**FIDIC Contracts in Asia Pacific** Donald Charrett, 2021-11-29 FIDIC contracts are the most widely used contracts for international construction around the world and are used in many different jurisdictions, both common law and civil law. For any construction project, the General Conditions of Contract published by FIDIC need to be supplemented by Particular Conditions that specify the specific requirements of that project subject to the relevant laws. FIDIC Contracts in Asia Pacific provides readers with detailed guidance and resources for the preparation of the Particular Conditions that will comply with the requirements of the applicable laws for a number of the jurisdictions in which FIDIC contracts are used. The laws that apply to the governing law of the contract, construction works and dispute resolution in each jurisdiction are identified. This book offers chapters on the FIDIC Conditions of Contract for Underground Works, and the perspective of a bilateral aid agency on the use of FIDIC contracts. Each jurisdiction features an outline of its construction industry and information on the impact of Covid-19 on both the execution of construction projects and the operation of construction contracts. This book is essential reading for construction professionals, lawyers and students of construction law using FIDIC contracts.

International Business Information Michael Halperin, Ruth A. Pagell, 2024-02-02 This newly updated and expanded edition of a reference bestseller is the only work available that guides business researchers and librarians to the most valuable sources for information on international business--and shows how to interpret and use that data. The authors discuss the best available resources and how to use them to find answers to a wide range of questions about international business. They also describe business practices in various regions and countries, the basics of international trade and finance, international business organizations, and relevant political departments and agencies. Many exhibits and tables are included, and the book's appendices include glossaries, checklists for evaluating sources, and sample disclosure documents.

International Business Information Ruth A. Pagell, Michael Halperin, 1999 Changes in the economy required business professionals and researchers to learn about new sources of information, as well as to expand their understanding of international business subjects. The sources, language, document coding, and definitions are different -- truly foreign. *International Business Information* was written to help business .....

The International Law of Investment Claims Zachary Douglas, 2009-06-11 The *International Law of Investment Claims* considers the distinct principles governing the prosecution of a claim in investment treaty arbitration. The principles are codified as 54 'rules' of general application on the juridical foundations of investment treaty arbitration, the jurisdiction of the tribunal, the admissibility of claims and the laws applicable to different aspects of the investment dispute. The commentary to each proposed rule contains a critical analysis of the investment treaty jurisprudence and makes extensive reference to the decisions of other international courts and tribunals, as well as to the relevant experience of municipal legal orders. Solutions are elaborated in respect of the most intractable problems that have arisen in the cases, including: the effect of an exclusive jurisdiction clause in an investment agreement with the host state; reliance on the MFN clause in relation to jurisdictional provisions; and, the legitimate scope of derivative claims by shareholders.

*Foreign Investment and the Environment in International Law* Jorge E. Viñuales, 2012-09-13 Conflicts between foreign investment law and environmental law are becoming increasingly frequent. On the one hand, the rise of environmental regulation poses significant challenges to foreign investors in several industries. On the other, the surge in investment arbitration proceedings is making States aware of the important litigation risks that may result from the adoption of

environmental regulation. This study of the relationship between these two areas of law adopts both a policy and a practical perspective. It identifies the major challenges facing States, foreign investors and their legal advisers as a result of the potential friction between investment law and environmental law and provides a detailed analysis of all the major legal issues on the basis of a comprehensive study of the jurisprudence from investment tribunals, human rights courts and bodies, the ICJ, the WTO, the ITLOS, the CJEU and other adjudication mechanisms.

**Yearbook of Private International Law** Petar Sarcevic, 2005-07-13 The Yearbook of Private International Law series, an annual publication now published by Sellier. European Law Publishers in cooperation with the Swiss Institute of Comparative Law, provides analysis and information on private international law (PIL) developments world-wide. This sixth volume looks rather Euro-centric, due to the impressive and continuous rhythm at which the creation of a European system of PIL is progressing at the European Community level. Contributions include discussion of the proposal for a Rome II regulation on conflict of laws in torts, as well as an analysis of the Avello decision, which could create a new framework for the development of PIL in Europe. Additional articles focus on the national conflict systems of some European states. An important comparative study discusses the treatment of foreign tax laws and judgments in four major European countries- United Kingdom, Germany, France, and Italy. The actual and controversial issue of registered partnership is discussed from the perspective of Spanish law. Additionally, an English translation of the latest national PIL codification-the recent Belgian Code-is included.

**The Environment Encyclopedia and Directory 2001** Europa Publications, 2001 Charts the emerging world awareness of environmental issues. Provides an A-Z glossary of key terms, a comprehensive directory, an extensive bibliography, detailed maps and a Who's Who.

**International Investment Law and the Global Financial Architecture** Christian J. Tams, Stephan W. Schill, Rainer Hofmann, 2017-02-24 This book explores whether investment law should protect against such regulatory measures, including where these have the support of multilateral institutions. It considers where the line should be drawn between legitimate regulation and undue interference with investor rights and, equally importantly, who draws it.
