**Reformas Laborales Y Económicas en América Latina Y El Caribe**, 1995 Over the past decade, most countries in the Latin America and Caribbean Region have stabilized their economies and lowered barriers to international trade. Many of the policies aimed at reducing poverty and tackling inequality in the 1960-1980 period were well intentioned, but the region made little or no progress in improving income distribution. With the recent shift toward market orientation and openness to international trade, these countries will need a new approach to labor policy as well as different instruments for addressing income distribution goals. This report gives special attention to four areas of labor policy: 1) change from direct government intervention in wage determination and strict seniority rules to a system that rewards effort, high productivity, and good management within a framework that relies on voluntary negotiation of working conditions between workers and firms; 2) replacement of job security legislation by a more effective mechanism that protects workers when they change jobs; 3) careful design of mandatory contributions to social security and other programs in order to minimize the distortionary effect of labor taxes; and 4) redirecting of government subsidies for training and education to the demand side and targeting to those who cannot afford to pay.

*Las políticas de mercado de trabajo y sus evaluaciones en Chile* Guillermo García-Huidobro, 2002 En este documento se

presenta la experiencia chilena sobre políticas públicas orientadas hacia el mercado de trabajo, tanto de naturaleza pasiva como activa. El período cubierto se centra principalmente en la década de los noventa; sin embargo, rescata las primeras experiencias de políticas de creación directa de empleos de parte del Estado desde 1975, y se adentra en el nuevo conjunto de políticas emprendidas durante los años 2000, incluyendo el recientemente iniciado seguro de desempleo en el año 2002. Se exponen las principales experiencias de evaluación de este tipo de programas, desde las experiencias de monitoreo y seguimiento hasta la aplicación de las técnicas de evaluación de impacto más avanzadas.

En este libro se plantea que el objetivo central de la institucionalidad laboral es contribuir a generar empleos de calidad.
