The Max Planck Handbooks in European Public Law: Volume I: The Administrative State Sabino Cassese, Armin von Bogdandy, Peter Huber, 2017-07-25 The Max Planck Handbooks in European Public Law series describes and analyses the public law of the European legal space, an area that encompasses not only the law of the European Union but also the European Convention on Human Rights and, importantly, the domestic public laws of European states. Recognizing that the ongoing vertical and horizontal processes of European integration make legal comparison the task of our time for both scholars and practitioners, it aims to foster the development of a specifically European legal pluralism and to contribute to the legitimacy and efficiency of European public law. The first volume of the series begins this enterprise with an appraisal of the evolution of the state and its administration, with cross-cutting contributions and also specific country reports. While the former include, among others, treatises on historical antecedents of the concept of European public law, the development of the administrative state as such, the relationship between constitutional and administrative law, and legal conceptions of statehood, the latter focus on states and legal orders as diverse as, e.g., Spain and Hungary or Great Britain and Greece. With this, the book provides access to the systematic foundations, pivotal historic moments, and legal thought of states bound together not only by a common history but also by deep and entrenched normative ties; for the quality of the *ius publicum europaeum* can be no better than the common understanding European scholars and practitioners have of the law of other states. An understanding thus improved will enable them to operate with the shared skills, knowledge, and values that can bring to fruition the different processes of European integration.

Law and Veganism Carlo Prisco,Jeanette Rowley,2021-11-02 In our complex, consumerist societies, the intricacy of personal interactions and the number of goods and products available often prevents us from direct knowledge of what lies 'behind' food behaviors, ingredients, and the origins of the modern food and agriculture supply chain. Over the last decade or so, scholars, lawyers and engaged lay vegans have had many discussions about vegan rights and discrimination as issues intrinsic to animal rights, but the final frontier remains intact: the direct concerns of other animals. To give effect to the rights of animals, we must recognize and defend the human right—or duty, as many uphold-- to care about them. Including contributors from Australia, the United States, Germany, Italy, France, Canada, Portugal, and the United Kingdom, this book explores the rights of vegans and how vegans can be protected from discrimination. Using an international socio-legal lens, the contributors discuss constitutional issues, vegan legal cases, the concept of protection for vegan 'belief' in human rights

and equality law, the legal requirement to provide vegan food, animal agriculture and plant-based, vegan food in the context of the human right to food, and the rights of vegans in education and in health care. This book will be of interest to practicing lawyers, legal and critical legal scholars, scholars of vegan, and critical animal studies, and commentators on socio-political issues alike.

Consuming the Inedible Jeremy M. MacClancy, Jeya Henry, Helen Macbeth, 2007-12-01 Everyday, millions of people eat earth, clay, nasal mucus, and similar substances. Yet food practices like these are strikingly understudied in a sustained, interdisciplinary manner. This book aims to correct this neglect. Contributors, utilizing anthropological, nutritional, biochemical, psychological and health-related perspectives, examine in a rigorously comparative manner the consumption of foods conventionally regarded as inedible by most Westerners. This book is both timely and significant because nutritionists and health care professionals are seldom aware of anthropological information on these food practices, and vice versa. Ranging across diversity of disciplines Consuming the Inedible surveys scientific and local views about the consequences - biological, mineral, social or spiritual - of these food practices, and probes to what extent we can generalize about them.

Representing Italy Through Food Peter Naccarato, Zachary Nowak, Elgin K. Eckert, 2017-03-09 Italy has long been romanticized as an idyllic place. Italian food and foodways play an important part in this romanticization – from bountiful bowls of fresh pasta to bottles of Tuscan wine. While such images oversimplify the complex reality of modern Italy, they are central to how Italy is imagined by Italians and non-Italians alike. *Representing Italy through Food* is the first book to examine how these perceptions are constructed, sustained, promoted, and challenged. Recognizing the power of representations to construct reality, the book explores how Italian food and foodways are represented across the media – from literature to film and television, from cookbooks to social media, and from marketing campaigns to advertisements. Bringing together established scholars such as Massimo Montanari and Ken Albala with emerging scholars in the field, the thirteen chapters offer new perspectives on Italian food and culture. Featuring both local and global perspectives – which examine Italian food in the United States, Australia and Israel – the book reveals the power of representations across historical, geographic, socio-economic, and cultural boundaries and asks if there is anything that makes Italy unique. An important contribution to our understanding of the enduring power of Italy, Italian culture and Italian food – both in Italy and beyond. Essential reading for students and scholars in food studies, Italian studies, media studies, and cultural studies.

Food Safety and Technology Governance Kuei-Jung Ni, Ching-Fu Lin, 2022-08-31 Recent advances in agri-food technology have brought increasing complexity and emerging challenges to food safety regulation and governance, with many countries greatly divided in their regulatory approaches. As more advanced CRISPR-based gene-editing technologies and novel foods such as cloned animal products, non-traditional plants, nanofood, and plant-based meat are rapidly being developed, debates arise as to whether the existing models of governance require revision to ensure consumer safety. Of equal importance is the extensive use of pesticides, additives, and animal drugs, which raise concerns over the methods and approaches of government approval and phasing out of potentially risk-causing chemicals. Heightened public criticism of food safety and technology poses a significant challenge to governments around the world, which struggle to strike a proper balance

between technocracy- and democracy-oriented risk governance models. Drawing on expertise from the United States, European Union, Japan, China, Korea, Association of South East Asian Nations, Malaysia, and Taiwan, this book explores existing and emerging issues of food law and policy in the context of technology governance to offer an overarching framework for the interaction between food regulation and technology. It will be essential reading for academics, students, and practitioners with an interest in food law and policy, agricultural law and policy, and food safety and nutrition studies.
