Cruisicology David Cashman, Philip Hayward, 2020-10-05 Since the 1990s the cruise industry has become one of the largest employers of musicians in the world. Thousands of professional musicians work on cruise ships daily, entertaining millions of passengers. *Cruisicology: The Music Culture of Cruise Ships* provides the first in-depth account of the culture and the industrial determinants of cruise ship music. Based on interviews with working musicians and coauthor David Cashman's experience as a cruise ship musician, this book investigates how music is organized and made onboard a cruise ship. David Cashman and Philip Hayward study the working life of musicians, why and how corporate shipping lines include music onboard their vessels, the history of musicians on passenger shipping, and the likely future directions of musical entertainment within the industry. Cashman and Hayward illustrate the positive and negative experience of artists making music every day in confined spaces with close proximity to their audiences.

Outside the Jukebox Scott Bradlee, 2025-05-01 From the creator of the sensation Postmodern Jukebox -- with millions of fans globally -- comes an inspirational memoir about discovering what you love and turning it into a creative movement. With student loan debt piling up and no lucrative gigs around the corner, Scott Bradlee found himself in a situation all too familiar to struggling musicians and creative professionals, unsure whether he should use the little income he had to pay his rent or to avoid defaulting on his loans. It was under these desperate circumstances that Bradlee began experimenting, applying his passion for jazz, ragtime, and doo wop styles to contemporary hits by singers like Macklemore and Miley Cyrus--and suddenly an idea was born. Today, Postmodern Jukebox -- the rotating supergroup devoted to period covers of pop songs, which Bradlee created in a basement apartment in Queens, New York--is a bona fide global sensation, having collected more than three million subscribers on YouTube while selling out major venues around the world and developing previously unknown talent into superstar singers. From its Etta James-inspired rendition of Radiohead's Creep to its New Orleans jazz interpretation of Meghan Trainor's All About That Bass, the group has established a sound like no other, crafting hits as exquisitely sublime as they are humorously absurd. But it wasn't always as easy as the YouTube videos make it look. As he worked to establish Postmodern Jukebox, Bradlee struggled through the obstacles that every self-employed artist or entrepreneur with a vision faces: how to collaborate successfully on teams with divergent visions, how to outrun the naysayers, how to chase the next innovation when your reputation makes others start to pigeonhole you, and so many of the

other challenges lining the path to success. Taking readers through the false starts, hilarious backstage antics, and unexpected breakthroughs of Bradlee's journey from a lost musician to a musical kingmaker -- and presenting all the entrepreneurial insights he learned along the way -- *Outside the Jukebox* is an inspiring memoir about how one musician found his rhythm and launched a movement that would forever change our relationships to our favorite songs.

Managing Projects in Africa Project Management Journal, 2013-01-30 This special issue of the Project Management Journal presents a collection of six articles on managing projects in Africa. Providing a window into the important project activity taking place there, these articles extend both the empirical and theoretical understanding of the African project context and contribute to improving practice. Each article makes a unique contribution to either our understanding of the African project context or project management in general, and sometimes to both. After an introduction to the African project context at the start of the 21st century, the articles explore: three different countries as well as multinational projects; for-profit, public sector, and development aid projects; infrastructure and information and communication technology; project governance as well as project management; and partnering challenges.

Managing Networks in Project-Based Organisations Stephen Pryke, 2017-07-05 The first book demonstrating how to apply the principles of social network analysis to managing complex projects This groundbreaking book gets project managers and students up to speed on state-of-the-art applications of social network analysis (SNA) for observing, analysing, and managing complex projects. Written by an expert at the leading edge of the SNA project management movement, it clearly demonstrates how the principles of social network analysis can be used to provide a smarter, more efficient, holistic approach to managing complex projects. Project managers, especially those tasked with managing large, complex construction and engineering projects, traditionally have relied upon analysis and decision-making based upon hierarchical structures and vaguely defined project systems, much of which is borrowed from historic scientific management approaches. However, it has become apparent that a more sophisticated methodology is required for observing project systems and managing relationships with today's more knowledgeable and demanding clients. Social network analysis (SNA) provides just such an approach. Unfortunately, existing books on social network analysis are written primarily for sociologists and mathematicians, with little or no regard for the needs of project managers — until now. The first and only book of its kind, *Managing Networks in Project-Based Organisations*: Offers a framework and a fully-developed approach to applying SNA theory and methodologies to large, complex projects Describes highly effective strategies and techniques for managing the iterative and transient relationships between network-defining actor roles involved in the delivery of complex projects Uses numerous real-world examples and case studies of successful applications of SNA to large-scale construction and engineering projects around the world Draws on its author's decades of experience managing complex projects for demanding clients, as

well as his extensive academic research in Project Management Managing Networks in Project-Based Organisations is an important working resource for project management professionals and consultants, especially those serving the construction and engineering industries. It is also an excellent text/reference for postgraduate students of project management and supply chain management, as well as academic researchers of project management.

Strategic Data-Based Wisdom in the Big Data Era Girard, John, Klein, Deanna, Berg, Kristi, 2015-02-28 The ability to uncover, share, and utilize knowledge is one of the most vital components to the success of any organization. While new technologies and techniques of knowledge dissemination are promising, there is still a struggle to derive and circulate meaningful information from large data sets. Strategic Data-Based Wisdom in the Big Data Era combines the latest empirical research findings, best practices, and applicable theoretical frameworks surrounding data analytics and knowledge acquisition. Providing a multi-disciplinary perspective of the subject area, this book is an essential reference source for professionals and researchers working in the field of knowledge management who would like to improve their understanding of the strategic role of data-based wisdom in different types of work communities and environments.

Reviews in Computational Chemistry, Volume 16 Kenny B. Lipkowitz, Donald B. Boyd, 2009-09-22 Volume 16 Reviews In Computational Chemistry Kenny B. Lipkowitz and Donald B. Boyd The focus of this book is on methods useful in molecular design. Tutorials and reviews span (1) methods for designing compound libraries for combinatorial chemistry and high throughput screening, (2) the workings of artificial neural networks and their use in chemistry, (3) force field methods for modeling materials and designing new substances, and (4) free energy perturbation methods of practical usefulness in ligand design. From Reviews of the Series This series spans all the subdisciplines in the field, from techniques to practical applications, and includes reviews from many of the acknowledged leaders in the field. the reviews cross many subdisciplines yet are both general enough to be of wide interest while including detailed information of use to workers in particular subdisciplines. -Journal of the American Chemical Society

Developing Organizational Maturity for Effective Project Management Silvius, Gilbert, Karayaz, Gamze, 2018-03-09 Despite criticism for their serious shortcomings, maturity models are widely used within organizations. The appropriate applications of these models can lead to organizational and corporate success. *Developing Organizational Maturity for Effective Project Management* is a critical scholarly publication that explores the successes and failures of maturity models and how they can be applied competently to leadership within corporations. Featuring coverage on a wide array of topics such as project management maturity, agile maturity, and organizational performance, this publication is geared toward professionals, managers, and students seeking current research on the application of maturity models to corporate success.

Agile Project Management for Business Transformation Success Paul Paquette, Milan Frankl, 2015-12-30 This book is intended to provide project management office (PMO) executives' practical information to promote enterprise Agile for business value compatibility within their organization. The primary benefit of this book is to promote a sense of common purpose and collaboration between the project delivery and the organization. Agile project delivery methods are adaptable to the emergence of unknown requirements identified in the later part of the project delivery lifecycle. The key success factor is direct business participation and collaboration to ensure that a business focus determines the output. Agile promotes innovation and creates synergies through a business focus viewing technology deployments as a catalyst for change rather than the final objective. Technology investments implemented through Agile processes result in improved market leadership, organizational alignment, and resource efficiency delivering competitive advantage.

Bending the Law of Unintended Consequences Richard M. Adler, 2020-02-10 This title provides managers, executives and other professionals with an innovative method for critical decision-making. The book explains the reasons for decision failures using the Law of Unintended Consequences. This account draws on the work of sociologist Robert K. Merton,

psychologists Amos Tversky and Daniel Kahneman, and economist Herbert Simon to identify two primary causes: cognitive biases and bounded rationality. It introduces an innovative method for “test driving” decisions that addresses both causes by combining scenario planning and “what-if” simulations. This method enables professionals to learn safely from virtual mistakes rather than real ones. It also provides four sample test drives of realistic critical decisions as well as two instructional videos to illustrate this new method. This book provides leaders and their support teams with important new tools for analyzing and refining complex decisions that are critical to organizational well-being and survival.

Emotions and Leadership in Organizations and Educational Institutes Osman Titrek, Anna Stavicka, Ana Campina, Gozde Sezen-Gultekin, Carlos Francisco De Sousa Reis, 2023-11-28 Emotion management is an important source of social capital and synergy for organizations. Managers have a great role in the creation of this synergy. A manager who can cope with their emotions indirectly contributes to organizational effectiveness. This situation is especially important in human-oriented organizations providing services rather than goods, such as educational institutions. Leadership is a process of social influence, which maximizes the efforts of others towards the achievement of a goal. Leadership stems from social influence rather than authority or power. In terms of system approach, the input, output, process, and feedback of educational organizations are always related to human behaviors. Therefore, organizations must address the nature of human beings in all of their managerial processes. Although organizations, in which people are at the foreground, try to continue their functioning on a rational and formal basis throughout the managerial process, they sometimes have to manage emotional and informal phenomena. In this case, there is a need for managers and school leaders who can shape the rationale in line with the requirements of human nature. What is expected from this administrator is that they do not ignore human needs and emotions while providing the management of educational institutions. For this reason, these managers should be leaders rather than executives who only work in a formal framework of organization management. Moreover, principals and teachers should also be leaders in all educational processes. Emotions are the main catalyst of positive organizational culture. Leaders can create an effective organizational culture with the main source of positive emotions between employers. Positive emotions also motivate employees for organizational purposes. If a leader wishes to create and maintain an effective organizational culture, it is essential to support positive behavior and emotional climate in their institutes and schools. Leaders-school-managers and teachers, therefore, need to develop emotion management abilities. Educational organizations need to shape their organizational culture, climate, and psychology to support their leaders in efficiently managing their employees’ emotions. Up to now, this topic has been usually addressed as the main catalyst and a sub-dimension of emotional intelligence. Moreover, current evidence classifies social and empathy skills as other sub-dimensions of emotional intelligence. For this reason, this collection of peer-reviewed articles will draw attention to the contemporary term emotional management and contribute to educational fields by means of exploring the relationship

between emotions and leadership.

Teaching and Learning at Business Schools Pär Mårtensson,Magnus Bild,2016-04-01 Business schools are facing ever increasing internationalization: students are far less homogenous than before, faculty members come from different countries, and teaching is carried out in second (or even third) languages. As a result business schools and their teachers wrestle with new challenges as these changes accelerate. Teaching and Learning at Business Schools brings together contributions from business school managers and educators involved in the International Teachers Programme; a faculty development programme started by Harvard Business School more than 30 years ago and now run by a consortium of the London Business School, Manchester Business School, Kellogg, Stern School of Business, INSEAD, HEC Paris, IAE Aix-en-Provence, IMD, SDA Bocconi Milan and Stockholm School of Economics. The book tackles themes both within the classroom - teaching across different contexts and cultures - and outside the classroom - leading and developing business schools, designing and running programmes, developing faculty members. The authors provide direction, ideas and techniques for transforming business education that are accessible to everyone.
