**Enseñanza y aprendizaje de la historia** Henry Pluckrose,1996 Las dimensiones históricas en el currículum de educación primaria tienen como objetivo facilitar una comprensión de la humanidad, de su progreso y problemas. Enfrentar a niñas y niños con diferentes culturas, con otros períodos históricos, lugares y personas sirve para promover procesos de reflexión en torno a las razones y el origen de muchos de los conocimientos, valores, conductas y actitudes vigentes en su entorno específico y en la sociedad en general. Va en educación primaria el alumnado debe ejercitarse en organizar la información del presente teniendo también en cuenta perspectivas históricas; necesita aprender a explicar y evaluar determinados sucesos del pasado, para poder comprender el momento actual. En los diseños curriculares de primaria es necesario atender a conceptos y destrezas importantes para el pensamiento histórico como: cronología, cambio y continuidad, causa y efecto, la habilidad para sopesar evidencias y aprender también a dudar, a desarrollar la capacidad de empatía con otras personas y pueblos del pasado, etc. Henry PLUCKROSE, poseedor de una amplia experiencia en la enseñanza de la historia en educación primaria, ofrece en este libro al profesorado numerosas propuestas de trabajo para desarrollar en las aulas, con el propósito de entusiasmar a niñas y niños con esta temática y ayudarles así a reconstruir su historia propia y colectiva.

**Construction Matters** Stefan Holzer,Silke Langenberg,Clemens Knobling,Orkun Kasap,2025-03-04 Construction History, Construction Heritage, Recent Construction, Historiography, Industrialization, Engineering Sciences, Building Materials, Building Actors Construction History is still a fairly new and small but quickly evolving field. The current trends in

Construction History are well reflected in the papers of the present conference. Construction History has strong roots in the historiography of the 19th century and the evolution of industrialization, but the focus of our research field has meanwhile shifted notably to include more recent and also more distant histories as well. This is reflected in these conference proceedings, where 65 out of 148 contributed papers deal with the built heritage or building actors of the 20th or 21st century. The conference also mirrors the wide spectrum of documentary and analytical approaches comprised within the discipline of Construction History. Papers dealing with the technical and functional analysis of specific buildings or building types are complemented by other studies focusing on the lives and formation of building actors, from laborers to architects and engineers, from economical aspects to social and political implications, on legal aspects and the strong ties between the history of construction and the history of engineering sciences. The conference integrates perfectly into the daily work at the Institute for Preservation and Construction History at ETH Zurich. Its two chairs - the Chair for Building Archaeology and Construction History and the Chair for Construction Heritage and Preservation - endeavor to cover the entire field and to bridge the gaps between the different approaches, methodologies and disciplines, between various centuries as well as technologies - learning together and from each other. The proceedings of 8ICCH give a representative picture of the state of the art in the field, and will serve as a reference point for future studies.

*Historia de la arquitectura en Costa Rica* Richard Woodbridge París, 2003 A scholarly, well-organized history of major trends, types and forces in the development of architecture in Costa Rica from the colonial period through the 20th century.

**Un país, tres arquitecturas** Andrés Fernández, 2011-01-04 Este texto elogia una obra arquitectónica que se presenta como clara, detallada y perspicaz, destacando su capacidad para situar el objeto arquitectónico dentro de su contexto político, económico, social y tecnológico. El autor, Fernández, utiliza material gráfico y una prosa elocuente para ilustrar la interacción de tres lenguajes arquitectónicos significativos en la historia.

**Estructuras adaptables** Ricardo Franco Medina, 2006

**Hacia una arquitectura móvil** Franco, Ricardo, Insuasty, Pablo, Cortés, César, Leonel, Torres, Hincapié, Miguel, 2010-07-12 Lo fundamental de la idea de la adaptabilidad y flexibilidad arquitectónica a partir de estructuras móviles o adaptables, estriba en la hipótesis de que el arquitecto es incapaz de determinar definitivamente el uso y el carácter de las edificaciones, y que corresponde al usuario de dichas construcciones decidir y rediseñar el uso y la forma que quiera asignarles. El edificio debe ser adaptable, móvil, transformable en el sentido de que cualquiera que sea el uso que desee darle el usuario o grupo social, sea siempre posible y realizable sin que la arquitectura presente obstáculos o las transformaciones que resultasen. Esta investigación sostiene que la proyección, el diseño y la construcción de edificaciones humanas integrados al medio ambiente y al contexto social, cultural y económico, han de provenir de un trabajo mancomunado de arquitectos, ingenieros, biólogos, ecologistas, sociólogos, antropólogos y economistas, entre otros, con un

control directo e inalienable por parte de quienes van a vivir, habitar y disfrutar de estas edificaciones. Esto quiere decir que los edificios van a ser hechos y rehechos, que lento y sutilmente serán cambiados por sus usuarios y habitantes. Sin embargo, el hábitat arquitectónico actual se presenta en su mayoría rígido, estático e inmodificable, haciendo casi imposible futuras transformaciones, así como la realización de cambios de forma y de espacio en el tiempo con fines adaptativos. El proyecto investigativo, sostiene que la adaptabilidad y capacidad de transformación es una necesidad de la sociedad misma, y que la arquitectura y el diseño actual deben dar respuesta a ésta necesidad.

La casa burguesa Mayerly Rosa Villar Lozano,2021-06-01 La arquitectura y la ciudad se presentan como representaciones socioculturales en las que se evidencia la mentalidad del grupo social que en ellas habita. En sus más íntimos espacios, los habitantes sueñan, forman sus costumbres y su historia, haciendo de ellos parte de la memoria colectiva. De esto el interés por indagar por los procesos ideológicos y sociales que inciden en una nueva configuración urbana y el surgimiento de las primeras urbanizaciones burguesas en América latina y en especial en Bogotá, levantadas bajo los postulados traídos por Brünner al Nuevo Continente. Este texto aporta desde la Historia una visión sobre hechos que configuran los conceptos de arquitectura y vida urbana como bien social y cultural. Pone en manifiesto los cambios de mentalidad sucedidos a comienzos del siglo XX, derivados de la interacción cultural propia de las migraciones acaecidas como consecuencia del fenómeno de violencia que suscita la Independencia del yugo europeo, además del anhelo de acceder al progreso y al mejoramiento de condiciones de vida que prometía la ciudad moderna. Mentalidad alimentada además por la admiración que se expresa por las culturas inglesa y francesa, conocidas a través del incremento de los viajes a este continente y al asentamiento de emigrantes europeos en nuestro país, que huyen de los efectos de la Primera y la Segunda Guerra Mundial. Este anhelo se alivia en la adopción de su estilo de vida, sus gustos y costumbres, en general todo aspecto de la vida cotidiana, lo cual evidentemente incluye el lugar de residencia. El estilo y en general los objetos, son factores que identifican una clase social; la unión de la naciente burguesía industrial con la tradicional, sumado al sentimiento de negación de todo aquello que refleje una huella hispánica, fortalece el anhelo de distinción y la idea de introducirse en los fenómenos de modernidad; aunque la noción inicial de moderno sea más visual que conceptual.

**Tecnología y proyecto** Arnoldo Gaite,2021-06-01 Las relaciones entre los conocimientos técnicos y la imaginación del diseñador, ponen en evidencia el encuentro entre lo objetivo - la tecnología - y lo subjetivo - el arte. Para los aspectos particulares del proyecto arquitectónico, se trata de relaciones que demandan su práctica consciente para la obtención de una arquitectura apropiada. La búsqueda de esa conciencia está presente en las monografías que recoge esta publicación,

mostrando algunas de las múltiples miradas que caben sobre el fuerte vínculo que requiere el proceso del proyecto entre ambos aspectos.
