Skiing ,1976-02

Ski Films Bryan Senn,2022-05-02 Skiing in movies, like the sport itself, grew more prevalent beginning in the 1930s, when it was a pastime of the elite, with depictions reflecting changes in technique, fashion and social climate. World War II saw skiing featured in a dozen films dealing with that conflict. Fueled by postwar prosperity, the sport exploded in the 1950s-filmmakers followed suit, using scenes on snow-covered slopes for panoramic beauty and the thrill of the chase. Through the free-spirited 1960s and 1970s, the downhill lifestyle shushed into everything from spy thrillers to beach party romps. The extreme sports era of the 1980s and 1990s brought snowboarding to the big screen. This first ever critical history of skiing in film chronicles a century of alpine cinema, with production information and stories and quotes from directors, actors and stuntmen.

Neurocinema-The Sequel is a review of the history of neurology as seen in film, starting with the early days of cinema and concluding with contemporary films now available in theaters and on streaming sites. The major themes of this book encompass how neurology has been represented in the history of cinema and how neurologic topics emerged and then disappeared, with some staging a comeback in more recent films. 180 films are assessed and rated, and many of these are exemplary depictions of neurological disorders. The author examines whether film, from a

neurologic perspective, can provide insight and even debate. Each of the films discussed in this book demands serious attention by those who see and manage neurologic patients and support their families. *Neurocinema - The Sequel* chronicles this archive of neurologic representation, drawing readers in a rich collection of cinematic wonders of permanent cultural and historical value.

Neurocinema Eelco F. M. Wijdicks, 2014-11-06 Film directors recognize that neurologic disease impacts mind and motility and often use it in a plot or defining scene.
