Design Engineering W. Ernst Eder,Stanislav Hosnedl,2007-07-09 As with any art, science, or discipline, natural talent is only part of the equation. Consistent success stems from honing your skills, cultivating good techniques, and hard work. Design engineering, a field often considered an intuitive process not amenable to scientific investigation, is no exception. Providing descriptive theory, broad context,

Introduction to Design Engineering W. Ernst Eder,Stanislav Hosnedl,2010-04-14 Designing engineering products technical systems and/or transformation processes requires a range of information, know-how, experience, and engineering analysis, to find an optimal solution. Creativity and open-mindedness can be greatly assisted by systematic design engineering, which will ultimately lead to improved outcomes, documentatio

Condensation of steam in nozzles and turbine cascades Miroslav Šťastný, 2015-01-01 Metoda použitá pro popis kondenzace proudící páry je založena na homogenní (spontánní) kondenzaci páry, hetero-homogenní kondenzaci a rovněž na binární nukleaci vodních kapiček s reprezentativní chemickou nečistotou NaCl, která se v energetické páře nejčastěji vyskytuje. Stručně jsou popsány fyzikální a matematické modely kondenzace. Homogenní, hetero-homogenní a binární nukleační modely jsou potom použity pro výpočty proudění páry s kondenzací v 2D dýzách a 2D rozváděcích mřížích prvního stupně s vlhkostí v nízkotlaké části kondenzační turbíny pro uhelnou elektrárnu a v nízkotlaké části turbíny pro jadernou elektrárnu. Pro výpočty byl vyvinut program COCHEM Flow. Uvedeny jsou výsledky výpočtů a jejich rozbor. Popisuje se rovněž experimentální výzkum dvoufázového proudění vlhkého vzduchu s kondenzací v rozváděcí turbínové mříži. Pozornost je také věnována účinku chemických nečistot páry na turbínové lopatky v oblasti kondenzace páry v nízkotlaké části kondenzační turbíny.

Beyond Artificial Intelligence Jozef Kelemen, Jan Romportl, Eva Zackova, 2012-10-20 Products of modern artificial intelligence (AI) have mostly been formed by the views, opinions and goals of the “insiders”, i.e. people usually with engineering background who are driven by the force that can be metaphorically described as the pursuit of the craft of Hephaestus. However, since the present-day technology allows for tighter and tighter mergence of the “natural” everyday human life with machines of immense complexity, the responsible reaction of the scientific community should be based on cautious reflection of what really lies beyond AI, i.e. on the frontiers where the tumultuous ever-growing and ever-changing cloud of AI touches the rest of the world. The chapters of this book are based on the selected subset of the presentations that were delivered by their respective authors at the conference “Beyond AI: Interdisciplinary Aspects of Artificial Intelligence” held in Pilsen in December 2011. From its very definition, the reflection of the phenomena that lie beyond AI must be inherently interdisciplinary. And so is this book: all the authors took part in a mutual transdisciplinary dialogue after explaining their views on AI not only to a narrow selection of their usual close peers with the same specialisation, but to a much broader audience of various experts from AI engineering, natural sciences, humanities and philosophy. The chapters of this book thus reflect results of such a dialogue.

Extremism Behind Bars Alena Lochmannová, Ondřej Kolář, 2021-01-01 Radikalizace a extremistické projevy představují pro vězeňské prostředí, především pak ve vazbě na jeho specifickou, významnou bezpečnostní hrozbu. Dynamická povaha radikalizačního procesu ve spojení s vzájemným působením procesů ve vnější společnosti na vězeňské prostředí a naopak způsobuje, že radikalizační proces nabývá (nejen) ve vězeňském prostředí nových podob. V tomto kontextu je významné monitorování těchto projevů, ať už s ohledem na realizované aktivity, průnik nedovolených látek a předmětů, nebo symboliku.

Publikace Extremismus za mřížemi je studií mapující nejen povahu a proměny extremismu a radikalizace obecně, ale vztahující tuto problematiku také k českému vězeňskému prostředí, četně v komparaci se zahraniční praxí. Významnou částí publikace jsou fotografie z archivu autorů, kteří kladou důraz nejen na projevy extremismu samotné, ale i na vizuální a ikonickou manifestaci extremismu, ať už ve formě vězeňské tetuáže, tak ve formě materiálů na podporu odsouzených. Publikace je rovněž doplněna o případové studie a bohatý fotografický materiál dokladující význam radikalizace a extremismu nejen v rovině praktické, ale také symbolické, kdy ať už nabývá jakékoliv podoby, je potenciálním nástrojem rekrutace v prostředí za vysokými zdmi a vězeňskými mřížemi, které je pro svoji povahu pro tento proces doslova živnou půdou.

Research and Innovation Forum 2020 Anna Visvizi, Miltiadis D. Lytras, Naif R. Aljohani, 2021-02-11 This book features research presented and discussed during the Research & Innovation Forum (Rii Forum) 2020. As such, this book offers a unique insight into emerging topics, issues and developments pertinent to the fields of technology, innovation and education and their social impact. Papers included in this book apply inter- and multi-disciplinary approaches to query such issues as technology-enhanced teaching and learning, smart cities, information systems, cognitive computing and social networking. What brings these threads of the discussion together is the question of how advances in computer science – which are otherwise largely incomprehensible to researchers from other fields – can be effectively translated and capitalized on so as to make them beneficial for society as a whole. In this context, Rii Forum and Rii Forum proceedings offer an essential venue where diverse stakeholders, including academics, the think tank sector and decision-makers, can engage in a meaningful dialogue with a view to improving the applicability of advances in computer science.

The Contribution of Universities Towards Education for Sustainable Development Walter Leal Filho,Thais

Dibbern,Salvador Ruiz de Maya,María-del-Carmen Alarcón-del-Amo,Longinos Marin Rives,2024-04-01 The book gathers inputs from universities and research organizations working on matters related to sustainable development in a variety of contexts. It also provides a platform for the dissemination of information on the latest initiatives, paving the way for technology transfer and networking. Furthermore, the book intends to provide a fertile basis upon which universities may cooperate more closely in this key area. Universities, as centers of education, research, and innovation, have a unique position and responsibility in promoting sustainability. They can offer degree programs, courses, and workshops focused on sustainability, environmental studies, and related fields, educating students and the wider community about the principles and challenges of sustainability. Also, universities can conduct cutting-edge research to address sustainability challenges, such as climate change, resource depletion, and biodiversity loss. They can develop innovative technologies and solutions that promote sustainable practices in various sectors, including energy, agriculture, transportation, and urban planning. There is a perceived need to better understand and engage universities further on sustainability initiatives. Against this backdrop and in order to facilitate a broad discussion on the contribution of universities toward sustainability, this book is

being produced. Last but not least, a further aim of the book is to present methodological approaches and experiences deriving from case studies and projects, which aim to show how sustainability may be incorporated as part of university programs.

Translation and Own-Language Use in Language Teaching Eva Skopečková, 2024-04-06 This book reconsiders the role of translation and own-language use in the EFL (English as a Foreign Language) classroom. It shows prospective teachers how to use the learners' own language and translation optimally. The author surveys current research about the EFL classroom and presents both a theoretical framework and a didactic model for using translation and learners' mother tongues. This is done through an action research project, assessing the proposed didactic model for optimal translation practice in English Language teaching (OTP in ELT) through its integration into teacher education. The book will be of interest to students and researchers in the areas of Translation Studies and Applied Linguistics (particularly EFL, ESL, TEFL and TESOL), as well as educators and designers of pre-service training programmes for language teachers.
