## Steven Otfinoski

*Television* R. W. Burns, 1998 This book presents a balanced, thorough history of television to 1940, considering the factors technical, financial and social which influenced and led to the establishment of many of the world's high-definition TV broadcasting services. This is a major book in the study of history of science, technology and media.

**The History of Television, 1942 to 2000** Albert Abramson, 2007-09-29 Albert Abramson published (with McFarland) in 1987 a landmark volume titled *The History of Television, 1880-1941* (massive...research--Library Journal; voluminous documentation--Choice; many striking old photos--The TV Collector). At last he has produced the follow-up volume; the reader may be assured there is no other book in any language that is remotely comparable to it. Together, these two volumes provide the definitive technical history of the medium. Upon the development in the mid-1940s of new cameras and picture tubes that made commercial television possible worldwide, the medium rose rapidly to prominence. Perhaps even more important was the invention of the video tape recorder in 1956, allowing editing, re-shooting and rebroadcasting. This second volume, 1942 to 2000 covers these significant developments and much more. Chapters are devoted to television during World War II and the postwar era, the development of color television, Ampex Corporation's contributions, television in Europe, the change from helical to high band technology, solid state cameras, the television coverage of Apollo II, the rise of electronic journalism, television entering the studios, the introduction of the camcorder, the demise of RCA at the hands of GE, the domination of Sony and Matsushita, and the future of television in e-cinema and the 1080 P24 format. The book is heavily illustrated (as is the first volume).

**History of Television** M. M. Eboch, 2015-01-01 This title examines television's origin in the United States, the ways different networks and shows have shaped history, and how it has grown to capture the nation's attention. Special features include a timeline, Art Spotlights, infographics, and fact bubbles. Aligned to Common Core Standards and correlated to state standards. Essential Library is an imprint of Abdo Publishing, a division of ABDO.

**The Box** Jeff Kisseloff, 1995 Here are household names and fascinating unknowns, from the brilliant RCA scientists, flying paper airplanes off the top of the Empire State Building, to Uncle Miltie, Rod Steiger, Imogene Coca, Studs Terkel, Edward R. Murrow, and Paddy Chayefsky. Go behind the scenes of many of television's classic shows and learn whether Father really did know best, and laugh at the hilarious low-budget antics of Captain Video (remember the opticon

scillometer?).

**Television** Anthony Smith, Richard Paterson, 1998 From its earliest beginnings, television was destined to become one of the great new forces at work in the twentieth century. This new edition (which includes six completely new chapters) greatly expands the original and unique historical coverage of this most influential cultural phenomenon. Written by a distinguished international team of specialists, the book describes the history of television from its technical conception in the nineteenth century right through to the bewildering multi-media developments of the present. Alongside this historical account, chapters provide important discussion of the central debates affecting television world-wide, from America, Canada, and Britain to Europe, Scandinavia, Japan, China, South Asia, the Arab world, Australia, Africa, and the Third World. All genres of programme making--news, sport, drama, comedy--are examined in the light of key questions: how viewing practices affect particular societies; how standards of taste and decency are arrived at; the influence of television of government power; the role of public service broadcasting; and the relationship of television to terrorism and violence. A thought-provoking Epilogue ponders the likely impact and influence of television in the coming years. This book is accessibly written and is a major exploration of the world's most dominant medium.

QUOTES FROM THE FIRST EDITION 'Those who wish to take a close look at the way television has affected the lives of people in other countries as well as their own will find all the information they need here . . . a work which will earn its keep in the reference libraries, but also merits a place on the bookshelves of individuals.' THES 'For those desiring to fully understand the medium that has dominated the later twentieth century.' The Business of Film 'What a terrific assembly of contributors to document an international story of television . . . so many outstanding features in this book . . . an important addition to documenting the global story of television in a single volume.'

**Television Histories** Gary R. Edgerton, Peter C. Rollins, 2014-10-17 From Ken Burns's documentaries to historical dramas such as Roots, from A&E's Biography series to CNN, television has become the primary source for historical information for tens of millions of Americans today. Why has television become such a respected authority? What falsehoods enter our collective memory as truths? How is one to know what is real and what is imagined—or ignored—by producers, directors, or writers? Gary Edgerton and Peter Rollins have collected a group of essays that answer these and many other questions. The contributors examine the full spectrum of historical genres, but also institutions such as the History Channel and production histories of such series as The Jack Benny Show, which ran for fifteen years. The authors explore the tensions between popular history and professional history, and the tendency of some academics to declare the past off limits to nonscholars. Several of them point to the tendency for television histories to embed current concerns and priorities within the past, as in such popular shows as Quantum Leap and Dr. Quinn, Medicine Woman. The result is an insightful portrayal of

the power television possesses to influence our culture.

**Television Talk** Bernard M. Timberg, Robert J. Erler, 2010-01-01 A CHOICE Outstanding Academic Book Flip through the channels at any hour of the day or night, and a television talk show is almost certainly on. Whether it offers late-night entertainment with David Letterman, share-your-pain empathy with Oprah Winfrey, trash talk with Jerry Springer, or intellectual give-and-take with Bill Moyers, the talk show is one of television's most popular and enduring formats, with a history as old as the medium itself. Bernard Timberg here offers a comprehensive history of the first fifty years of television talk, replete with memorable moments from a wide range of classic talk shows, as well as many of today's most popular programs. Dividing the history into five eras, he shows how the evolution of the television talk show is connected to both broad patterns in American culture and the economic, regulatory, technological, and social history of the broadcasting industry. Robert Erler's *A Guide to Television Talk* complements the text with an extensive who's who listing of important people and programs in the history of television talk.

The History of Television, 1880 to 1941 Albert Abramson, 1987 It would be difficult to cite any technological innovation whose impact on the fabric of daily living has been as pervasive as that of television. Within a few decades after its invention, television was providing, literally, a window to the world. A sole inventor of television does not exist. Instead, it came about through a remarkable interaction of several hundred scientists. Interviews with the scientists whose imagination and enterprise combined to make television a reality, extensive archival research worldwide, and rare photos make this book the one definitive history and the only authoritative account. Early inventions, the first devices, early camera tubes, the mechanical era, the kinescope, the iconoscope, and more. Extensive references.

Taylor, Nicholas Pronay, 2001 The collected essays in this book arose out of the groundbreaking conference of the International Association of Media and History, which brought together key academics and program makers from around the world involved in history and television, including Nicholas Pronay, Pierre Sorlin, and Taylor Dowling. *Blue Skies* Patrick Parsons, 2008-04-05 Cable television is arguably the dominant mass media technology in the U.S. today. *Blue Skies* traces its history in detail, depicting the important events and people that shaped its development, from the precursors of cable TV in the 1920s and '30s to the first community antenna systems in the 1950s, and from the creation of the national satellite-distributed cable networks in the 1970s to the current incarnation of info-structure that dominates our lives. Author Patrick Parsons also considers the ways that economics, public perception, public policy, entrepreneurial personalities, the social construction of the possibilities of cable, and simple chance all influenced the development of cable TV. Since the 1960s, one of the pervasive visions of cable has been of a ubiquitous, flexible, interactive communications system capable of providing news, information, entertainment, diverse local programming, and even social services. That set of utopian hopes became known as the *Blue Sky* vision of cable television, from which the book takes its title. Thoroughly documented and carefully researched, yet lively, occasionally humorous, and consistently insightful, *Blue Skies* is the genealogy of our media society.
