Gestión de la tecnología Fabiola Sáenz Blanco, Néstor Orlando Cordero Sáenz, Evelio Cortés Rodríguez, 2020-01-10 Las organizaciones del siglo XXI se caracterizan por la necesidad de renovarse rápida y ágilmente para afrontar los cambios que acontecen en un entorno cada vez más globalizado y competitivo, tanto por el lado de adquisición de sus insumos productivos como de la comercialización de sus bienes y servicios. Esta mayor rivalidad competitiva exige una orientación hacia la constante búsqueda de creación de valor en las tradicionales dimensiones competitivas de Porter de reducciones de costes, diferenciación o focalización/especialización, que se alcanzan por medio de la innovación tecnológica.

Acción subalterna, desigualdades socioespaciales y modernización Maria Victoria García Vettorazzi, 2010-12

Analizando la formación histórica de los circuitos de comercio indígena en Guatemala y de los comerciantes Maya-K'iche's como actores sociopolíticos, esta investigación contribuye a una crítica de las interpretaciones sobre los procesos de cambio social y los problemas del desarrollo formuladas a partir de enfoques conceptuales que equiparan desarrollo con desenvolvimiento capitalista y que leen continuamente la historia de las sociedades del Sur en términos de transición, fracaso y carencia respecto a una versión idealizada de la modernización occidental. Se aporta también a una crítica de las teorías alternativas del desarrollo que formulan concepciones esencialistas de los actores populares y sus territorios, idealizando su diferencia como una otredad alternativa desconectada de relaciones de poder y de dinámicas estructurales. Se señala de esta forma la necesidad de tener en cuenta la complejidad de las identidades, memorias y prácticas de los grupos subalternos, así como la importancia de observar el papel de la desigualdad sociogeográfica y de fenómenos como la militarización y la guerra en la constitución de los problemas del desarrollo.

La regla es sagrada. Y sin tabúes Marjorie Malgras,Juliette Bertaudière,2023-10-05 La regla, la menstruación, el período, la luna... Ya sea dolorosa, abundante, irregular o esté totalmente ausente, supone un tema importante para la mitad de la población. Sin embargo, el tabú de la regla (aún presente en nuestra sociedad) boicotea hablar o transmitir conocimientos al respecto. Estigmatizada, la regla lleva escondida desde la noche de los tiempos, totalmente ignorada. La aparición de la píldora y de las protecciones menstruales la ha invisibilizado más aún, ya que se pide implícitamente (o no) a las mujeres que no se quejen y que nunca dejen un tampón a la vista. ¡Jamás de los jamases! ¿Pero por qué la regla se ve como algo sucio, impuro? ¿Cómo podemos hacer para cambiar la mirada que sobre ella tiene nuestra sociedad? ¿Cómo reconciliarse con ella de manera natural y con total benevolencia? ¿Cómo ha cambiado la percepción de la regla en el transcurso de la Historia y hasta nuestros días? ¿Qué es la regla? ¿Qué protecciones menstruales elegir? o incluso ¿Cuáles

son las enfermedades del ciclo menstrual?... A través de un libro ilustrado con mucha gracia, compuesto por 14 preguntas esenciales y detalladas, consejos basados en la naturopatía para vivir por fin en armonía con la regla, y un FAQ para responder a las preguntas más frecuentes, iletanta el velo y elimina por fin el tabú de la regla!
