Building Desire George Dodds, 2005 'Building Desire' considers the Barcelona Pavilion, completed in 1929, & its forerunner, the German Pavilion of 1929, & looks at the work of Ludwig Mies van der Rohe. It examines in detail the role of photography in architecture & its continuing influence.

An Accidental Masterpiece Dietrich Neumann, 2020-12-07 The Complex History of a Building With the temporary exhibition pavilion of the German Reich at the 1929 International Exposition in Barcelona, Mies van der Rohe designed an architectural icon, but also a controversial monument of the way the Weimar Republic portrayed itself. The building is one of the most unusual success stories in the history of architecture: Despite its short existence, its reputation grew steadily in the following decades, thanks in part to magnificent photographs. It was soon considered the constructed manifesto of the Modern Age, and its spatial and ideational ambitions were called a milestone of Modern architecture. This comprehensively, broadly researched book portrays the building's complex history and its political entanglement—up to and including its reconstruction according to van der Rohe's plans at the original site between 1983 and 1986. Presumably the most important and influential architectural icon of the 20th century, uniquely documented and depicted On the occasion of the 50th anniversary of Mies' death and the Bauhaus centenary Many never before published photographs from archives in the US, Germany and Spain

The Barcelona Pavilion by Mies van der Rohe Dietrich Neumann, 2020-12-07 While Mies van der Rohe's pavilion at the International Exposition in Barcelona in 1929 went unnoticed by most of the visitors to the fairgrounds, contemporary critics enthusiastically hailed it as the most convincing statement of the Modern Age. This book presents 100 selected texts about this much discussed building, written then and now: from the opening speech by the Spanish king, to newspaper articles and private letters, voices of contemporary architects, architecture critics and historians, and even a text by artist Ai Weiwei, who created an installation in the outdoor area of the pavilion in 2010. Thus the history of this building's reception depicts a dazzling picture and inconceivable breadth, including statements by such eminent authors as Frank Lloyd Wright, Leonardo Benevolo, Rem Koolhaas, Peter Eisenman.

Fear of Glass Joseph Quetglas, 2001 The German Pavilion erected at the World Exhibition in Barcelona in 1929 was an imposing structure and a prime example of modern architecture. In this book, the author takes a lively and unconventional

approach to the building, interpreting the various architectural, historical and cultural aspects surrounding the construction. He examines the physical elements such as the columns, the terrace, the free-standing walls which enclose the pavilion and form a pattern of open and closed spaces. He also considers the aesthetic elements, the noble materials used, its representative qualities and reflecting on how material, structure, space and tradition are integrated into a unity.

Mies Reflections Josep M. Rovira i Gimeno,Lluís Casals,2002-01 The German Pavilion, built by Mies van der Rohe for the Barcelona International Exhibition of 1929, is a faithful reflection of the concept of less is more present in all his architecture. Photographs and text illustrate this singular place full of meaningful empty spaces where marble and glass capture the intangible essence of air and water.

Mies Van Der Rohe Dietrich Neumann,2024-09-24 A landmark survey, offering a nuanced and deeply researched account of the career and life of the iconic modern architect Ludwig Mies van der Rohe (1886-1969) was a German-born American architect and designer whose work in Europe and North America has had an enduring influence on modern and contemporary architecture worldwide. During his sixty-year career, he fundamentally rethought architectural types that shaped modern life, including the office building, apartment building, and private home. True to his alleged dictum less is more, Mies van der Rohe's style is characterized by utmost simplicity, elegance of materials, and radical formal and functional innovation, as exemplified by such iconic projects as the Farnsworth House in Plano, Illinois, and the Seagram Building in New York. In this book, renowned architectural historian Dietrich Neumann presents a new, critical look at Mies and complicates the established narrative about him. Diverging from the reverential posture of many existing accounts, Neumann insists on the importance of the contemporary context--social, political, and architectural--for understanding the

architect's life and work. The book draws on many overlooked archival and primary sources to demonstrate how and why Mies's designs were shaped and received, foregrounding contemporary critics' responses and the work of Mies's collaborators and peers. It presents several previously unknown buildings, projects, and furniture designs and challenges long-established interpretations of key works. Comprehensively illustrated and covering the entirety of Mies's career, this ambitious book is the most substantial account to date of the life and work of one of the most important architects of the twentieth century.

Tugendhat House. Ludwig Mies van der Rohe Daniela Hammer-Tugendhat, Ivo Hammer, Wolf Tegethoff, 2020-07-20 Built and designed by Ludwig Mies van der Rohe 1928-1930, the Tugendhat House in Brno / Czech Republic is one of the most significant buildings of European modernism. In 2001, UNESCO added the house to the List of World Cultural Heritage

Sites. In this third, updated edition, the authors give personal and historic insights relating to the house; also documenting aspects pertaining to art history and conservation-science studies. The comprehensive description and in-depth discussion of the materials used is a special feature in this field of research. The appeal of this monograph lies in the publication of photographs from the family archive which, for the first time, show the house in its lived-in condition. The experimental artistic color photographs by Fritz Tugendhat are among the pioneering achievements of amateur photography.

Architecture Jonathan Hill, 2014-04-04 The aim of this book is to expand the subject and matter of architecture, and to explore their interdependence. There are now many architectures. This book acknowledges architecture far beyond the familiar boundaries of the discipline and reassesses the object at its centre: the building. Architectural matter is not always physical or building fabric. It is whatever architecture is made of, whether words, bricks, blood cells, sounds or pixels. The fifteen chapters are divided into three sections - on buildings, spaces and bodies - which each deal with a particular understanding of architecture and architectural matter. The richness and diversity of subjects and materials discussed in this book locates architecture firmly in the world as a whole, not just the domain of architects. In stating that architecture is far more than the work of architects, this book aims not to deny the importance of architects in the production of architecture but to see their role in more balanced terms and to acknowledge other architectural producers. Architecture can, for example, be found in the incisions of a surgeon, the instructions of a choreographer or the movements of a user. Architecture can be made of anything and by anyone.

Mies Van Der Rohe, Furniture and Interiors Werner Blaser, 1982 The texts were written by a single person (complemented by a report from a user), the photographs, reproduced in duotone, all come from the same lens using an approach repeated again and again. Both attempt to show the objective state of affairs of Mies van der Rohe's solitary buildings with carefully collected and organized materials. An inner confrontation over decades opened up access to Mies' oeuvre for Werner Blaser, and thus, to this publication. The legacy of Mies van der Rohe's most fruitful intentions is thus visually assessed with in part unpublished picture material. Those with a more critical attitude should also be creatively confronted with the roots of good architecture through the intensity of the presentation, which will hopefully provide new stimulus.--BOOK JACKET.
