*Energy Research at the Cutting Edge* John R. Blackwood,2002 Energy fuels modern society, though it is often taken for granted. The issues surrounding energy supply of paramount importance to governments the world over. While calls for 'clean' energy technologies are rampant and loud, conventional sources like coal and oil remain the most feasible. However, research continues to plough ahead to find better and more efficient ways to keep the demand for energy met. Nuclear power is a perennially controversial but enticing possibility, although many nations seek to phase-out nuclear power, citing safety and environmental concerns. The energy industry and production is a major economic component in any country, so all energy and electricity issues hold sway over us all. This book brings together an important selection of studies focusing on the energy industry, its current state and future. Included are looks at nuclear power and economic policies to influence the electric industry. This current research combines for a needed resource in the study of energy.

**Mine Planning and Equipment Selection** Carsten Drebenstedt,Raj Singhal,2013-10-16 This edited volume includes all papers presented at the 22nd International Conference on Mine Planning and Equipment Selection (MPES), Dresden, Germany, 2013. Mineral Resources are needed for almost all processes of modern life, whilst the mining industry is facing strict requirements regarding efficiency and sustainability. The research papers in this volume deal with the latest developments and research results in the fields of mining, machinery, automatization and environment protection.

**Advanced Engineering and Sustainable Solutions** Deepak Kumar Singh,Saurabh Sambhav,Ashok Kumar Pandey,Azman Ismail,Fatin Nur Zulkipli,Andreas Öchsner,2025-03-19 This book is a comprehensive collection of cutting-edge research that addresses some of the most pressing challenges in modern engineering and applied sciences. This book features 26 chapters, each delving into innovative methodologies, advanced techniques, and sustainable solutions across a diverse range of disciplines. Each chapter presents rigorous analysis, practical applications, and forward-thinking solutions, making this book an essential resource for researchers, engineers, and professionals seeking to expand their knowledge and contribute to the advancement of sustainable technologies in their respective fields.

Selected Papers from the 2018 IEEE International Workshop on Metrology for the Sea Attilio Di Nisio,Francesco

Picariello,2020-11-13 This Special Issue is devoted to recent developments in instrumentation and measurement techniques applied to the marine field. ¶The sea is the medium that has allowed people to travel from one continent to another using vessels, even today despite the use of aircraft. It has also been acting as a great reservoir and source of food for all living beings. However, for many generations, it served as a landfill for depositing conventional and nuclear wastes, especially in its deep seabeds, and we are assisting in a race to exploit minerals and resources, different from foods, encompassed in it. Its health is a great challenge for the survival of all humanity since it is one of the most important environmental components targeted by global warming. ¶ As everyone may know, measuring is a step that generates substantial knowledge about a phenomenon or an asset, which is the basis for proposing correct solutions and making proper decisions. However, measurements in the sea environment pose unique difficulties and opportunities, which is made clear from the research results presented in this Special Issue.

Engineering Mathematics in Ship Design Cristiano Fragassa,Elizaldo Domingues Dos Santos,Nenad

Djordjevic,2020-01-03 Engineering mathematics is a branch of applied mathematics where mathematical methods and techniques are implemented for solving problems related to the engineering and industry. It also represents a multidisciplinary approach where theoretical and practical aspects are deeply merged with the aim at obtaining optimized solutions. In line with that, the present Special Issue, 'Engineering Mathematics in Ship Design', is focused, in particular, with the use of this sort of engineering science in the design of ships and vessels. Articles are welcome when applied science or computation science in ship design represent the core of the discussion.

*ICT Systems and Sustainability* Milan Tuba,Shyam Akashe,Amit Joshi,2020-12-14 This book proposes new technologies and discusses future solutions for ICT design infrastructures, as reflected in high-quality papers presented at the 5th International Conference on ICT for Sustainable Development (ICT4SD 2020), held in Goa, India, on 23-24 July 2020. The conference provided a valuable forum for cutting-edge research discussions among pioneering researchers, scientists, industrial engineers, and students from all around the world. Bringing together experts from different countries, the book explores a range of central issues from an international perspective.

Sustainable Development and Innovations in Marine Technologies Petar Georgiev,Carlos Guedes Soares,2019-08-22

Sustainable Development and Innovations in Marine Technologies includes the papers presented at the 18th International Congress of the Maritime Association of the Mediterranean (IMAM 2019, Varna, Bulgaria, 9-11 September 2019).

Sustainable Development and Innovations in Marine Technologies includes a wide range of topics: Aquaculture & Fishing; Construction; Defence & Security; Design; Dynamic response of structures; Degradation/ Defects in structures; Electrical equipment of ships; Human factors; Hydrodynamics; Legal/Social aspects; Logistics; Machinery & Control; Marine

environmental protection; Materials; Navigation; Noise; Non-linear motions – manoeuvrability; Off-shore and coastal development; Off-shore renewable energy; Port operations; Prime movers; Propulsion; Safety at sea; Safety of Marine Systems; Sea waves; Seakeeping; Shaft & propellers; Ship resistance; Shipyards; Small & pleasure crafts; Stability; Static response of structures; Structures, and Wind loads. The IMAM series of Conferences started in 1978 when the first Congress was organised in Istanbul, Turkey. IMAM 2019 is the eighteenth edition, and in its nearly forty years of history, this biannual event has been organised throughout Europe. Sustainable Development and Innovations in Marine Technologies is essential reading for academics, engineers and all professionals involved in the area of sustainable and innovative marine technologies.

**Towards Green Marine Technology and Transport** Carlos Guedes Soares,Roko Dejhalla,Dusko Pavletic,2015-09-04  
Towards Green Marine Technology and Transport covers recent developments in marine technology and transport. The book brings together a selection of papers reflecting fundamental areas of recent research and development in the fields of ship hydrodynamics, marine structures, ship design, shipyard technology, ship machinery, maritime transportation,

**Performance and Ranges of Application of Various Types of Aircraft-propulsion System** ,1947 This group of papers on the comparison of the performance of six aircraft-propulsion systems was prepared by members of the NACA Flight Propulsion Research Laboratory staff under the direction of Mr. Benjamin Pinkel and was presented at the meeting of the Institute of Aeronautical Sciences on Aircraft Propulsion systems held in Cleveland, Ohio, on March 28, 1947.

*Fuzzy Techniques for Decision Making 2018* José Carlos R. Alcantud,2020-12-02 Zadeh's fuzzy set theory incorporates the impreciseness of data and evaluations, by imputting the degrees by which each object belongs to a set. Its success fostered theories that codify the subjectivity, uncertainty, imprecision, or roughness of the evaluations. Their rationale is to produce new flexible methodologies in order to model a variety of concrete decision problems more realistically. This Special Issue garners contributions addressing novel tools, techniques and methodologies for decision making (inclusive of both individual and group, single- or multi-criteria decision making) in the context of these theories. It contains 38 research articles that contribute to a variety of setups that combine fuzziness, hesitancy, roughness, covering sets, and linguistic approaches. Their ranges vary from fundamental or technical to applied approaches.

**Maritime Technology and Engineering 5 Volume 1** Carlos Guedes Soares,2021-07-08 This set of two volumes comprises the collection of the papers presented at the 5th International Conference on Maritime Technology and Engineering (MARTECH 2020) that was held in Lisbon, Portugal, from 16 to 19 November 2020. The Conference has evolved from the series of biennial national conferences in Portugal, which have become an international event, and which reflect the

internationalization of the maritime sector and its activities. MARTECH 2020 is the fifth of this new series of biennial conferences. The set comprises 180 contributions that were reviewed by an International Scientific Committee. Volume 1 is dedicated to maritime transportation, ports and maritime traffic, as well as maritime safety and reliability. It further comprises sections dedicated to ship design, cruise ship design, and to the structural aspects of ship design, such as ultimate strength and composites, subsea structures as pipelines, and to ship building and ship repair.

**Design Principles of Ships and Marine Structures** Suresh Chandra Misra, 2015-12-01 The Definitive Reference for Designers and Design Students A solid grasp of the fundamentals of materials, along with a thorough understanding of load and design techniques, provides the components needed to complete a marine platform design. Design Principles of Ships and Marine Structures details every facet of ship design and design integr

**Design Principles of Ships and Marine Structures** Mr. Rohit Manglik, 2024-05-02 EduGorilla Publication is a trusted name in the education sector, committed to empowering learners with high-quality study materials and resources. Specializing in competitive exams and academic support, EduGorilla provides comprehensive and well-structured content tailored to meet the needs of students across various streams and levels.

**Computational Ship Design** Myung-Il Roh, Kyu-Yeul Lee, 2017-09-29 This book offers an introduction to the fundamental principles and systematic methodologies employed in computational approaches to ship design. It takes a detailed approach to the description of the problem definition, related theories, mathematical formulation, algorithm selection, and other core design information. Over eight chapters and appendices the book covers the complete process of ship design, from a detailed description of design theories through to cutting-edge applications. Following an introduction to relevant terminology, the first chapters consider ship design equations and models, freeboard calculations, resistance prediction and power estimation. Subsequent chapters cover topics including propeller design, engine selection, hull form design, structural design and outfitting. The book concludes with two chapters considering operating design and economic factors including construction costs and fuel consumption. The book reflects first-hand experiences in ship design and R&D activities, and incorporates improvements based on feedback received from many industry experts. Examples provided are based on genuine case studies in the field. The comprehensive description of each design stage presented in this book offers guidelines for academics, researchers, students, and industrial manufactures from diverse fields, including ocean engineering and mechanical engineering. From a commercial point of view the book will be of great value to those involved in designing a new vessel or improving an existing ship.

**Information, Communication and Environment** Adam Weintrit, Tomasz Neumann, 2015-06-03 The monograph Marine Navigation and Safety of Sea Transportation, Information, Communication and Environment, is addressed to scientists and professionals in order to share their experience, expert knowledge and research results, concerning all aspects of navigation

and sea transportation. The focus of monograph is high-quality, scholarly research that addresses development, application and implications, in the field of maritime education, maritime safety management, maritime policy sciences, maritime industries, marine environment and energy technology. Subjects of papers include electronics, astronomy, mathematics, cartography, command and control, psychology, operational research, risk analysis, theoretical physics, operation in hostile environments, instrumentation, ergonomics, financial planning and law. Also of interest are logistics, transport and mobility. The monograph provides a forum for transportation researchers, engineers, navigators, ergonomists, and policy-makers with an interest in maritime researches. From contemporary issues to the scientific, technological, political, economic, cultural and social aspects of maritime shipping, transportation and navigation, the monograph publishes innovative, interdisciplinary and multidisciplinary research on marine navigation subjects and is set to become the leading international scholarly journal specialising in debate and discussion on maritime subjects. The monograph is especially concerned to set maritime studies in a broad international and comparative context.

*Towards A Sustainable Arctic: International Security, Climate Change And Green Shipping* Michael Goodsite, Niklas Swanstrom, 2023-03-23 The Arctic's environment, economics and politics are changing rapidly, and the conflicting interests among stakeholders mean that it lacks sustainable political and military cooperation. States bordering the Arctic — Russia, Canada, the United States, and the Nordic countries — as well as those further afield — such as China and Japan — all recognize the economic benefits of the region, but struggle to address the security challenges and the potential environmental impact of activities conducted there. This book provides a snapshot of the subject areas connecting transport, environmental security, resource development, and military security, featuring new material written after Russia's second invasion of Ukraine.
