Routledge Handbook of Public Diplomacy Nancy Snow, Nicholas J. Cull, 2020-01-20 The second edition of the *Routledge Handbook of Public Diplomacy*, co-edited by two leading scholars in the international relations subfield of public diplomacy, includes 16 more chapters from the first. Ten years later, a new global landscape of public diplomacy has taken shape, with major programs in graduate-level public diplomacy studies worldwide. What separates this handbook from others is its legacy and continuity from the first edition. This first edition line-up was more military-focused than this edition, a nod to the work of Philip M. Taylor, to whom this updated edition is dedicated. This edition includes US content, but all case studies are outside the United States, not only to appeal to a global audience of scholars and practitioners, but also as a way of offering something fresher than the US/UK-centric competition. In Parts 1-4, original contributors are retained, many with revised editions, but new faces emerge. Parts 5 and 6 include 16 global case studies in public diplomacy, expanding the number of contributors by ten. The concluding part of the book includes chapters on digital and corporate public diplomacy, and a signature final chapter on the noosphere and noopolitik as they relate to public diplomacy. Designed for a broad audience, the *Routledge Handbook of Public Diplomacy* is encyclopedic in its range and depth of content, yet is written in an accessible style that will appeal to both undergraduate and postgraduate students.

Skilled Interpersonal Communication Owen Hargie, 2021-11-29 Established as the foremost textbook on communication, the seventh edition of Owen Hargie's *Skilled Interpersonal Communication* is thoroughly revised and updated with the latest research findings, theoretical developments and applications. The contribution of skilled interpersonal communication to success in both personal and professional contexts is now widely recognised and extensively researched. People have a deep-seated and universal need to interact with others, and the greater their communicative ability the more satisfying and rewarding will be their lives. The main focus of this book is on the identification, analysis and evaluation of the core skills needed in these interactions. The first two chapters provide details of the nature of interpersonal communication and socially

skilled performance, respectively, with a review of the main theoretical perspectives pertaining to each. The book then offers detailed accounts of the fourteen main skill areas: nonverbal communication, reinforcement, questioning, reflecting, listening, explaining, self-disclosure, set induction, closure, assertiveness, influencing, negotiating and interacting in and leading group discussions. The book concludes with a discussion on the ethical issues in interpersonal communication. This new edition also features an extended section on groupthink and analyses the impact of the coronavirus pandemic on aspects such as greeting patterns and the effectiveness of Project Fear by the UK government to secure citizen compliance. Written by one of the foremost international experts in the field, this is essential reading for students of interpersonal communication in general and to qualified personnel and trainees in many fields.

Leadership Communication as Citizenship John O. Burtis, Paul D. Turman, 2010 Leadership Communication articulates the important roles communication plays in helping to co-construct group, organizational, or community direction. Leadership Communication focuses on the communication skills necessary to help co-construct an effective direction in one's systems while playing the varied roles of doer, follower, guide, manager, and/or leader. Leadership Communication is organized around three major units: 1) the integrally linked role played by communication and direction-givers in constructing our past, current, and future experiences; 2) the communication skills required for different types of direction-givers, and 3) the nature of dramatic action, which represents human engagement in systems, that may manifest as ethical action and future experiences. This book has a number of unique features including: a coherent and unified set of frameworks with which to synthesize and employ a wide range of leadership research results and theory as well as other practical materials from contemporary leadership studies; a focus on explaining the common communicative elements and skills (e.g., soliciting and saving narratives for use as teaching tales, strategic stories, and memorable messages; framing and critical incidents; dialog, discussion, and debate) involved across seemingly quite different leadership contexts (e.g., working in groups, in small organizations, in large and complex organizations, in social movements, in communities, and in the broad cultural sweep of civic life); a discussion of the different processes for attaining a direction-giving role or position given the different needs faced by the system; an explanation of the art of following, doing, and guiding well: the small leadership so often overlooked or undervalued in leader-centric explanations for effective systems; an explanation of three different orientations for communicating the vision: selling a vision; working with those who are seeking a vision; and acting with those for whom a vision is an evoked co-construction; and a discussion of how crisis (as a point of decision or of opportunity) can be useful as a source of the energy and rhetorical resources necessary for rare and difficult forms of dramatic action (leadership).
