Empires of Antiquities Billie Melman, 2020 Empires of Antiquities is a history of the rediscovery of the imperial civilizations of the ancient Near East in a modern imperial order that evolved between the outbreak of the First World War and the decolonization of the British Empire in the 1950s. It explores the ways in which near eastern antiquity was redefined and experienced, becoming the subject of imperial regulation, modes of enquiry, and international and national politics. Billie Melman follows a series of globally publicized spectacular archaeological discoveries in Iraq, Egypt, and Palestine, which made antiquity material visible and accessible as never before. She demonstrates that the new definition and uses of

antiquity and their relations to modernity were inseparable from the emergence of the post-war international imperial order, transnational collaboration and crises, the aspirations of national groups, and collisions between them and the British mandates. This study uniquely combines a history of the internationalization of archaeology and the rise of a new 'regime of antiquities', under the oversight of the League of Nations and its institutions, a history of British attitudes to, and passion for near eastern antiquity and on the ground, colonial policies and mechanisms, as well as nationalist claims on the past. It points at the centrality of the new mandate system. Drawing on an unusually wide range of materials collected in archives in six countries, as well as on material and visual evidence, this volume weaves together imperial, international and national histories, and the history of archaeological discovery which it connects to imperial modernity.

*Enki of Eridu, The Master Architect* Ishmael Ningishzida, 2025-08-28 Anunnaki Odyssey is a series that traces the forgotten pathways where myth, archaeology, and memory converge. In this volume, Enki of Eridu, the journey begins in the marshlands of southern Mesopotamia, where the first city was raised upon the waters and kingship was said to have descended from the heavens. Here stood Eridu, home of the god Enki, lord of wisdom, crafts, and the deep Abzu—the subterranean waters that nourished both land and spirit. Drawing on mythic texts and archaeological discoveries, Enki of Eridu reveals how this primordial city became the axis of civilization. Sixteen successive temples were built one upon another, preserving alignment with a sacred spot that never lost its sanctity. Within their walls, rituals of fire and water sought to channel the power of the Anunnaki, while the divine decrees—the me—were bestowed upon humanity, setting in motion the laws, arts, and knowledge that shaped the ancient world. From Eridu's origins as the first city to its enduring legacy in later myths of Eden, paradise, and the flood, this book explores how the god Enki guided humanity's first steps toward culture and survival. Enki of Eridu invites readers into the living memory of the world's earliest temple city, where heaven and earth first met, and where the covenant between gods and mankind was forged in the shimmering waters of the Abzu.

**Unlocking the Mysteries of Genesis** Henry M. Morris, 2016-07-26 Unlock the Mysteries of Faith and Science Have you wondered how the creation story in Genesis fits with the evolutionary theories of popular science? You're not alone. Many Christians wrestle with the seeming disparity between faith and science. They want to believe the inerrancy of Scripture, but it's difficult to reconcile the two. *Unlocking the Mysteries of Genesis* seeks to resolve this conflict by answering key questions about the origin of human life, the evidence left by the fossil record, and how the findings of science line up with the Bible. Using the most current research and data, this visually stunning book takes readers on a journey that explores the wonders of God's creation through the lens of faith-based science that clearly points to the authenticity and accuracy of the biblical creation account. The compelling evidence you'll find as you study both Genesis and science will challenge your intellect and reinforce your faith.

*Iraq* John Robertson, 2016-09-01 Cities, scripts, literature, the rule of law – all were born in Iraq. That so many see this ancient land as nothing more than a violent backwater steeped in chaos is a travesty. This is the place where, for the first 5,000 years of human history, all innovations of worth emerged. It was the cradle of civilization. In this unrivalled study, John Robertson details the greatness and grandeur of Iraq's achievements, the brutality and magnificence of its ancient empires and its extraordinary contributions to the world. The only work in the English language to explore the history of the land of two rivers in its entirety, it takes readers from the seminal advances of its Neolithic inhabitants to the aftermath of the American and British-led invasion, the rise of Islamic State and Iraq today. A fascinating and thought-provoking analysis, it is

sure to be greatly appreciated by historians, students and all those with an interest in this diverse and enigmatic country. This paperback edition features a new epilogue, bringing the work up to date and looking ahead to Iraq's future.

**Living and Dying in Mesopotamia** Alhena Gadotti, Alexandra Kleinerman, 2024-10-17 Exploring life, death, and the afterlife in Mesopotamia, Alhena Gadotti and Alexandra Kleinerman examine how life and death experiences continually developed over the course of nearly three millennia of Mesopotamian history. To achieve this, the book follows the life cycle of the people of the Tigris and Euphrates River valleys from 3000 BCE to 300 BCE, from birth, through death, and beyond. This book is the first to interrogate the relationships between living and dying through case studies and primary evidence. Including letters written by both women and men, the book allows readers to enter the minds of the ancients. First, the authors focus on life through topics such as the rituals surrounding birth, marriage, and religion. The authors then examine the common causes of death, the rituals associated with death, and the Mesopotamian views of the netherworld, its gods, and inhabitants. Concepts of gender fluidity, both in life and death, are considered alongside evidence from epigraphic data. Illustrating daily life as a multifaceted subject affected by time, space, location, socioeconomics, and gender, this book creates a window into the conditions and concerns of the Mesopotamian people.

Ancient Egypt and the Near East , 2011 Ancient Egypt and the Near East explores the early civilizations that developed in

Egypt and Mesopotamia between the start of farming in the Nile Valley around 6000 BCE and the defeat of the Persians by Alexander the Great in 330 BCE.
