Gestión integrada de proyectos innovadores Manuel Zahera Pérez,2017-01-19 Esta obra recoge, por una parte, los conceptos básicos de la gestión de proyectos y de la innovación y, por otra, facilita una visión moderna, rigurosa pero sintética de la gestión integrada de los proyectos de innovación y de I+D. El texto es ambicioso en cuanto a los contenidos, ya que abarca la mayoría de los aspectos que intervienen en la gestión de proyectos innovadores, pero también es sintético, con un lenguaje sencillo que lo convierte en un curso básico que puede ser seguido por lectores con diferente formación, tanto por ingenieros y científicos como por humanistas. Con este libro no se trata de que el lector innove más, sino de que gestione mejor los proyectos en los que participa, lo que, sin duda, redundará en un resultado innovador más eficaz.

DIDÁCTICA PRÁCTICA. Eduardo Fiore Ferrari,Julia Leymonié Sáenz,2021-02-05 Desde el pensamiento y experticia de una diversidad de reconocidos autores y didactas latinoamericanos de gran trayectoria, provenientes principalmente del Cono Sur, la obra que el lector tiene en sus manos, Didáctica Práctica, conjuga treinta capítulos que abordan sendas temáticas de gran actualidad que toman en cuenta las necesidades de la enseñanza básica, media y superior. En los capítulos se abordan asuntos de orden teórico, epistemológico e investigativo desde el reconocimiento de la existencia de diversas miradas didácticas y de múltiples problemáticas a atender. Quisiera destacar que en la obra se ha puesto atención al papel del docente no únicamente en su tarea como enseñante, sino como creador de situaciones didácticas, de materiales

educativos, de entornos de bienestar y motivantes para el estudiantado, pero, sobre todo, en su calidad de profesional reflexivo que interpela su propia actuación y marcos de referencia. Finalmente, otro aspecto que debe ponderarse en este libro es el amplio abanico de opciones teóricas y metodológicas que ofrece al lector, porque el campo de la educación en sí mismo está abierto a un sinnúmero de miradas del hecho educativo, dada su multideterminación y complejidad, la aparición continua de nuevas realidades educativas y de objetos de estudio insospechados.

Impacto de las iniciativas de gestión de ideas internas en el desarrollo de una cultura de innovación en grandes organizaciones Campos Blázquez, Juan Ramón, 2019-06-13 Durante los últimos 15 años los procesos abiertos de innovación han sido ampliamente estudiados desde múltiples perspectivas, tales como: aprovechar el conocimiento y la experiencia externos, gestionar la propiedad intelectual externa y propia, o enfatizar la importancia del modelo de negocio como el aspecto clave para capturar valor de la innovación; sin embargo, hay muy pocos estudios que proporcionen evidencia empírica sobre la utilización de tecnologías colaborativas y sus procesos derivados dentro de los límites de la organización como elemento dinamizador de una cultura organizativa que favorezca la participación de todos los empleados en las etapas iniciales del proceso de innovación y, en consecuencia, que ayude a desarrollar una cultura que fomente la innovación y que también se convierta en un sistema adaptativo que favorezca el crecimiento y la supervivencia de las organizaciones. En definitiva, se trata de que la cultura de innovación forme parte del ADN de toda la organización y no solo de silos aislados. A partir de una exhaustiva revisión de la literatura sobre la cultura organizativa, cultura de innovación y el crowdsourcing interno, esta investigación evalúa el impacto que la implantación de una iniciativa de crowdsourcing interno puede tener en el desarrollo de una cultura de innovación en grandes organizaciones. Para ello, mediante un estudio de casos múltiple contemporáneo, se han analizado cuatro grandes organizaciones con sede en España, Ayuntamiento de Madrid, Banc Sabadell, Endesa y Grupo Repsol, que han implementado iniciativas de crowdsourcing interno, con el apoyo de dos modelos teóricos, por un lado, el de crowdsourcing interno de Zuchowski et al. (2016) y, por otro, el de cultura de innovación desarrollado por Rao y Weintraub (2013). La principal conclusión que se extrae de esta investigación es que cuando una organización impulsa una iniciativa de crowdsourcing interno, propicia la posibilidad de idear a todos sus empleados, fomenta la colaboración y la comunicación entre departamentos y favorece que actúen como auténticos agentes de innovación. Estos rasgos, propios de una cultura de innovación, son los que la convierten en un determinante crítico del éxito de la innovación empresarial. Asimismo, se propone el modelo de crowdsourcing interno utilizado como guía de acción al servicio del equipo gestor de la iniciativa, puesto que descompone y particulariza las diferentes unidades analíticas y decisionales con suficiente entidad que se deben afrontar en el diseño y despliegue de este tipo de iniciativas, sin perder la coherencia relacional necesaria entre los distintos componentes.

Gestión de la tecnología Fabiola Sáenz Blanco, Néstor Orlando Cordero Sáenz, Evelio Cortés Rodríguez, 2020-01-10 Las

organizaciones del siglo XXI se caracterizan por la necesidad de renovarse rápida y ágilmente para afrontar los cambios que acontecen en un entorno cada vez más globalizado y competitivo, tanto por el lado de adquisición de sus insumos productivos como de la comercialización de sus bienes y servicios. Esta mayor rivalidad competitiva exige una orientación hacia la constante búsqueda de creación de valor en las tradicionales dimensiones competitivas de Porter de reducciones de costes, diferenciación o focalización/especialización, que se alcanzan por medio de la innovación tecnológica.

Cómo Gestionar la Innovación en Las Pymes. Nuria López Mielgo,José Manuel Montes Peón,Camilo José Vázquez Ordás,2007-04 La importancia de la innovación como factor de supervivencia y competitividad es incuestionable en el mundo empresarial. Sin embargo, la gran mayoría de las empresas españolas presentan un tamaño reducido, sin departamento específico de I+D y compiten en sectores de intensidad tecnológica media o baja, por lo que no incluyen la gestión de la innovación y la tecnología entre sus actividades cotidianas. Este libro combina el rigor conceptual y los análisis empíricos con una exposición ágil, clara y exemplificada de lo que debería ser la innovación en una Pyme. Con este objetivo, el texto se organiza en tres capítulos en los que se trata, primero, la importancia de la innovación para la empresa y la sociedad; segundo, el proceso de innovación particularizando esta actividad en las pequeñas y medianas empresas y, finalmente, muestra los pasos básicos necesarios para gestionar la innovación, proporcionando un conjunto de herramientas que facilitan la implantación de las distintas etapas de gestión. Las técnicas y modelos de gestión expuestos son aplicables a empresas de distintos tamaños y sectores, con un nivel de formalización y desarrollo que puede variar de unas empresas a otras, pero en cualquier caso resultan imprescindibles para conseguir una mayor flexibilidad y adaptación a los cambios, gestionándolos de forma organizada y sistemática. De esta forma, los autores fundamentan la importancia de la innovación y la implantación de su gestión contribuyendo a crear las condiciones favorables para mejorar la competitividad de nuestro tejido empresarial.

La innovación empresarial en Ontinyent y su entorno Vicente Cerverón y Josep-Antoni Ybarra (eds.), 2016-11-14 Se entiende por innovación la concepción e implantación de cambios significativos en el producto, el proceso productivo, la mercadotecnia o la organización de la empresa con el propósito de mejorar los resultados. Los cambios innovadores se realizan mediante la aplicación de nuevos conocimientos y tecnología que pueden ser desarrollados internamente, en colaboración externa o adquiridos mediante servicios de asesoramiento o por compra de tecnología. Este estudio forma parte de las actividades de la Cátedra universitaria Ajuntament d'Ontinyent - Caixa Ontinyent - ESET para la innovación y configuración de territorios inteligentes, creada como una estructura académica estable destinada al estudio, la aplicación y la divulgación de los procesos relacionados con los territorios inteligentes, especialmente los relacionados con la innovación, en el contexto geográfico de Ontinyent y su entorno.

Innovaciones tecnológicas en didácticas específicas Olga Buzón García, Carolina Del Valle Ramos, José Enrique Vázquez Mesa, Victoria del Rocío Gómez Carrillo, Nimbe Arellanos Beauregard, María Josefa Vilches Vilela, Verónica Marín Díaz, Susana Alés Álvarez, Anjhara Gómez Aragón, Eloísa Reche Urbano, Alicia Martín Terrón, 2018-04-06 La Sociedad actual se encuentra en constante redefinición para afrontar los vertiginosos cambios planteados por el desarrollo de las tecnologías y la diversificación de sus usos. Esto demanda la puesta en marcha de modelos pedagógicos más flexibles, dinámicos, creativos e innovadores, por lo que el esquema educativo no se podrá desarrollar con unas metodologías exclusivamente tradicionales. Es hora de cambiar, las metodologías docentes evolucionan y pasan a convertirse en metodologías activas tales como la pedagogía inversa, el conectivismo, el aprendizaje social y experiencial, etc., que garantizan la calidad de la enseñanza, y donde el alumnado es el protagonista de los procesos de enseñanza-aprendizaje. Este libro se propone con la finalidad de dar a conocer experiencias sobre usos y beneficios de estas nuevas modalidades educativas y proponer la reflexión entre los profesionales de la educación.

TENDENCIAS CIENTÍFICO-TECNOLÓGICAS. RETOS, POTENCIALIDADES Y PROBLEMAS SOCIALES TEZANOS

TORTAJADA José Félix ,2017-02-08 La revolución tecnológica y los cambios que están experimentando las sociedades de nuestro tiempo nos sitúan ante horizontes sociales inéditos y cargados de innovaciones y posibilidades. Sin embargo, el cúmulo de transformaciones que están en curso también generan tensiones de ajuste y problemas sociales de diverso tipo, que tienen que ser evaluados y abordados adecuadamente si no queremos que muchas de las potencialidades de la revolución tecnológica se vean frustradas en contextos crecientemente problemáticos e inciertos. Este libro plantea tales cuestiones, a partir de la amplia información empírica procedente de un ambicioso proyecto de investigación sobre Tendencias Sociales de Nuestro Tiempo, coordinado por José Félix Tezanos, que viene realizando el GETS (Grupo de Estudio sobre Tendencias Sociales) desde el año 1995, en el marco de una colaboración prolongada entre la UNED y la Fundación Sistema. En esta publicación se ha contado con la participación de algunos de los más reputados especialistas españoles en las cuestiones consideradas tanto desde la perspectiva de las especialidades científicas más relevantes como desde el campo de la prospectiva y de las ciencias sociales. En los capítulos de este libro el lector podrá encontrar información de primera mano sobre algunos de los principales avances científicos alcanzados, así como sobre las previsiones y perspectivas más inmediatas, y los problemas e impactos sociales que los grandes cambios en curso están planteando y van a plantear a corto y medio plazo.
