'John McDouall Stuart' Walter McDouall Stuart, 2000

John McDouall Stuart, Papers of John McDouall Stuart, explorer, comprising copies of two volumes of diaries 1859-1860, two letters, a memorandum about the naming of Central Mount Sturt [later Stuart], and copies of wills made by J. McDouall Stuart.

Explorations in Australia John McDouall Stuart, 2022-08-15 In *Explorations in Australia*, John McDouall Stuart chronicles his ambitious expeditions across the Australian continent in the mid-19th century, offering a vivid and meticulous account of his journey through uncharted territories. The book is characterized by its detailed observations and reflections on the landscape, flora, fauna, and indigenous cultures that Stuart encountered. His prose combines scientific rigor with the spirit of adventure, capturing the challenges and triumphs of exploration during a pivotal moment in Australian history, as various expedition narratives provided insight into a land both beautiful and harrowing. John McDouall Stuart, a Scottish explorer born in 1815, was driven by a profound curiosity and determination to contribute to the understanding of Australia's geography. His experiences as a surveyor and his interactions with indigenous peoples informed his approach to exploration, which emphasized respect and learning from the land and its inhabitants. Stuart's relentless pursuit of the illusive central route to Australia's north, despite numerous hardships, reflected a commitment not only to personal achievement but also to the advancement of exploratory knowledge. This book is a pivotal read for anyone interested in the history of exploration or Australian geography. It offers a unique perspective on the challenges faced by early explorers and serves as a vital contribution to the literature surrounding Australia's vast and diverse landscapes. Readers will find themselves transported into the heart of 19th-century exploration, gaining insights into the rhythms of a land that continues to captivate and inspire.

John McDouall Stuart and His Exploratory Work (research Paper). Bessie Threadgill, 1922 Lecture presented by B.T. Threadgill (Bessie) in the SA Institute Building on 19 October 1922, on the life of explorer, John McDouall Stuart.

Mr Stuart's Track John Bailey, 2006 On 14 May 1858, an expedition of discovery led by John McDouall Stuart departed from a copper mine located on the very edge of the known world in the North Flinders Ranges. The Australian continent

stretched for another 2,000 kilometres to the north and 2,500 to the west and no white man had the slightest idea of what was there. It was to be the first of six expeditions mounted by Stuart, then aged 42, as he sought to uncover the mysteries of the interior and forge a path to the north. Ultimately he was to become part of a race across the continent, his rivals being the Burke and Wills expedition. In the end Stuart was to be the first European to cross Australia from south to north and return again, as the cumbersome expedition of Burke and Wills turned from farce to tragedy. Yet his hero's homecoming was to be shortlived. MR STUART'S TRACK is a fascinating study of a loner, an explorer of no fixed abode, who battled alcoholism and ill-health to push himself to the limits of endurance in crossing straight through the red centre to the northern seas.

Explorers DK,2010-09-20 From the first people to leave Africa to the first to leave the planet, the urge to explore the unknown has driven human progress. Explorers tells the story of humanity's explorations, taking the reader into the lives of some of the most intrepid people ever known. Throughout history, exploration has arisen from a wide range of impulses, from trade and the search for lands to colonize, to scientific curiosity and missionary zeal. This book tells the story of explorers of every type, from those chasing glory to those seeking enlightenment. In its pages, readers will meet some of history's most famous trail blazers-people whose courage opened frontiers, turned voids into maps, forged nations, connected cultures, and

added to humankind's knowledge of the world by leaps and bounds. Each life is captured in context, by considering the knowledge of the world in which the explorers lived, the factors that gave rise to their expeditions, and the technology available to them at the time. Their discoveries, and the consequences, are also considered in depth, and highlighted with beautiful maps, photographs, and illustrations. The tales of the explorers' assistants and companions are woven into the overall story, along with an examination of the qualities that made them drop everything in pursuit of discovery.

European Discovery and Exploration of Australia Erwin Feeken, 2019-06-21 The map of Australia abounds with fascinating geographical place-names, the origins of which have, for long, been hidden in the journals of our early explorers. Now after nine years of research, Erwin Feeken, a highly qualified cartographer, and his wife, Gerda, have finalised the first complete record of Australian geographical place-names and the most comprehensive general reference work on Australian exploration ever published. In *European Discovery and Exploration of Australia*, there are twenty-three beautifully drawn four-colour maps plus index showing the routes of more than 120 explorers with the locality of their named features numbered to accord with a Key to the Maps. The place-names in the Key have been numbered approximately in chronological order of their naming, though places found during a single expedition have been grouped together. There is also a gazetteer containing over four thousand place-names alphabetically arranged with notes on their origins. The map reference numbers (in brackets) form a cross-reference with the Key to the Maps. The work is introduced by a foreword from Lord Casey and an essay on the nature of Australian exploration by Professor O. H. K. Spate, director of the Research School of Pacific Studies, Australian National University. The text, comprising a survey of Australian exploration, is arranged in the form of biographies of the explorers (describing, for the first time, several almost unknown figures) with emphasis on their expeditions and under the following headings: "The Approach to Australia"; "Exploration before Settlement, 1606-1788"; "From Botany Bay to the Blue Mountains, 1788-1813"; "Land and Sea Expeditions, 1813-1901." This section of the book is very fully illustrated with 18 full-colour plates and some 150 black-and-white photographs, mostly reproductions of early prints. Concluding the book are bibliographies of sources and references, a list of illustrations, and an index of explorers and ships. The comprehensive nature of this work will ensure that it becomes a valuable reference book for students, while the text and illustrations will appeal to all who are interested in our history. Collectors of Australiana will welcome this most attractive addition to the ever-increasing number of available publications.

Vol 2 Explorers From 1788 to the Present Linsie Tan,2017-09-01 Once the British had claimed Australia, explorers set out to discover what lay beyond the coastal settlements. Was there a large inland sea? Where did the rivers begin and end? Was there more land which the growing population of colonists could use for farming, or was there only desert in the centre of the country? Find out what drove the explorers to risk their lives to find out the answers to these questions. Discover the role the Australian Aboriginal population played, and their responses to the European explorers who were claiming land all across Australia. This two volume series delves into the interesting stories behind the exploration of Australia. Find out about the kangaroos kept by Emperor Napoleon's wife, and the cat that circumnavigated Australia with Matthew Flinders. With historic illustrations and easy-to-understand timelines, Explorers of Australia turns dusty history into fascinating stories.

Explorers Jon Balchin,2013-11-11 Fascinated by what lies beyond the boundaries of human experience, men and women have throughout history been irresistibly drawn to venture into the unknown. Explorers charts the astonishing feats of history's most intrepid pathfinders. From the early voyages of the Ancient Greek mariner Colaeus, who first discovered that beyond the Mediterranean lay a far greater ocean, to the compelling tale of the race for the poles. this book encompasses the discovery and exploration of the great continents and oceans of the world. Whether motivated by the prospect of conquest, the spirit of scientific inquiry, nationalism, fanaticism, or just plain curiosity, the explorers in this book dared to seek out the most remote and inhospitable places on Earth and in so doing changed forever our perception of the planet.
