Gas Transport in Glassy Polymers Maria Grazia De Angelis, Giulio C. Sarti, 2021-04-22 This Special Issue of Membranes focuses on several new aspects of fluid transport in glassy polymers, with application in relevant membrane separations such as gas purification, VOC removal and CO₂ capture. In particular, the focus lies on novel experimental techniques, and detailed characterization of specific phenomena like polar and multicomponent interactions during transport. The properties of novel materials, such as mixed matrix membranes based on glassy polymers and different selective fillers, are also presented. A critical review of existing modeling approaches to describe the sorption and transport in glassy polymers suitable for membrane separations is provided, including both macroscopic and atomistic models, and relying both on the standard solution-diffusion process and on the facilitated transport mechanism.

Story Revolutions Helga Lenart-Cheng, 2022-11-29 Social media has facilitated the sharing of once isolated testimonies to an extent and with an ease never before possible. The #MeToo movement provides a prime example of how such pooling of individual stories, in large enough numbers, can fuel political movements, fortify a sense of solidarity and community, and compel public reckoning by bringing important issues into mainstream consciousness. In this timely and important study, Helga Lenart-Cheng has uncovered the antecedents of this phenomenon and provided a historical and critical analysis of this seemingly new but in fact deeply rooted tradition. Story Revolutions features a rich variety of case studies, from eighteenth-century memoir collections to contemporary Web 2.0 databases, including memoir contests, digital story-maps, crowd-sourced Covid diaries, and AI-assisted life writing. It spans the Enlightenment, the 1930s, and the twenty-first century—three historical periods marked by a convergence of mass movements and new methods of data collection that led to a boom in activism based in the aggregation and communication of stories. Ultimately, this book offers readers a critical perspective on the concept of community itself, with incisive reflections on what it means to use storytelling to build democracy in the twenty-first century.

Graphene-Polymer Composites Fernão D. Magalhães, 2018-09-13 This book is a printed edition of the Special Issue Graphene-Polymer Composites that was published in Polymers

Chemical Engineering Principles Applied to Medicine David Bogle, Tomasz Sosnowski, 2025-10-14 Chemical Engineers are increasingly working on medical problems but so far there is no text that brings together such contributions for inspiring

more research and as the basis for advanced courses. This work provides contributions on how Chemical Engineering approaches medical problems, particularly using modelling alongside experimentation and data analysis, to explore medical behaviors. Chapters on modelling the liver, kidney, lungs and skin and associated systems to show how major changes in behavior can be understood and to some extent predicted, are included. This is followed by chapters explaining how engineering principles have been developed to aid diagnosis and treatment of disease such as cancer, diabetes, Von Willibrands disease, and conditions associated with the lungs. The book is of relevance to all Chemical Engineers showing how the discipline is extending to tackle the chemical and physical aspects of disease and human physiology and will also be of interest to clinical staff who wish to see how engineering methodologies can help to integrate the fragmented landscape of medical specialties and in the future move towards decision support tools based on understanding of physiology and disease to aid clinical decision making in the way that is now done in manufacturing. Brings together Chemical Engineers with medical experts. Inspires young Chemical Engineers to see how and where and how their skill set can be applied to medical problems. Within the EFCE Forum on New Technologies Chemical Engineering as Applied in Medicine was seen as an inspiring new area of research.

Investigating Identities Marieke Krajenbrink, Kate M. Quinn, 2009 Investigating Identities: Questions of Identity in Contemporary International Crime Fiction is one of the relatively few books to date which adopts a comparative approach to the study of the genre. This collection of twenty essays by international scholars, examining crime fiction production from over a dozen countries, confirms that a comparative approach can both shed light on processes of adaptation and appropriation of the genre within specific national, regional or local contexts, and also uncover similarities between the works of authors from very different areas. Contributors explore discourse concerning national and historical memory, language, race, ethnicity, culture and gender, and examine how identity is affirmed and challenged in the crime genre today. They reveal a growing tendency towards hybridization and postmodern experimentation, and increasing engagement with philosophical enquiry into the epistemological dimensions of investigation. Throughout, the notion of stable identities is subject to scrutiny. While each essay in itself is a valuable addition to existing criticism on the genre, all the chapters mutually inform and complement each other in fascinating and often unexpected ways. This volume makes an important contribution to the growing field of crime fiction studies and to ongoing debates on questions of identity. It will therefore be of special interest to students and scholars of the crime genre, identity studies and comparative literature. It will also appeal

to all who enjoy reading contemporary crime fiction.

Sample Preparation with Nanomaterials Chaudhery Mustansar Hussain, Rustem Kecili, Chaudhery Ghazanfar Hussain, 2021-07-19 Discover this timely, comprehensive, and up-to-date exploration of crucial aspects of the use of nanomaterials in analytical chemistry. *Sample Preparation with Nanomaterials: Next Generation Techniques for Sample Preparation* delivers insightful and complete overview of recent progress in the use of nanomaterials in sample preparation. The book begins with an overview of special features of nanomaterials and their applications in analytical sciences. Important types of nanomaterials, like carbon nanotubes and magnetic particles, are reviewed and biological sample preparation and lab-on-a-chip systems are presented. The distinguished author places special emphasis on approaches that tend to green and reduce the cost of sample treatment processes. He also discusses the legal, economical, and toxicity aspects of nanomaterial samples. This book includes extensive reference material, like a complete list of manufacturers, that makes it invaluable for professionals in analytical chemistry. *Sample Preparation with Nanomaterials* offers considerations of the economic aspects of nanomaterials, as well as the assessment of their toxicity and risk. Readers will also benefit from the inclusion of: A thorough introduction to nanomaterials in the analytical sciences and special properties of nanomaterials for sample preparation An exploration of the mechanism of adsorption and desorption on nanomaterials, including carbon nanomaterials used as adsorbents Discussions of membrane applications of nanomaterials, surface enhanced raman spectroscopy, and the use of nanomaterials for biological sample preparation A treatment of magnetic nanomaterials, lab-on-a-chip nanomaterials, and toxicity and risk assessment of nanomaterials Perfect for analytical chemists, materials scientists, and process engineers, *Sample Preparation with Nanomaterials: Next Generation Techniques for Sample Preparation* will also earn a place in the libraries of analytical laboratories, universities, and companies who conduct research into nanomaterials and seek a one-stop resource for sample preparation.

Methodologies and Intelligent Systems for Technology Enhanced Learning, 10th International Conference Pierpaolo Vittorini, Tania Di Mascio, Laura Tarantino, Marco Temperini, Rosella Gennari, Fernando De la Prieta, 2020-07-27 This book intends to bring together researchers and developers from industry, the education field, and the academic world to report on the latest scientific research, technical advances, and methodologies. The 10th International Conference in Methodologies and Intelligent Systems for Technology Enhanced Learning is hosted by the University of L'Aquila and is going to be held in L'Aquila (Italy). Initially planned on the 17th to the 19th of June 2020, it was postponed to the 7th to the 9th of October 2020, due to the COVID-19 outbreak. The 10th edition of this conference and its related workshops expand the topics of the evidence-based TEL workshops series in order to provide an open forum for discussing intelligent systems for TEL, their roots in novel learning theories, empirical methodologies for their design or evaluation, stand-alone solutions, or web-based ones. This bridge has been realized also thanks to the sponsor of this edition of MIS4TEL: the Armundia Group

<https://www.armundia.com>, the support from national associations (AEPIA, APPIA, CINI, and EurAI), and organizers (UNIVAQ, UNIROMA1, UNIBZ, UCV, UFSC, USAL, AIR institute, UNC, and UNIBA)

Italian Gothic Horror Films, 1980-1989 Roberto Curti, 2019-02-15 The Italian Gothic horror genre underwent many changes in the 1980s, with masters such as Mario Bava and Riccardo Freda dying or retiring and young filmmakers such as Lamberto Bava (Macabro, Demons) and Michele Soavi (The Church) surfacing. Horror films proved commercially successful in the first half of the decade thanks to Dario Argento (both as director and producer) and Lucio Fulci, but the rise of made-for-TV products has resulted in the gradual disappearance of genre products from the big screen. This book examines all the Italian Gothic films of the 1980s. It includes previously unpublished trivia and production data taken from official archive papers, original scripts and interviews with filmmakers, actors and scriptwriters. The entries include a complete cast and crew list, plot summary, production history and analysis. Two appendices list direct-to-video releases and made-for-TV films.

Spermatozoa Rosaria Meccariello, Rosanna Chianese, 2018-06-13 Spermatozoa, the haploid male gametes, are highly specialized cells capable to fertilize eggs in order to produce diploid zygote. The biogenesis of spermatozoa requires finely modulated occurrence of mitotic, meiotic, and differentiation events. Hence, the production of high-quality spermatozoa impacts fertilization with outcomes on the health of the offspring. This book provides a comprehensive overview on the biogenesis, maturation, functions and activities of spermatozoa in both physiological conditions and infertility. Particular attention has been addressed to the impact of environment on sperm quality and to the appropriate selection of high-quality spermatozoa for in vitro fertilization. Taken together, this book targets a wide audience of basic and clinical scientists, teachers and students, and offers a better understanding of spermatozoa health and disease.

Membrane Gas Separation Benny Freeman, Yuri Yampolskii, 2011-06-20 Gas separation membranes offer a number of benefits over other separation technologies, and they play an increasingly important role in reducing the environmental impacts and costs of many industrial processes. This book describes recent and emerging results in membrane gas separation, including highlights of nanoscience and technology, novel polymeric and inorganic membrane materials, new membrane approaches to solve environmental problems e.g. greenhouse gases, aspects of membrane engineering, and recent achievements in industrial gas separation. It includes: Hyperbranched polyimides, amorphous glassy polymers and perfluorinated copolymers Nanocomposite (mixed matrix) membranes Polymeric magnetic membranes Sequestration of CO₂ to reduce global warming Industrial applications of gas separation Developed from sessions of the most recent International Congress on Membranes and Membrane Processes, Membrane Gas Separation gives a snapshot of the current situation, and presents both fundamental results and applied achievements.

Probiotics and Child Gastrointestinal Health Stefano Guandalini, Flavia Indrio, 2019-06-17 This book shows the huge impact the gut microbiota has on the gastrointestinal health of humans with a particular focus on children. It also highlights the potential use of probiotic microorganisms to protect or improve children's gastrointestinal health. Humans are not single organisms: We are a multi-organism structure composed of ourselves and our microbiota, living in close symbiosis since birth and even before. The huge impact that the billions of microscopic cells living in our gut have on our gastrointestinal and systemic health cannot be overestimated. The enormous progress that has been made in the past decade in our still very incomplete understanding of the gut microbiota is opening the door to potential applications in human health that were simply unthinkable before. One of the most interesting aspects of this new scientific horizon is the fact that we may identify (or even create in the laboratory) and utilize many of these "friendly bacteria" to protect, or improve our health. Thus, strains of probiotic microorganisms are being identified and studied in a vast array of clinical scenarios. Among the most investigated areas for probiotics is the gastrointestinal health of children. The topics addressed in this book are spanning from the development of the gut microbiota in the fetus and newborn all the way to current and potential applications in disparate conditions such as necrotizing enterocolitis, or infectious, or inflammatory conditions affecting the child. The book is written in a rigorous, evidence based manner by an international group of outstanding experts in these fields and is aimed at pediatric gastroenterologists, pediatricians and physician scientists alike.

The Routledge Companion to Architectural Drawings and Models Federica Goffi, 2022-05-30 Architectural drawings and models are instruments of imagination, communication, and historical continuity. The role of drawings and models, and their ownership, placement, and authorship in a ubiquitous digital age deserve careful consideration. Expanding on the well-established discussion of the translation from drawings to buildings, this book fills a lacuna in current scholarship, questioning the significance of the lives of drawings and models after construction. Including emerging, well-known, and world-renowned scholars in the fields of architectural history and theory and curatorial practices, the thirty-five contributions define recent research in four key areas: drawing sites/sites of knowledge construction: drawing, office, construction site; the afterlife of drawings and models: archiving, collecting, displaying, and exhibiting; tools of making: architectural representations and their apparatus over time; and the ethical responsibilities of collecting and archiving: authorship, ownership, copyrights, and rights to copy. The research covers a wide range of geographies and delves into the practices of such architects as Sir John Soane, Superstudio, Eugène-Emmanuel Viollet-le-Duc, Frank Lloyd Wright, Wajiro Kon, Germán Samper Gnecco, A+PS, Mies van der Rohe, and Renzo Piano.

Smart Computing and Communication for Sustainable Convergence Shalli Rani, Ayush Dogra, Ashu Taneja, 2025-05-30 The proceedings of the first International Conference on Smart Computing and Communication for Sustainable Convergence

(ISCCSC 2024) present a rich repository of cutting-edge research on smart computing, artificial intelligence and machine learning. It highlights technological breakthroughs and practical challenges in the field of edge learning, data mining, image processing, smart communications, 5G/6G communication networks, signal processing, wireless sensor networks, antenna systems and imaging. It also explores a wide range of communication paradigms, especially those pertaining to smart cities by delving deeper into smart healthcare, smart transportation and intelligent data processing. The findings are instrumental in combating critical global issues and foster a deeper understanding of the role of AI in shaping the world we live in. This will be a highly valuable guide to researchers, data scientists, practicing professionals and students in the fields of artificial intelligence, machine learning and data processing.

Archaeology & Pilgrimage Maddalena Bassani, Silvia González Soutelo, Martín López Nores, José Juan Pazos Arias, Susana Reboreda Morillo, Óscar Penín Romero, Alessia Mariotti, Paola Zanovello, Andrea Meleri, Jacopo Turchetto, Miguel Gomez-Heras, Laura García Juan, Mattia Vitelli Casella, Ludovico Rebaudo, Jacopo Tabolli, 2023 Engramma 204 collects researches and findings of several Italian and European scholars who have dealt with aspects related to ancient, Medieval and Modern pilgrimage along the main three European Routes (Via Romea Francigena, Via Romea Strata, Via Romea Germanica), or along other routes to the Holy Land. The issue is divided into three sections. The first one is dedicated to the European project rurAllure by Martín López Nores, José Juan Pazos Arias, Susana Reboreda Morillo, Óscar Penín Romero, which focuses on the enhancement of minor sites along the pilgrimage routes of Europe, and it is accompanied by an overview on the development of promotional activities for some Italian cases supervised by Alessia Mariotti. The second section presents a series of studies related to some contexts that are close to mineral springs or important waterways and were frequented by pilgrims throughout the centuries: these are articles by Paola Zanovello and Andrea Meleri's on the Euganean Hills (Padua), by Maddalena Bassani's on the sanctuary of Minerva Medica in Val Trebbia (Piacenza) and that at Timavo's Sources (Monfalcone), by Jacopo Turchetto on the centuriation between Padua and Altino. Furthermore, the articles by Silvia González Soutelo, Miguel Gómez-Heras, and Laura García Juan on the Bagno Vignoni area (Siena), and by Alessia Mariotti and Mattia Vitelli Casella on the Argenta site (Po Delta). In the third and final section one can read two important contributions, the first by Ludovico Rebaudo, devoted to the study of manuscript evidences recorded during a pilgrimage to the Holy Land about archaeological remains in Anatolia; the second by Jacopo Tabolli, who presents an exhibition on votive bronzes left by pilgrims in the sanctuary at the 'Sorgenti di San Casciano ai Bagni' (Siena) that recently opened at the Palazzo del Quirinale in Rome.
