Entropy in Image Analysis Amelia Carolina Sparavigna,2019-06-24 Image analysis is a fundamental task for extracting information from images acquired across a range of different devices. Since reliable quantitative results are requested, image analysis requires highly sophisticated numerical and analytical methods—particularly for applications in medicine, security, and remote sensing, where the results of the processing may consist of vitally important data. The contributions to this book provide a good overview of the most important demands and solutions concerning this research area. In particular, the reader will find image analysis applied for feature extraction, encryption and decryption of data, color segmentation, and in the support new technologies. In all the contributions, entropy plays a pivotal role.

Relating Continents Romana Radlwimmer, 2023-10-04 During early modern European expansion, America emerged as dynamic meeting ground, continuously forging multidirectional global encounters. *Relating Continents* dismisses the semantics of 'encounter' which, in the politics of naming, euphemistically substitutes invasive violence, but invests in the notion's dimension as an enactment of literary, cultural, and social relations, fusing people, goods, texts, artifacts, ideas, and senses of belonging. Understanding the practice of relating as both connecting and narrating, this anthology investigates the linking of continents in Romance literary and cultural history, as well as the tales of entanglement produced in the process. The contributors revisit the worldwide impact of distant or in-person negotiations between conquerors and local actors; they assess how colonial interventions shift hemispheric native networks, and they examine the ties between America, Africa, and Asia. By doing so, they prove the global constitution of early modern Spanish and Portuguese American literatures, their historical and cultural contexts, and their long-lasting legacies.

Encyclopedia of Latino Culture Charles M. Tatum, 2013-11-26 This three-volume encyclopedia describes and explains the variety and commonalities in Latina/o culture, providing comprehensive coverage of a variety of Latina/o cultural forms—popular culture, folk culture, rites of passages, and many other forms of shared expression. In the last decade, the Latina/o population has established itself as the fastest growing ethnic group within the United States, and constitutes one of the largest minority groups in the nation. While the different Latina/o groups do have cultural commonalities, there are also many differences among them. This important work examines the historical, regional, and ethnic/racial diversity within specific traditions in rich detail, providing an accurate and comprehensive treatment of what constitutes the Latino experience in America. The entries in this three-volume set provide accessible, in-depth information on a wide range of topics, covering cultural traditions including food; art, film, music, and literature; secular and religious celebrations; and religious beliefs and practices. Readers will gain an appreciation for the historical, regional, and ethnic/racial diversity within specific Latina/o traditions. Accompanying sidebars and spotlight biographies serve to highlight specific cultural differences and key individuals.

Imagined Transnationalism K. Concannon, F. Lomelí, M. Priewe, 2009-11-09 With its focus on Latina/o communities in the United States, this collection of essays identifies and investigates the salient narrative and aesthetic strategies with which an individual or a collective represents transnational experiences and identities in literary and cultural texts.

Postcards from the Chihuahua Border Daniel D. Arreola, 2019-10-29 Just a trolley ride from El Paso, Ciudad Juárez was a popular destination in the early 1900s. Enticing and exciting, tourists descended on this and other Mexican border towns to browse curio shops, dine and dance, attend bullfights, and perhaps escape Prohibition America. In *Postcards from the Chihuahua Border* Daniel D. Arreola captures the exhilaration of places in time, taking us back to Mexico's northern border towns of Ciudad Juárez, Ojinaga, and Palomas in the early twentieth century. Drawing on more than three decades of archival work, Arreola uses postcards and maps to unveil the history of these towns along west Texas's and New Mexico's southern borders. Postcards offer a special kind of visual evidence. Arreola's collection of imagery and commentary about them shows us singular places, enriching our understandings of history and the history of change in Chihuahua. No one postcard tells the entire story. But image after image offers a collected view and insight into changing perceptions. Arreola's geography of place looks both inward and outward. We see what tourists see, while at the same time gaining insight about what postcard photographers and postcard publishers wanted to be seen and perceived about these border communities. *Postcards from the Chihuahua Border* is a colorful and dynamic visual history. It invites the reader to time travel, to revisit another era—the first half of the last century—when these border towns were framed and made popular through picture postcards.

Advances in Artificial Intelligence Grigori Sidorov, Arturo Hernández Aguirre, Carlos Alberto Reyes Garcia, 2010-10-21 Artificial intelligence (AI) is a branch of computer science that models the human ability of reasoning, usage of human language and organization of knowledge, solving problems and practically all other human intellectual abilities. Usually it is characterized by the application of heuristic methods because in the majority of cases there is no exact solution to this kind of problem. The Mexican International Conference on Artificial Intelligence (MICA), a yearly international conference series organized by the Mexican Society for Artificial Intelligence (SMIA), is a major international AI forum and the main event in the academic life of the country's growing AI community. In 2010, SMIA celebrated 10 years of activity related to the organization of MICA as is represented in its slogan: "Ten years on the road with AI". MICA conferences traditionally publish high-quality papers in all areas of artificial intelligence and its applications. The proceedings of the previous MICA events were also published by Springer in its Lecture Notes in Artificial Intelligence (LNAI) series, vols. 1793, 2313, 2972, 3789, 4293, 4827, 5317, and 5845. Since its foundation in 2000, the conference has been growing in popularity and improving in quality.

Frontiers In Electronics Sorin Cristoloveanu, Michael S Shur, 2009-08-06 Frontiers in Electronics contains the selected best papers presented at the Workshop on Frontiers in Electronics (WOFE-07). This meeting was the fifth in the series of WOFE workshops, and strongly reinforced the tradition of scientific quality and visionary research. The issues addressed ranged from THz and infrared electronics to nanoelectronics and photonics. The papers focused on the fabrication, characterization and applications of nanodevices; wide band gap structures; and state-of-the-art FETs. The participants also discussed the device physics and processing issues including aspects related to SOI and germanium-on-insulator technologies, TFTs, and advanced CMOS and MOSFETs. It is this cross-pollination between different but related fields that made this conference very special. This book, which goes beyond the publication of the WOFE Proceedings, includes full-length invited papers selected at the conference and reviewed by international leaders. The book is divided into four distinct

sections, with the common denominator throughout being the “nano-device”, present under various metamorphoses in the wide CMOS and optoelectronics arena./a

Making a Killing Alicia Gaspar de Alba, Georgina Guzmán, 2010-11-01 Since 1993, more than five hundred women and girls have been murdered in Ciudad Juárez across the border from El Paso, Texas. At least a third have been sexually violated and mutilated as well. Thousands more have been reported missing and remain unaccounted for. The crimes have been poorly investigated and have gone unpunished and unresolved by Mexican authorities, thus creating an epidemic of misogynist violence on an increasingly globalized U.S.-Mexico border. This book, the first anthology to focus exclusively on the Juárez femicides, as the crimes have come to be known, compiles several different scholarly interventions from diverse perspectives, including feminism, Marxism, critical race theory, semiotics, and textual analysis. Editor Alicia Gaspar de Alba shapes a multidisciplinary analytical framework for considering the interconnections between gender, violence, and the U.S.-Mexico border. The essays examine the social and cultural conditions that have led to the heinous victimization of women on the border—from globalization, free trade agreements, exploitative maquiladora working conditions, and border politics, to the sexist attitudes that pervade the social discourse about the victims. The book also explores the evolving social movement that has been created by NGOs, mothers' organizing efforts, and other grassroots forms of activism related to the crimes.

Contributors include U.S. and Mexican scholars and activists, as well as personal testimonies of two mothers of femicide victims.
