*The Horse and Jockey from Artemision* Séan A. Hemingway, Seán Hemingway, 2004-07-08 In 1928, and again in 1937, parts of a large-scale bronze horse and nearly complete jockey were recovered from the sea off Cape Artemision in Greece, where they had gone down in a shipwreck. These original Hellenistic sculptures, known together as the Horse and Jockey Group from Artemision, are among the very few surviving bronze sculptures from antiquity. Séan Hemingway has been allowed by the National Museum in Athens to investigate the horse and jockey statuary group as no one ever has before, and in this book, combining archaeological and art historical methods of investigation, he provides the first in-depth study of this rare and beautiful monument. New technical analyses of the statues by Helen Andreopoulou-Mangou form an appendix to the volume. Hemingway begins with an introduction to Hellenistic bronze statuary and what we know about this extraordinary class of ancient sculpture. He then recounts with riveting detail the discovery and painstaking restoration of the statue group, describing the technique of its creation and carefully reviewing scholarly knowledge and speculation about it. He also provides a valuable compendium of what is known about ancient Greek horse racing, the most prestigious and splendid of all Greek sports. After a full consideration of all the available evidence, he speculates further about the work's original meaning and function. His study provides a glimpse of the excellence achieved by Hellenistic bronze sculptors, and it will become the definitive resource on this unique sculpture from ancient Greece.

**The Twin Horse Gods** Henry John Walker, 2015-06-15 The twin deities known by the ancient Greeks as the Dioskouroi, and by the Romans as the Gemini, were popular figures in the classical world. They were especially connected with youth, low status and service, and were embraced by the common people in a way that eluded those gods associated with regal magnificence or the ruling classes. Despite their popularity, no dedicated study has been published on the horse gods for over a hundred years. Henry John Walker here addresses this neglect. His comparative study traces the origins, meanings and applications of the twin divinities to social and ritual settings in Greece, Vedic India (where the brothers named Castor and Pollux were revered as Indo-European gods called the Asvins), Etruria and classical Rome. He demonstrates, for example, that since the Dioskouroi were regarded as being halfway between gods and men, so young Spartans - undergoing a fierce and rigorous military training - saw themselves as standing midway between animal and human. Such creative interpretations of the myth thus played a central role in the culture and society of antiquity.

**The Golden Bough** James George Frazer,1998 First published in 1890, *The Golden Bough* is a seminal work of modern anthropology. A classic study of the beliefs and institutions of mankind that traces the development and confluence of thought from magic and ritual to modern scientific theory, it has been a source of great influence upon such diverse writers as T.S. Eliot, Wyndham Lewis, and D.H. Lawrence. This edition restores many of the controversial passages expurgated in the 1922 edition that elucidate Frazer's bolder theories, and sets them within the framework of a valuable introduction and notes.

The Cults of the Greek States Lewis Richard Farnell,1896

The Golden Bough: The Magic Art and the Evolution of Kings. The King of the Wood James George Frazer,1911 Frazer's series which attempted to define the shared elements of religious belief and scientific thought, discussing fertility rites, human sacrifice, the dying god, the scapegoat, and many other symbols and practices whose influences had extended into 20th-century culture. His thesis is that old religions were fertility cults that revolved around the worship and periodic sacrifice of a sacred king. Frazer proposed that mankind progresses from magic through religious belief to scientific thought.

The Double Goddess Vicki Noble,2003-06-19 A study of the double goddess iconography prominent in Neolithic and Bronze Age cultures that expands our understanding of female sovereignty. Celebrates this archetype of sacred female bonding and depicts a vast array of relationships women may form with themselves and each other to explore a sense of self and empowerment, and to share power with each other.

*The Triads* J. M. S. Ward,W. G. Stirling,2014-07-10 First published in 2006. Claiming origins in the mysteries of the Shaolin monastery and its martial traditions, the Triads are Chinese secret societies that overthrew the Qing Dynasty, evolved into organised crime syndicates, spread through the Chinese diaspora and are more powerful now than ever before. The symbol of the Triads is a triangle enclosing the characters for heaven, earth and man, emblematic of the societies' far-reaching influence, and membership involves challenging rites of initiation and the practice of complex rituals little changed over the centuries. On one level, these practices can be seen simply as the customs of a purely mystical order; on another, they may be seen as the organising principles by which secret societies continue to operate as powerful political organisations invisible in our midst. This classic work, the definitive study of the history, symbols and secret rituals of the

Triads, reveals the Triad initiation ritual of the mystical journey; sacred Triad signs, words and slang; the rite of the magic mirror and the oath of blood brotherhood; the symbolic decoration of Triad temples, Triad magic, and the meaning of the sacred objects and ceremonies at the heart of Triad practice in minute detail. The authors show that the Triad ritual is a potent mystical allegory with an immense power that can be used for good or ill.

**The Roman Military Base at Dura-Europos, Syria** Simon James, 2019-02-07 Dura-Europos, a Parthian-ruled Greco-Syrian city, was captured by Rome c.AD165. It then accommodated a Roman garrison until its destruction by Sasanian siege c.AD256. Excavations of the site between the World Wars made sensational discoveries, and with renewed exploration from 1986 to 2011, Dura remains the best-explored city of the Roman East. A critical revelation was a sprawling Roman military base occupying a quarter of the city's interior. This included swathes of civilian housing converted to soldiers' accommodation and several existing sanctuaries, as well as baths, an amphitheatre, headquarters, and more temples added by the garrison. Base and garrison were clearly fundamental factors in the history of Roman Dura, but what impact did they have on the civil population? Original excavators gloomily portrayed Durenes evicted from their homes and holy places, and subjected to extortion and impoverishment by brutal soldiers, while recent commentators have envisaged military-civilian concordia, with shared prosperity and integration. Detailed examination of the evidence presents a new picture. Through the use of GPS, satellite, geophysical and archival evidence, this volume shows that the Roman military base and resident community were even bigger than previously understood, with both military and civil communities appearing much more internally complex than has been allowed until now. The result is a fascinating social dynamic which we can partly reconstruct, giving us a nuanced picture of life in a city near the eastern frontier of the Roman world.
