Manejo Integral de Psittaciformes Antonio Sciaibarrasi,2022-10-03 Los Psittaciformes ocupan un lugar importante en los ecosistemas y han existido de alguna forma desde el Eoceno medio. Debido a la exposición a factores ambientales diferentes a los de su medio y al manejo inadecuado en cautividad, estas aves son propensas a desarrollar anomalías que pueden comprometer su vida y su bienestar. Esto hace indispensable una formación integral del médico veterinario en todas las aristas concernientes al tratamiento de estos animales. Dentro del manejo integral de los Psittaciformes propuesto en este libro como una conjunción de conocimientos globales para con estas aves, se encuentran el control de su biología conjuntamente con su taxonomía y zootecnia, y los aspectos nutricional-alimenticio, reproductivo, comportamental y clínico-sanitario. Todas estas aristas del conocimiento hacen que los profesionales veterinarios necesiten capacitarse en ellos para garantizar así el bienestar animal y la salud no solo del individuo, sino también la de las poblaciones, comunidades y ecosistemas. La oportunidad de manejar diversas especies de Psittaciformes requiere un entrenamiento de gran calidad, por lo que este libro sin duda representa una herramienta que será un aliado fiel para todos aquellos profesionales que buscan una vida larga y saludable para estas aves ya sea en cuidado humano o en vida silvestre.

Aprender y no olvidar Francisco Revuelta,José Calvo Poyato,Juan Berga Monge,José Luis Corral Lafuente,Eva Díaz Pérez,Inés Doménech del Río,José Manuel García Moreno,José Enrique García Ramos,Gloria Lora Serrano,Wenceslao Peñate Castro,Félix Requena Santos,Rafael Torronteras Santiago,2022-10-27 Las desastres son comprensiblemente indeseados; sin embargo, es imposible escapar de muchos de ellos. Cada cierto tiempo, surge alguno con todo su potencial de destrucción y daño. Por eso es muy importante que, a todos los niveles, desde el más particular hasta el más elevado, se tomen las medidas necesarias para evitarlos -cuando sea posible-, y si suceden, para minimizar su impacto. Esta obra se propone aportar una serie de reflexiones que ayuden a alcanzar los objetivos mencionados. Los autores que han colaborado son expertos constatados en disciplinas muy variadas; en concreto, de la biología, la economía, la física, la historia, la medicina, el periodismo, la psicología y la sociología. Partiendo de ellas, pero transcendiéndolas con una visión multidisciplinar, exponen, con un estilo divulgativo y a la vez riguroso, lo que consideran que debemos aprender de los desastres y lo que no debemos olvidar, para ganar eficacia y eficiencia en su prevención, así como para mitigar sus consecuencias. Se trata de una obra necesaria, dirigida tanto a legos como a especialistas de las distintas materias que se abordan, que debería ser de referencia en el plano individual, social y político.

En este primer volumen se encuentran trabajos relacionados con la medicina veterinaria y la investigación en salud en esta región. Las temáticas son variadas y deben ser asumidas desde una apertura teórica, metodológica y procedural para alcanzar la comprensión del fenómeno en sus dimensiones y en sus contextos.

Singular Spaces Jo Farb Hernandez,2013 Published by leading outsider art imprint Raw Vision, Singular Spaces is a groundbreaking survey of art environments created by self-taught artists from across Spain. The book introduces and examines 45 artists and their idiosyncratic sculptures, gardens and buildings, most of which have never been published. The sites are developed organically, without formal architectural or engineering plans; they are at once evolving and complete. Often highly fanciful and quixotic, the work is frequently characterized by incongruous juxtapositions, an approach that appears impulsive and spontaneous. Director of the organization SPACES (Saving and Preserving Arts and Cultural Environments), Jo Farb Hernández, combines detailed case studies of the artists and their work with contextualized historical and theoretical references to art history, anthropology, architecture, Spanish area studies and folklore. Breaking down the standard compartmentalization of genres, she reveals how most creators of art environments, who are building within their own personal spaces, fuse their creations with their daily lives.

Biodiversidad de un bosque de galería en la Orinoquía colombiana Núñez Avellaneda, Luis Alberto,Castro Rebolledo, María Isabel,Lozano Ardila, Lucía Cristina,Mestre Carrillo, Gelys Igreth,2019-04-30 La Orinoquía es una de las regiones con mayor riqueza de fauna en Colombia. En ella se encuentra uno de los ecosistemas estratégicos y más vulnerables del país: los bosques de galería. Estos ecosistemas se reconocen como conectores de vida por su papel central en la conservación de los recursos naturales locales. A partir del trabajo de campo realizado por investigadores, estudiantes y egresados de la Universidad de La Salle, este libro presenta una aproximación a la diversidad de fauna de la Hacienda Matepantano, a través de la descripción de los grupos más representativos (macroinvertebrados, arácnidos, insectos, peces, anfibios, reptiles, aves, mamíferos terrestres y voladores) y del análisis de aspectos climáticos, del uso del suelo y de los sistemas productivos, en su estructura y función. Esta obra, más que un texto científico, está pensada para toda persona que quiera acercarse al conocimiento de la fauna presente en la Orinoquía colombiana, a través de maravillosas imágenes y descripciones generales de los organismos que allí habitan. History of Rabies in the Americas: From the Pre-Columbian to the Present, Volume II Charles E. Rupprecht, 2024-06-28

Rabies is one of the oldest known pathogens, is incurable, and has the highest fatality rate of all infectious diseases. The Americas is the only region with bat rabies virus, including vampire bat rabies. The region is rich in cultural references and notable for many discoveries in the field, including the current vaccine potency test, diagnostic assay, conception of oral vaccines for wildlife, the first human survivor and the first successful canine rabies program executed at a broad level. Rabies remains the most important viral zoonosis, with tens of thousands of human fatalities and tens of millions of exposures annually, which can be used to model for other pathogens, such as COVID-19. There is an international effort to eliminate human rabies caused by dogs over the next decade, and the Americas represent the primary region with the greatest proof-of-concept evidence to accomplish this goal. This two-volume set addresses the medical history and modern results of rabies in countries throughout the Americas, including the implications of and on cultural, economic, sociological, and research developments in the region. Volume II provides an in-depth analysis of the rabies' presence and impact in specific countries, including historical perspectives, advances in research and understanding, and current status.
