Structural Steel Design Abieyuwa Aghayere, Jason Vigil, 2020-02-06 This simple, practical, and concise guide to structural steel design – using the Load and Resistance Factor Design (LRFD) and the Allowable Strength Design (ASD) methods — will equip the reader with the necessary skills for designing real-world structures. Following a holistic, project-based learning approach that bridges the gap between engineering education and professional practice, the design of each building component is presented in a way such that the reader can see how each element fits into the entire building design and construction process. Structural details and practical example exercises that realistically mirror what obtains in professional design practice are presented.

Probabilistic Tsunami Hazard and Risk Analysis Katsuichiro Goda, Raffaele De Risi, Aditya Riadi Gusman, Ioan Nistor, 2024-10-31 Probabilistic Tsunami Hazard and Risk Analysis: Towards Disaster Risk Reduction and Resilience covers recent calls for advances in quantitative tsunami hazard and risk analyses for the synthesis of broad knowledge basis and solid understanding of interdisciplinary fields, spanning seismology, tsunami science, and coastal engineering. These new approaches are essential for enhanced disaster resilience of society under multiple hazards and changing climate as tsunamis can cause catastrophic loss to coastal cities and communities globally. This is a low-probability high-consequence event, and it is not easy to develop effective disaster risk reduction measures. In particular, uncertainties associated with tsunami hazards and risks are large. The knowledge and skills for quantitative probabilistic tsunami hazard and risk assessments are in high demand and are required in various related fields, including disaster risk management (governments and local communities), and the insurance and reinsurance industry (catastrophe model). - Focuses on fundamentals on probabilistic tsunami hazard and risk analysis - Includes case studies covering a wide range of applications related to tsunami hazard and risk assessments - Covers tsunami disaster risk management
