Caribbean Modernist Architecture Gustavo Luis Moré, 2010 In February and March 2008, the International Program and the Department of Architecture and Design at The Museum of Modern Art organised the Museum's first symposium on the modernist architecture of the Caribbean and bordering Latin American countries, in collaboration with the Caribbean School of Architecture at the University of Technology, Kingston, Jamaica. The goal was to encourage scholarly, curatorial and broader educational awareness. Topics covered included regional and international legacies, preservation, environmental sustainability and urban planning, as they relate to modernist architectural history and contemporary practice. The presenters were leading architects and architectural historians from the region, and attendees included their colleagues as well as local and international university students, policy makers, civic leaders and developers from Jamaica, the surrounding Caribbean islands and the United States. This illustrated volume, co-published by MoMA and Archivos de Arquitectura Antillana (AAA), an architectural journal based in the Dominican Republic, presents the papers from this critical symposium in both English and Spanish, making them accessible to a broader public.

Marginal Urbanisms Felipe Hernández, 2017-05-11 This volume reflects on urban development strategies that have been implemented recently in Latin America. Over the past twenty years, there has been great improvement in governmental efficiency, with local and national governments executing important projects that increase the quality of life in cities. However, the causes of collective disadvantage – which created the problems governments attempt to resolve – continue to affect many people throughout the continent. Thus, the essays here examine a wide range of socioeconomic, political, ethnic and historical issues that have influenced the emergence of marginal urbanisms in Latin American cities. The argument most strongly presented in this book is that infrastructural insertions need to be considered as the baseline for urban development, not as its main goal. Urban infrastructure cannot be taken as the only target for urban development programmes, but rather as an instrument for achieving more significant, and inclusive, urban transformations that respond more adequately to the realities of the people who inhabit Latin American cities.

Barragán,2018-11-14 Este trabajo no es resultado de una investigación académica exhaustiva, sino fruto de la experiencia de más de 60 años de práctica profesional y más de 50 en la docencia, cuyo objetivo es proporcionar material didáctico que, a través de un lenguaje sencillo, plantee los conocimientos básicos que debe tener todo profesional de la transdisciplina del urbanismo. Es importante resaltar la necesidad de contemplar al urbanismo no como una disciplina, sino como una transdisciplina, en el sentido que Edgar Morín menciona en el prólogo de Los siete saberes necesarios para la educación del futuro, en donde indica que la visión fragmentada de las disciplinas obstaculiza la elaboración de conexiones entre las partes y el todo, por lo cual habrá que buscar una forma de conocimiento que permita su mayor comprensión e interrelación. En vista de la complejidad del tema urbano, éste sólo será posible de entender si se vincula el conocimiento de las distintas disciplinas en torno suyo. Es por esto que la propuesta didáctica se basa en la tesis que Morín expone en la mencionada obra.

Diego Rivera, Luis Barragán und Mathias Goeritz geht Kirsten Einfeldt den Einflüssen zeitgenössischer Identitätsdiskurse auf Kunst im öffentlichen Raum in Mexiko nach. Neben Skulpturen und Wandbildern der 1950er bis 1980er Jahre ist die Konzeptkunst zahlreicher Kollektive aus der Zeit der mexikanischen Studentenbewegung Gegenstand der Untersuchung. Die Studie wertet Archivmaterial aus und basiert auf einer Feldforschung der Autorin sowie auf zahlreichen Interviews mit Künstlern, Kritikern, Historikern und anderen Experten und bietet damit erstmalig einen Überblick über die öffentliche Kunst der mexikanischen Moderne.

Temas metropolitanos selectos : territorio, derechos urbanos y vivienda, 2024-06-12 El libro explora procesos y fenómenos arquitectónicos-urbanos que se cuestionan a través de problemáticas complejas que acontecen en diferentes regiones metropolitanas a nivel nacional e internacional. La manera de aproximarse a la comprensión del territorio es visualizando los intereses económicos, sociales, culturales, entre otros, así como las perspectivas que desembocan en visiones o maneras de analizar las ciudades. La visión académica adecua la detección de problemas y procesos metodológicos en la investigación para cuestionar los procesos en las ciudades, así como las maneras de argumentar posibles soluciones que ayuden a comprender de mejor forma el impacto del contexto urbano en el hábitat de las personas, y que estén enfocadas en tres directrices: territorio, derechos urbanos y vivienda, que en su conjunto construyen el desarrollo de las zonas metropolitanas. Esta obra recopila una serie de investigaciones académicas de diferentes universidades internacionales y nacionales que cuestionan, valoran, intervienen y proponen diferentes panoramas en regiones cuyas problemáticas acentúan circunstancias y contingencias emergentes para el desarrollo social, económico, sostenible, habitacional, las cuales articulan puntos de reflexión para la construcción de calidad de vida en zonas metropolitanas.
