Kai Vogelsang

Die Kunst des Krieges Sun Tsu,2021-08-02 Der chinesische Klassiker über die Kunst des Krieges ist über 2500 Jahre alt und bis heute eine unerschöpfliche Inspirationsquelle für die Lösung von Konflikten. »Jene, die wissen, wann sie kämpfen sollen, werden siegen«, sagt Sun Tsu. An seinen Vorschlägen und Überlegungen können wir wachsen. Denn nur wer den anderen und sich selbst kennt, »schwebt nicht in Gefahr«. Weisheit und Menschlichkeit des Taoismus sind übertragbar auf unser Leben und Handeln für ein gewaltfreies Miteinander.

**Hitler's War** Heinz Magenheimer, 2015-09-10 This is a closely argued and wide-ranging assessment of just how, with so many alternatives open, the German High Command chose the path that led, ultimately, to its own destruction. Heinz Magenheimer examines in detail the options that were open to the Germans as the war progressed. He identifies the crucial moments at which fateful decisions needed to be made, and considers how decisions different from those actually taken could have propelled the conflict in entirely different directions. Using the very latest source material, in particular new research from Soviet Russian sources, the author analyses motives and objectives and considers the opportunities acted upon or rejected, concentrating especially on specific phases of the conflict.

**Vertical Europe** Andrea Gläuser, 2020-03-12 In den letzten zwei Jahrzehnten sind weltweit so viele Hochhäuser gebaut worden wie nie zuvor. Auch in Europa, wo lange Zeit vor allem Kirchtürme und Schornsteine vertikale Akzente setzten, prägen sie vermehrt das Gesicht der Städte. Die neuere monumentale Architektur ist mit vielfältigen Versprechen,

Begehrlichkeiten und Befürchtungen verknüpft. Am Beispiel von Paris, London und Wien diskutiert diese Studie, welche Vorstellungen von Urbanität dabei im Spiel sind. Sie verortet das vertikale Bauen im Spannungsfeld von globalisierten Vergleichshorizonten und städtischem Eigensinn. More high-rises have been built worldwide over the past two decades than ever before. Even in Europe, where vertical accents have traditionally been placed by steeples and chimneys, towering buildings are increasingly shaping the face of cities. This new monumental architecture is associated with a variety of promises, desires and fears. Based on the examples of Paris, London and Vienna, this study discusses the concepts of urbanity that come into play here. It contextualizes vertical construction in the field of tension between globalized horizons of comparison on the one hand and urban specificity on the other.

*The Seven Years' War*, 2012-11-09 In *The Seven Years' War: Global Views*, Mark H. Danley, Patrick J. Speelman, and sixteen other contributors reach beyond traditional approaches to illuminate the conflict as world war. An introduction addresses the challenges of discretely defining the war. Chapters examine theaters such as the Carnatic, Bengal, the Philippines, Portugal, Senegal, and the Caribbean. Other chapters treat understudied topics such as the Anglo-Cherokee campaigns, Sweden's participation, Ottoman neutrality, the Vatican, European perceptions of Cossacks and Kalmyks, the Enlightenment and the war, the choosing of sides in Europe and North America, social and political aspects of French and British military life, operational reconnaissance, and the war's complex ending in western Germany. A conclusion situates the war as a marker of modernity. Contributors are in order of appearance: Juergen Luh, Armstrong Starkey, Matthew C. Ward, G.J. Bryant, Johannes Burkhardt, Gunnar Aselius, Virginia H. Aksan, Julia Osman, Ewa Anklam, Mrian Fuessel, James Searing, Richard Harding, John Oliphant, Mark H. Danley, Patrick J. Speelman, Nicholas Tracy, and Matt Schumann.

The Essentials of Contract Negotiation Stefanie Jung, Peter Krebs, 2019-06-14 This book focuses on the tactics and strategies used in business-to-business contract negotiations. In addition to outlining general negotiation concepts, techniques and tools, it provides insight into relevant framework conditions, underlying mechanisms and also presents generally occurring terms and problems. Moreover, different negotiating styles are illustrated using an exemplary presentation of negotiation peculiarities in China, the USA and Germany. The presented tactics and strategies combine interdisciplinary psychological and economic knowledge as well as findings from the field of communication science. The application scope of these tactics and strategies covers business-to-business negotiations as well as company-internal negotiations. The fact that this book does not necessarily stipulate any prior knowledge of the subject of negotiations also makes it highly suitable for nonprofessionals with a pronounced interest in negotiations. Nonetheless, it provides proficient

negotiators with a deeper understanding for situations experienced in negotiations. This book also helps practitioners to identify underlying mechanisms and on this basis sustainably improve their negotiation skills.

Knowledge Management and Organisational Learning in Business Organisations and Biological Systems Ulrike C. Proesl, 2000-11-03 Inhaltsangabe:Abstract: Writers on management and organisational excellence today provide a set of prescriptions, which they argue will lead to healthy, well functioning firms. Within the management sciences there has been a growing tendency to view organisations as complex systems, that is, to describe them as organisms. Increasingly the hard sciences are being used to describe and analyse organisations. In the field of creative problem solving several systems authors have advocated the use of metaphors to describe certain aspects of organisations. In reviewing much of today's management literature we are exhorted to use benchmarks, for a variety of management tasks. In reviewing organisational excellence we are duty bound to find a measure that will be relevant tomorrow as well as today. Conjoining these current themes in management, this thesis seeks to review what we know about the effective collective functioning of selected species and to compare these natural systems with organisational systems. We posit the question: Can an understanding of the functioning of natural systems help us to understand how organisations function? If so, what can we learn about the effective functioning of organisations. Firstly we will review common management theories, with a focus on organisational learning and knowledge management. Secondly we will look at three natural organisations: Honey bees, leaf-cutter ants and the African locust. We want to find out how these organisations function, and specifically search for knowledge management and organisational learning within these biological systems. Then we will try to link management theories with our findings in natural organisations. This approach will finally deliver some interesting hypothesis about knowledge management and organisational learning - both valid for human and natural organisations. **Mathematics and War** Bernhelm Booß-Bavnbek, Jens Høyrup, 2012-12-06 Mathematics has for centuries been stimulated, financed and credited by military purposes. Some mathematical thoughts and mathematical technology have also been vital in war. During World War II mathematical work by the Anti-Hitler coalition was part of an aspiration to serve humanity and not help destroy it. At present, it is not an easy task to view the bellicose potentials of mathematics in a proper

perspective. The book presents historical evidence and recent changes in the interaction between mathematics and the military. It discusses the new mathematically enhanced development of military technology which seems to have changed the very character of modern warfare.
