The Vocabulary of Modern French Hilary Wise,2003-10-04 The Vocabulary of Modern French provides a fresh insight into contemporary French. With this book, Hilary Wise offers the first comprehensive overview of the modern French vocabulary: its historical sources, formal organisation and social and stylistic functions. Topics covered include: * external influences on the language * word formation * semantic change * style and register In addition, the author looks at the relationship between social and lexical change and examines attempts at intervention in the development of the language. Each chapter is concluded by notes for further reading, and by suggestions for project work which are designed to increase awareness of specific lexical phenomena and enable the student-reader to use lexicographic databases of all kinds. The Vocabulary of Modern French is an accessible and fascinating study of the relationship between a nation and its language, as well as providing a key text for all students of modern French.

Dictionnaire culturel du sport Michaël Attali,Jean Saint-Martin,2010-06-23 Composante essentielle de la vie contemporaine, le sport pénètre désormais l'ensemble des univers de la vie individuelle et collective. On le pratique en amateur, en professionnel, en spectateur, on en parle en famille, entre amis... Unique en son genre, il constitue un ouvrage de référence, de découverte et de réflexion, en phase avec la reconnaissance du sport comme élément culturel fondamental. - 300 entrées couvrant toute la sphère sportive : activités physiques, sportives et artistiques, institutions et compétitions, enjeux, idéologies et représentations - Des références bibliographiques permettant de prolonger la réflexion - Des renvois intelligents

French Today Carol Sanders,1993-04-08 French Today is a profile of the French language in its social context. British and French linguists examine trends in French throughout the French-speaking world, and address issues around

prescriptivism, gender and language, and regional languages and dialects. The collection includes overviews of work done in particular areas and deeper analyses of sociolinguistic questions. One theme is how to represent and interpret data relating to language varieties that have been marginalised. Another concerns the ways in which French is adapting to the future, whether as a language of new technology, or as a vehicular language on the continent. All chapters of this book are in English, with examples and quotations in French, and a mixture of references given in both languages. At the end of each chapter, there are also texts in French, serving as illustration and as pointers to further reading.

Thinking English Grammar Xavier Dekeyser,1999 Thinking English Grammar. To Honour Xavier Dekeyser, Professor Emeritus contains papers by 34 colleagues of professor Dekeyser on subjects that have interested him throughout his career. His research has mainly been devoted to the history of English, and it is only natural that the first and longest section should consist of 11 papers on variation in English, both diachronic and synchronic. The second, barely shorter with its 9 papers, is devoted to the description of various aspects of modern English; some of these papers shade off into theoretical linguistics. Professor Dekeyser having obtained his Ph.D. on grammaticography, there is a third section on Grammar from the Past, with 5 papers. The final section, 9 papers on Language Teaching and Contrast, honours the eminent teacher of literally thousands of budding anglicists.

Du latin à l'anglais Paul Crouzet,Armand Fournier,1929

Historical Linguistics 1987 Henning Andersen,E.F.K. Koerner,1990-01-01 The volume contains 37 papers originally presented at the 8th International Conference on Historical Linguistics in Lille, France. The papers bring historical data to bear on issues in theoretical linguistics, both descriptive and diachronic or deal with specific questions in the history of individual languages. The theoretical issues range from phonology over morphology and syntax to the lexicon, as well as questions of historical dialectology, language contact, the theory of linguistic change, and problems of comparative

reconstruction. The languages discussed are Finno-Ugric and Indo-European, most of the papers dealing with Germanic and Romance languages (especially English and French), but some being devoted to Greek, Celtic, Slavic, and Hittite.
