The Four Workarounds Paulo Savaget, 2023-03-07 FINANCIAL TIMES' BEST SUMMER BOOKS OF 2023 Groundbreaking —Next Big Idea Club This book helps us live happier, successful, and more fulfilling lives. —Jenn Lim, CEO and cofounder of Delivering Happiness, and bestselling author of Beyond Happiness We constantly encounter complex problems at home, in our places of work, and in society at large. Even if we had all the time and money in the world, sometimes no good solution can be found. So, what should we do, especially when we can't wait? The answer: a workaround. For ages, global corporations have been lecturing small organizations and not-for-profits on how to get things done. As it turns out, it should have been the other way around. In this groundbreaking book, award-winning researcher Paulo Savaget shows how the most valuable lessons about problem-solving can be learned from the scrappiest groups. Savaget draws most of his examples from small organizations dedicated to social action that have made an art form out of subverting the status quo and have proved themselves adept at achieving massive wins with minimal resources. Through his research, Savaget identified the four

workarounds that these groups commonly employ: the piggyback, the loophole, the roundabout, and the next best. With vivid and fascinating examples from his life and travels, he demonstrates how each one works and how to know which one to use when. The Four Workarounds shows how seemingly intractable problems—from public urination to the challenges of delivering lifesaving medicine to remote communities—were addressed using unconventional tactics. Some of the world's biggest and most admired companies are already using Savaget's research to transform the ways they do business. And these same lessons can also revolutionize the ways we approach the challenges we all encounter every day of our lives.

The Death of Public Knowledge? Aeron Davis, 2017-08-11 A collection of short, sharp essays exploring the value of shared and accessible public knowledge in the face of its erosion. The Death of Public Knowledge argues for the value and importance of shared, publicly accessible knowledge, and suggests that the erosion of its most visible forms, including public service broadcasting, education, and the network of public libraries, has worrying outcomes for democracy. With contributions from both activists and academics, this collection of short, sharp essays focuses on different aspects of public knowledge, from libraries and education to news media and public policy. Together, the contributors record the stresses and strains placed upon public knowledge by funding cuts and austerity, the new digital economy, quantification and target-setting, neoliberal politics, and inequality. These pressures, the authors contend, not only hinder democracies, but also undermine markets, economies, and social institutions and spaces everywhere. Covering areas of international public concern, these polemical, accessible texts include reflections on the fate of schools and education, the takeover of public institutions by private interests, and the corruption of news and information in the financial sector. They cover the compromised Greek media during recent EU negotiations, the role played by media and political elites in the Irish property bubble, the compromising of government policy by corporate interests in the United States and Korea, and the squeeze on public service media in the United Kingdom, New Zealand, and the United States. Individually and collectively, these pieces spell out the importance of maintaining public, shared knowledge in all its forms, and offer a rallying cry for doing so, asserting the need for strong public, financial, and regulatory support. Contributors Toril Aalberg, Ian Anstice, Philip Augar, Rodney Benson, Aeron Davis, Des Freedman, Wayne Hope, Ken Jones, Bong-hyun Lee, Colin Leys, Andrew McGettigan, Michael Moran, Aristotelis Nikolaidis, Justin Schlosberg, Henry Silke, Roger Smith, Peter Thompson, Janine R. Wedel, Karel Williams, Kate Wright

Saying NO to a Farm-Free Future Chris Smaje, 2023-07-20 One of the few voices to challenge George Monbiot on the future of food and farming (and the restoration of nature) is academic, farmer and author of *A Small Farm Future* Chris Smaje. In *Saying NO to a Farm-Free Future*, Smaje presents his defence of agroecological, small-scale farming and a robust critique of Monbiot's vision for an urban and industrialised future. Responding to Monbiot's portrayal of an urban, high-energy, industrially manufactured food future as the answer to our current crises, and its unchallenged acceptance within the environmental discourse, Smaje was compelled to challenge Monbiot's evidence and conclusions. At the same time, Smaje presents his powerful counterargument - a low-carbon agrarian localism that puts power in the hands of local communities, not high-tech corporates. In the ongoing fight for our food future, this book will help you to understand the difference between a congenial, ecological living and a dystopian, factory-centred existence. A must-read!

WHAT ABOUT ME ISM Vincent F. Hendricks, 2025-02-20 In this book, Vincent F. Hendricks draws on game theory, behavioral economics and moral philosophy in a scathing critique of what he calls whataboutmeism. A form of egoism in which life is viewed as a zero-sum game. The colleague is promoted; a friend hangs out with another friend but not you; and your partner decides to spend the day off with the friends. Promptly we may ask: "What about me?!" Often enough the answer to that recurring question should simply be: "What about you? It's not about you!" By systematically confusing autonomy with egoism and groupthink with democracy we develop and sustain this way of thinking. To overcome this trend of whataboutmeism we must take a hard look at ourselves, the games we play, the way we behave and discipline ourselves into realizing 'it's not all about me'. Humorous, erudite yet scholarly, the book covers this prevalent trend in society that rages online as well as offline. By providing a full analysis of said trend based on game theory, behavioral economics and moral philosophy, the author helps us realise that it's not all about me. It's about us.

Creating Destruction , 2011-01-01 This volume offers new and fascinating insights into some of the most urgent and relevant dimensions of violence in our time. Specialists from a broad range of disciplines explore some of the reasons and ways in which humans choose to harm one another. The two sections of the book engage a common theme, namely how ideological constructions influence, facilitate, and shape the understanding of our own involvement in violence. Whilst the first section focuses on one specific form of violence, namely genocide, the second explores our construction of violent images: verbally, visually, aurally, legally, socially, imaginably. This book should be required reading for anyone who wants to understand the multi-faceted and complex dimensions of violence in our contemporary, global world.

Routledge Handbook of Counterterrorism and Counterinsurgency in Africa Usman A. Tar, 2021-01-28 This book

illustrates how Africa's defence and security domains have been radically altered by drastic changes in world politics and local ramifications. First, the contributions of numerous authors highlight the transnational dimensions of counterterrorism and counterinsurgency in Africa and reveal the roles played by African states and regional organisations in the global war on terror. Second, the volume critically evaluates the emerging regional architectures of countering terrorism, insurgency, and organised violence on the continent through the African Union Counterterrorism Framework (AU-CTF) and Regional Security Complexes (RSC). Third, the book sheds light on the counterterrorism and counterinsurgency (CT-COIN) structures and mechanisms established by specific African states to contain, degrade, and eliminate terrorism, insurgency, and organised violence on the continent, particularly the successes, constraints, and challenges of the emerging CT-COIN mechanisms. Finally, the volume highlights the entry of non-state actors – such as civil society, volunteer groups, private security companies, and defence contractors – into the theatre of counterterrorism and counterinsurgency in Africa through volunteerism, community support for state-led CT-COIN Operations, and civil-military cooperation (CIMIC). This book will be of use to students and scholars of security studies, African studies, international relations, and terrorism studies, and to practitioners of development, defence, security, and strategy.

Large Carnivore Conservation and Management Tasos Hovardas, 2018-07-11 Large carnivores include iconic species such as bears, wolves and big cats. Their habitats are increasingly being shared with humans, and there is a growing number of examples of human-carnivore coexistence as well as conflict. Next to population dynamics of large carnivores, there are considerable attitude shifts towards these species worldwide with multiple implications. This book argues and demonstrates why human dimensions of relationships to large carnivores are crucial for their successful conservation and management. It provides an overview of theoretical and methodological perspectives, heterogeneity in stakeholder perceptions and behaviour as well as developments in decision making, stakeholder involvement, policy and governance informed by human dimensions of large carnivore conservation and management. The scope is international, with detailed examples and case studies from Europe, North and South America, Central and South Asia, as well as debates of the challenges faced by urbanization, agricultural expansion, national parks and protected areas. The main species covered include bears, wolves, lynx, and leopards. The book provides a novel perspective for advanced students, researchers and professionals in ecology and conservation, wildlife management, human-wildlife interactions, environmental education and environmental social science.

Off-White Sheng-mei Ma, 2019-11-14 How do English-speaking novelists and filmmakers tell stories of China from a Chinese perspective? How do they keep up appearances of pseudo-Sino immanence while ventriloquizing solely in the English language? Anglo writers and their readers join in this century-old game of impersonating and dubbing Chinese. Throughout this wish fulfillment, writers lean on grammatical and conceptual frameworks of their mother tongue to represent an alien land and its yellowface aliens. Off-white or yellow-ish characters and their foreign-sounding speech are

thus performed in Anglo-American fiction and visual culture; both yellowface and Chinglish are of, for, by the (white) people. Off-White interrogates seminal Anglo-American fiction and film on off-white bodies and voices. It commences with one Nobel laureate, Pearl Buck, and ends with another, Kazuo Ishiguro, almost a century later. The trajectory in between illustrates that the detective and mystery genres continue unabated their stock yellowface characters, who exude a magnetic field so powerful as to pull in Japanese anime. This universal drive to fashion a foil is ingrained in any will to power, so much so that even millennial China creates an “off-yellow,” darker-hued Orient in Huallywood films to silhouette its global ascent.

Mass and Serial Murder in America Christine M. Sarteschi, 2016-08-18 This timely reference examines the psychological and social phenomena of mass and serial murder, bringing scholarly depth to a frequently sensationalized subject. Its review of the literature features case studies of serial and mass murderers to expand on salient theories of evil, with biopsychosocial profiles highlighting core personality traits, particularly malignant narcissism, associated with psychopathy and its often deadly outcomes. The author’s insightful analysis separates misconceptions from reality, poses questions for critical thinking and discussion, and offers realistic suggestions for prevention. Public fascination with these violent figures—the mystique of serial killers and their popularity in the entertainment media—is explored as well. Included in the coverage: · Public interest in mass and serial murder. · Concepts of evil: where it comes from, and why people kill. · Mass murder: classification, motivation, and typologies. · Serial murder: motivation and typologies. · Current trends in prevention, and areas for improvement. · Plus instructive case studies, both famous and less-known. *Mass and Serial Murder in America* is illuminating reading for undergraduate and graduate students and practitioners in social science disciplines such as criminal justice, criminology, social work, psychology, forensic psychology, and related fields. It will also find an audience among educators teaching courses in these areas, as well as interested laypersons.

Boko Haram's Terrorist Campaign in Nigeria Temitope B. Oriola, Freedom Onuoha, Samuel Oyewole, 2021-11-29 This book investigates the devastating impacts of the Boko Haram terrorist campaign in Nigeria, reflecting on the group's historical context, organizational dynamics, and emerging trajectories. Since its inception in 2002, Boko Haram's terrorist campaign has become one of the major threats to security and human development in West Africa, killing tens of thousands of people, and displacing many more. This book reflects on the origins and development of Boko Haram, contextualizing it in the global trend of militant Islamist movements. It delves into the tactics of the organization, their deployment of sexual and gender-based violence against women and human rights abuses in the war against them. The war against Boko Haram has seen engagement from the international community, national and regional military operations, and also a range of civilian-led movements. This book reflects on the roles of these different actors, and the emerging trajectories that need to be considered in order to eradicate Boko Haram. Drawing on a range of disciplinary perspectives, this book will be of interest to researchers across the fields of sociology, political science, African studies, and peace and conflict studies.

Serial Killing on Screen Sarah E. Fanning, Claire O'Callaghan, 2022-11-30 This book explores the representation of real-life serial murders as adapted for the screen and popular culture. Bringing together a selection of essays from international scholars, *Serial Killing on Screen: Adaptation, True Crime and Popular Culture* examines the ways in which the screen has become a crucial site through which the most troubling of real-life crimes are represented, (re)constructed and made accessible to the public. Situated at the nexus of film and screen studies, theatre studies, cultural studies, criminology and sociology, this interdisciplinary collection raises questions about, and implications for, thinking about the adaptation and representation of true crime in popular culture, and the ideologies at stake in such narratives. It discusses the ways in which the adaptation of real-life serial murder intersects with other markers of cultural identity (gender, race, class, disability), as well as aspects of criminology (offenders, victims, policing, and profiling) and psychology (psychopathy, sociopathy, and paraphilia). This collection is unique in its combined focus on the adaptation of crimes committed by real-life criminal figures who have gained international notoriety for their plural offences, including, for example, Ted Bundy, Ian Brady and Myra Hindley, Aileen Wuornos, Jack the Ripper, and the Zodiac, and for situating the tales of these crimes and their victims' stories within the field of adaptation studies.

Hannibal for Dinner Kyle A. Moody, Nicholas A. Yanes, 2021-02-26 NBC's *Hannibal* only lasted for three seasons but became a critical darling and quickly inspired a ravenous fanbase. Bryan Fuller's adaptation of Hannibal Lecter's adventures created a new set of fans and a cult audience through its stunning visuals, playful characters, and mythical tableaux of violence that doubled as works of art. The show became a nexus point for viewers that explored consumption, queerness, beauty, crime, and the meaning of love through a lens of blood and gore. Much like the show, this collection is a love letter to America's favorite cannibal, celebrating the multiple ways that *Hannibal* expanded the mythology, food culture, fandom,

artistic achievements, and religious symbolism of the work of Thomas Harris. Primarily focusing on Hannibal, this book combines interviews and academic essays that examine the franchise, its evolution, creatively bold risks, and the art of creating a TV show that consumed the hearts and minds of its audience.

Abolition Feminisms Vol. 2 Alisa Bierria, Brooke Lober, Jakeya Caruthers, 2022-11-08 In this expansive companion to Abolition Feminisms Vol. I, contributors confront multiple paradigms of punitivity—the foundational logics of family, borders, heterosexuality, colonial violence, and more—to disengage us from root systems of carcerality. The book transcends various modes and forms: through grassroots praxis, critical research, storytelling, diagrams, poetry, and visual art, these pieces build on the legacies of feminist thinkers who formulated abolitionist critiques of policing, surveillance, and control. The resulting framework provides readers with the resources to cultivate and inhabit a post-carceral world of radical freedom and possibility.
