas of research and practice, such as intercultural communication and second language teaching and learning. Written by a group of prominent scholars from around the globe, The Routledge Handbook of Language and Culture provides a vital resource for scholars and students working in this area.

Language Change in the 20th Century Salvador Pons Bordería, Shima Salameh Jiménez, 2024-01-15 Language Change in the 20th Century: Exploring micro-diachronic evolutions in Romance languages examines the distinctive features that set the study of the 20th century apart from preceding periods. With a primary focus on Romance languages, including Spanish, Italian, French, and Portuguese, the book advocates for the adoption of innovative methodologies to enhance the nuanced retrieval of research data: the use of speaker's attitudes questionnaires, apparent time constructions, and S-curves. Additionally, new materials are addressed as diachronic data sources: mass-media recordings from radio and TV, colloquial conversations, and sociolinguistic corpora. Results focus on the evolution of discourse markers, address terms, as well as on the influence of specific processes such as colloquialization or external mechanisms on the language changes developed during this period. In sum, the 20th century is presented in this book as a new strand in diachronic studies, rather than another time span.

A Gender-based Approach to Parliamentary Discourse Catalina Fuentes Rodríguez, Gloria Álvarez-Benito, 2016-12-01 Does gender condition politicians' discourse strategies in parliament? This is the question we try to answer in A Gender-based Approach to Parliamentary Discourse: The Andalusian Parliament. This book, written by experts in the field of discourse analysis, covers key aspects of political discourse such as gender, identity and verbal and nonverbal strategies: intensification, enumerative series, non-literal quotations, pseudo-desemantisation, lexical colloquialisation, emotion, eye contact and time management. It provides a large number of examples from a balanced gender parliament, the Andalusian Parliament, and it focuses mainly on argumentation, since parliamentary discourse is above all argumentative. This book will prove invaluable to students and teachers in the field of discourse analysis, and more specifically of political discourse, and will also be very useful to politicians and anyone interested in communication strategies. As of January 2019, this e-book is

freely available, thanks to the support of libraries working with Knowledge Unlatched.

Training Readers and Writers for a Multimodal and Multimedia Society: Cognitive Aspects Ester Trigo-Ibanez, Inmaculada Clotilde Santos Diaz, Marcela Jarpa, 2024-02-07 Contemporary societies have been advancing gradually towards the construction of a model of a literate population. Significant efforts have been made so that most citizens can access various sources today, using their reading and writing abilities, but are we really prepared to face the information age? Is information literacy being promoted from schools? Are individual capabilities being considered? Do we have a true critical literacy? This article collection aims to show an overview of the most recent research; ranging from the individual to the collective, from the subject's competencies and their beliefs, to the way to develop them from school. There is room in this Research Topic for investigations belonging to the linguistic, psychological, and didactic field. This Research Topic aims to address a pressing problem in contemporary world societies. It is proposed to offer various contributions related to critical literacy, in general, and reading and writing. In this sense, research that addresses analog and digital reading, writing processes, academic literacy, and the use of resources such as non-fiction illustrated books to develop critical thinking, will be welcome. But also, and in a very important way, the cognitive processes of the subject will be considered, not only to deal with access to information, but also in the construction of their mental lexicon, an issue that offers the vision of the world of those who are immersed in literacy and in the post-truth era.

Dinámicas lingüísticas de las situaciones de contacto Azucena Palacios, María Sanchez Paraíso, 2021-07-19 The volume offers in-depth analyses of contact situations between Spanish and other languages, showing how language variation and change are part of the complex linguistic dynamics that characterize contact areas. Aimed at contact linguistics experts, it gathers theoretical frameworks as well as case studies about these processes, both in diachronic and synchronic perspectives.

La presente obra profundiza en el valor de la publicidad y su importancia contemporánea, desde

una perspectiva holística y con el objetivo de querer ser una publicación didáctica y de reflexión.

Manual del español en América Eva Martha Eckkrammer, 2021-11-08 This handbook, designed both as an introduction for students and a reference work for the entire research community, gives a concise, systematic and extensive overview of the different topics and approaches associated with linguistic research on American Spanish.

Space in Diachrony Silvia Luraghi, Tatiana Nikitina, Chiara Zanchi, 2017-08-14 Space is a fundamental dimension of human life and is pervasive in human experience. Research on space has highlighted the possible asymmetrical nature of spatial relations. Differences in the encoding of goals and sources of motion are a case in point, and cross-linguistic coding tendencies show that path is less frequently flagged by a dedicated case than goal, source/origin, and (static) location (locative). Interestingly, such asymmetries may correlate with certain types of landmark, as in the case of toponyms or of animate entities. Even though these issues have been focused upon both in typological and psycholinguistic research, they remain largely open. The papers in this collection aim to show that a diachronic approach may shed light on the way in which asymmetries in the space domain come about over time, thus contributing to the clarification of synchronically puzzling facts.

Interpreting Studies at the Crossroads of Disciplines Simon Zupan, Aleksandra Nuč, 2017-07-07 Interdisciplinarity has been a defining feature of Interpreting Studies from its inception. The present volume comprises a selection of papers by authors from five different European countries; the papers explore the crossroads of various subdisciplines within Interpreting Studies and beyond. The contributions show that, while traditional approaches and combinations with other established disciplines such as sociology, law or linguistics remain common, advances in technology, in particular rapid software development, require that Interpreting Studies must also adapt to and accept a new social reality. Using examples from a range of institutional settings, the authors demonstrate what the effect of these changes has been and will be on the theory, teaching and practice of interpreting.

Directions for Pedagogical Construction Grammar Hans C. Boas, 2022-02-21 How can insights from Construction Grammar (CxG) be applied to foreign language learning (FLL) and foreign language teaching (FLT)? This volume explores several aspects of Pedagogical Construction Grammar, with a specific look at issues relevant to second language acquisition, FLL, and FLT. The contributions in this volume discuss a wide range of constructions, as well as different resources, methodologies, and data used to learn constructions in the language classroom. More specifically, they seek to provide answers to the following questions: What do new constructional approaches to teaching and learning foreign language look like that take the insights of CxG seriously? What should electronic resources using constructions and semantic frames for foreign language instruction look like? How should constructions (pairings of form with meaning/function) in the foreign language classroom be introduced? What role does frequency play in learning constructions in the language classroom? What types of strategies does CxG offer to facilitate the acquisition of a second language? This volume is relevant for anyone

interested in second language acquisition, foreign language pedagogy, Construction Grammar, and Cognitive Linguistics. Endorsements: If first language learning flows forth from language use, teaching language should be based on relevant usage-patterns, modified in accordance with the advanced cognitive and linguistic knowledge of older learners. The current volume shows how insights from first and second language learning and usage-based Construction Grammar can be turned into evidence-based teaching strategies. Heike Behrens, University of Basel Usage-based Construction Grammar has changed our view of language learning, but it is only recently that researchers have begun to apply the insights of the constructionist approach to language pedagogy. This volume brings together a collection of articles in which experts of Construction Grammar and Usage-based Linguistics make concrete proposals for teaching constructions by using corpora and other resources. A must read for everybody interested in grammar teaching. Holger Diessel, University of Jena With Directions for Pedagogical Construction Grammar, Boas has produced an impressive and much-needed volume which excels at illustrating the immense potential of constructionist approaches to improve language pedagogy. The contributions to this volume, all authored by leading cognitive and corpus linguists, convincingly describe what a successful future of language teaching could look like—one that is founded in usage-based linguistics and takes language patterns seriously. I consider this volume essential reading for any applied linguist. Ute Römer, Georgia State University

Teaching English for Tourism Michael Ennis, Gina Petrie, 2019-07-04 Teaching English for Tourism initiates a sustained academic discussion on the teaching and learning of English to tourism professionals, or to students who aspire to build a career in the tourism industry. Responding to a gap in the field, this is the first book of its kind to explore the implications of research in English for tourism (EfT) within the field of English for specific purposes. This edited volume brings together teachers and researchers of EfT from diverse national and institutional contexts, focusing on connecting current research in EfT contexts to classroom implications. It considers a wide range of themes related to the teaching of EfT, including theoretical concepts, methodological frameworks, and specific teaching methods. The book explores topics relating to the impact of changing technologies, the need for cultural understanding, and support for writing development, among others. Teaching English for Tourism explores this growing area of English for specific purposes and allows for researchers and practitioners to share their findings in an academic context. This unique book is ideal reading for researchers, post-graduate students, and professionals working in the fields of English language teaching and learning.

Manual of Deixis in Romance Languages Konstanze Jungbluth, Federica Da Milano, 2015-10-16 Deixis as a field of research has generated increased interest in recent years. It is crucial for a number of different subdisciplines: pragmatics, semantics, cognitive and contrastive linguistics, to name just a few. The subject is of particular interest to experts and students, philosophers, teachers, philologists, and psychologists interested in the study of their language or in comparing linguistic structures. The different deictic structures – not only the items themselves, but also the oppositions between them –

reflect the fact that neither the notions of space, time, person nor our use of them are identical cross-culturally. This diversity is not restricted to the difference between languages, but also appears among related dialects and language varieties. This volume will provide an overview of the field, focusing on Romance languages, but also reaching beyond this perspective. Chapters on diachronic developments (language change), comparisons with other (non-)European languages, and on interfaces with neighboring fields of interest are also included. The editors and authors hope that readers, regardless of their familiarity with Romance languages, will gain new insights into deixis in general, and into the similarities and differences among deictic structures used in the languages of the world.
