*Jack Chambers' Red and Green* Tom Smart, 2013-07-01 In 1968, Canadian artist and filmmaker Jack Chambers was diagnosed with leukemia. Faced with his own mortality, Chambers began a programme of research into the nature of his own immortality. From that starting point the artist embarked on a nine-year journey that would ultimately take him to the end of his days. In his search, Chambers consulted many sources: philosophers, scientists, poets, priests, mystics and clairvoyants. Using the metaphor of the complementary-colour contrast of red and green, Chambers examined life's inherent paradoxes, resolutely searching for synthesis. What resulted was 'Red and Green', a collage of quotations and ideas - a visual and literary mosaic - photocopied and diligently pasted into ring binders. The manuscript called 'Red and Green' has spent the greater part of its existence closeted in a studio, a basement and an archive. Today, Tom Smart, with remarkable care and persistence, presents Jack Chambers' Red and Green, Chambers' final thoughts on the purpose of the artist in society.

**A Cognitive and Anthropological Response to the 'Death' of Painting** Bruce Rimell, 2016-04-07 The alleged 'death' of painting has shaped the recent course of art, but the model of the human mind upon which it rests is no longer considered accurate. Cognitive science has shown that the mind is not a blank slate but content-rich, and as such humans bear an array of innate expectations of reality and non-reality, which apply to painting as well as other human behaviours such as religion or music. This creative thesis takes in a series of case studies tracing the prehistory of painting in light of these cognitive propensities, from the beginnings of human culture, to Bushman rock art and the experiences of painters today, to uncover a perennial function for painting which cannot die: the ubiquitous sensation of an 'otherworld' beyond the canvas or rock face. This approach to painting demands its rehabilitation as a humanising self-expression in a world increasingly estranged from art, abandoning artistic ideology in favour of an image-based communion with human nature.

**Dictionary of Symbols** J. C. Cirlot, 2006-10-19 The unvarying essential meanings of around 1,000 symbols and symbolic themes commonly found in the art, literature and thought of all cultures through the ages are clarified.

**A Dictionary of Symbols** J. E. Cirlot, 2023-07-11 This classic encyclopedia of symbols by the renowned Spanish poet illuminates the imagery of myth, modern psychology, literature, and art. J. E. Cirlot's *A Dictionary of Symbols* is a feat of scholarship, an act of the imagination, and a tool for contemplation, as well as a work of literature—a reference book that is as indispensable as it is brilliant and learned. Cirlot was a composer, poet, critic, and champion of modern art whose interest in surrealism helped introduce him to the study of symbolism. This volume explores the space between the world at large and the world within, where nothing is meaningless, and everything is in some way related to something else. Running from “abandonment” to “zone” by way of “flute” and “whip,” spanning the cultures of the world, and including a wealth of visual images to further bring the reality of the symbol home, *A Dictionary of Symbols* is a luminous and illuminating investigation of the works of eternity in time.

*Colour and Culture* John Gage, 2024-10-24 What does the language of colour tell us? Where does one colour begin and another end? Is it a radiant visual stimulus, an intangible function of light, or a material substance to be moulded and arrayed? Colour is fundamental to art, yet so diverse that it has hardly ever been studied in a comprehensive way. Art historian John Gage considers every conceivable aspect of the subject in this groundbreaking analysis of colour in Western culture, from the ancient Greeks to the late twentieth century. Gage describes the first theories of colour, articulated by Greek philosophers, and subsequent attempts by the Romans and their Renaissance disciples to organize it systematically or endow it with symbolic power. He unfolds its religious significance and its use in heraldry, as well as how Renaissance artists approached colour with the help of alchemists. He explores the analysis of the spectrum undertaken by Newton and continued in the nineteenth century by artists such as Seurat, traces the influence of Goethe's colour theory, and considers the extraordinary theories and practices that attempted to unite colour and music, or make colour into an entirely abstract language of its own. The first-ever undertaking to suggest answers to many perennial questions about the role of colour in Western art and thought, this study throws fresh light on the hidden meanings of many familiar masterpieces.

**Concerning the Spiritual in Art** Wassily Kandinsky, 2024-05-30 A seminal text in the history of modern art, from one of the most famous artists of the twentieth century ‘Art is the language that speaks to the soul’ Why do we make art? In *Concerning the Spiritual in Art* Wassily Kandinsky, one of the earliest and most famous abstract painters, argued against ‘art for art’s sake’. Exploring form and colour, spirituality and tradition, Kandinsky instead predicted a future for painting in its potential to redirect the attention of viewers away from the shallow materialism of the modern world toward the more

profound intellectual and emotional concerns of their interior lives. His revolutionary work became a landmark in modern art history, helping to usher in the age of non-representational painting. This new translation also includes Kandinsky's later essay, 'The Question of Form', in which he interrogates and sharpens many of his earlier ideas. A new translation by Ruth Ahmedzai Kemp With an introduction by Lisa Florman

*The Vernaculars of Communism* Petre Petrov,Lara Ryazanova-Clarke,2014-12-17 The political revolutions which established state socialism in the Soviet Union and Eastern Europe were accompanied by revolutions in the word, as the communist project implied not only remaking the world but also renaming it. As new institutions, social roles, rituals and behaviours emerged, so did language practices that designated, articulated and performed these phenomena. This book examines the use of communist language in the Stalinist and post-Stalinist periods. It goes beyond characterising this linguistic variety as crude newspeak, showing how official language was much more complex - the medium through which important political-ideological messages were elaborated, transmitted and also contested, revealing contradictions, discursive cleavages and performative variations. The book examines the subject comparatively across a range of East European countries besides the Soviet Union, and draws on perspectives from a range of scholarly disciplines - sociolinguistics, anthropology, literary and cultural studies, historiography, and translation studies. Petre Petrov is an Assistant Professor in the Department of Slavic Languages and Literatures at the University of Texas at Austin. Lara Ryazanova-Clarke is Head of Russian and Academic Director of the Princess Dashkova Russia Centre in the School of Literatures, Languages and Cultures at the University of Edinburgh.

**Color Ontology and Color Science** Jonathan Cohen,Mohan Matthen,2010-05-21 Leading philosophers and scientists consider what conclusions about color can be drawn when the latest analytic tools are applied to the most sophisticated color science. Philosophers and scientists have long speculated about the nature of color. Atomists such as Democritus thought color to be conventional, not real; Galileo and other key figures of the Scientific Revolution thought that it was an erroneous projection of our own sensations onto external objects. More recently, philosophers have enriched the debate about color by aligning the most advanced color science with the most sophisticated methods of analytical philosophy. In this volume, leading scientists and philosophers examine new problems with new analytic tools, considering such topics as the

psychophysical measurement of color and its implications, the nature of color experience in both normal color-perceivers and the color blind, and questions that arise from what we now know about the neural processing of color information, color consciousness, and color language. Taken together, these papers point toward a complete restructuring of current orthodoxy concerning color experience and how it relates to objective reality. Kuehni, Jameson, Mausfeld, and Niederee discuss how the traditional framework of a three-dimensional color space and basic color terms is far too simple to capture the complexities of color experience. Clark and MacLeod discuss the difficulties of a materialist account of color experience. Churchland, Cohen, Matthen, and Westphal offer competing accounts of color ontology. Finally, Broackes and Byrne and Hilbert discuss the phenomenology of color blindness. Contributors Justin Broackes, Alex Byrne, Paul M. Churchland, Austen Clark, Jonathan Cohen, David R. Hilbert, Kimberly A. Jameson, Rolf Kuehni, Don I.A. MacLeod, Mohan Matthen, Rainer Mausfeld, Richard Niederée, Jonathan Westphal
