Childhood and Children's Books in Early Modern Europe, 1550-1800 Andrea Immel, Michael Witmore, 2013-11-05 This volume of 14 original essays by historians and literary scholars explores childhood and children's books in Early Modern Europe, 1550-1800. The collection aims to reposition childhood as a compelling presence in early modern imagination--a ready emblem of innocence, mischief, and playfulness. The essays offer a wide-ranging basis for reconceptualizing the development of a separate literature for children as central to evolving early modern concepts of human development and socialization. Among the topics covered are constructs of literacy as revealed by the figure of Goody Two Shoes, notions of pedagogy and academic standards, a reception study of children's reading based on book purchases made by Rugby school boys in the late eighteenth-century, an analysis of the first international best-seller for children, the abbe Pluche's *Spectacle de la nature*, and the commodification of child performers in Jacobean comedies.

Encyclopedia of Children, Adolescents, and the Media Jeffrey Jensen Arnett, 2007 Publisher Description

Children's Picture Books about Refugees and Campbell's Monomyth Eseta Tualaulelei, Martin Kerby, Margaret Baguley, Alison Bedford, 2025-07-14 This book explores the portrayal of refugee experiences in children's picture books using insights from Joseph Campbell's *The Hero with a Thousand Faces*. Chapter 1 considers this emerging genre of children's literature within its social and educational context and explains how the narratives embedded within these books were examined. Chapter 2 cites key studies in the field of children's picture books about refugees to uncover common narrative arcs, characterisations, themes and educative value. Remaining chapters detail the three core elements of Campbell's canonical narrative arc to review how the experience of refugees is presented in modern picture books using this familiar narrative structure as a means of exploring a humanitarian issue with overt political overtones. In so doing, the authors employ an innovative means of analysing picture books that deal with refugees by positioning them within a familiar narrative arc that belies the fear of difference they may otherwise represent.

Handbook of Research on Children's and Young Adult Literature Shelby Wolf, Karen Coats, Patricia Enciso, Christine Jenkins, 2011-04-27 This landmark volume is the first to bring together leading scholarship on children's and young adult literature from three intersecting disciplines: Education, English, and Library and Information Science. Distinguished by its multidisciplinary approach, it describes and analyzes the different aspects of literary reading, texts, and contexts to illuminate how the book is transformed within and across different academic figurations of reading and interpreting children's literature. Part one considers perspectives on readers and reading literature in home, school, library, and community settings. Part two introduces analytic frames for studying young adult novels, picturebooks, indigenous literature, graphic novels, and other genres. Chapters include commentary on literary experiences and creative production from renowned authors and illustrators. Part three focuses on the social contexts of literary study, with chapters on censorship, awards, marketing, and literary museums. The singular contribution of this Handbook is to lay the groundwork for colleagues across disciplines to redraw the map of their separately figured worlds, thus to enlarge the scope of scholarship and dialogue as well as push ahead into uncharted territory.

Multicultural Literature for Children and Young Adults Mingshui Cai, 2002-10-30 There is much discussion of multiculturalism in education. This is especially true of multicultural literature for children and young adults. The rise of multicultural literature is a political rather than a literary movement; it is a movement to claim space in literature and in education for historically marginalized social groups rather than one to renovate the craft of literature itself. Multicultural literature has been closely bound with the cause of multiculturalism in general and thus has been confronted with resistance from conservatives. This book discusses many of the controversial issues surrounding multicultural literature for children and young adults. The volume begins with a look at some of the foundational and theoretical issues related to multicultural literature. The second part of the book addresses issues related to the creation and critique of multicultural literature, including the authorship of such works and the role of the reader in determining whether or not a work is multicultural. The third looks at the place of multicultural literature in the education of children and young adults. Throughout its discussion, the book makes extensive references to a large body of multicultural fiction and provides a thorough review of research on this important topic.

Children's books, brain development, and language acquisition Ralf Thiede, 2018-11-13 This book correlates English-speaking children's brain development and acquisition of language with the linguistic input that comes from children's books. Drawing from the most current research on the developing brain, the author demonstrates how language acquisition is exclusively interactive, and highlights the benefit that accrues when that interaction includes the exploratory language play found in early childhood literature. Through discussions of specific domains of grammar, the relation of these domains to children's literature through scaffolding, and the resultant linguistic and cognitive advantages for the child, this

volume offers an innovative approach to early brain maturation.
