The Tree Book DK, 2022-05-17 The secret world of trees is revealed in this beautiful and absorbing guide to the giants of the plant world. Trees occur naturally throughout the world and have been a part of human history almost as long as humans have existed. Used for shelter, tools, fuel, and food, they also help supply the atmosphere with oxygen and form astonishingly diverse ecosystems, as well as some of the world's most beautiful landscapes. Now the intricate world of leafy woodlands and abundant rainforests is revealed in this extensive visual guide to trees, exploring their key scientific traits and their ecological importance, as well as their enduring significance in human history and culture. From ancient oaks and great redwoods to lush banyans and imposing kapoks, The Tree Book reveals the anatomy, behaviors, and beauty of these incredible plants and habitats in detail. Combining natural history and a scientific overview with a wider look at the history, uses, symbolism, and mythology of trees, this book is a new kind of guide to these fascinating organisms.

Australia's Poisonous Plants, Fungi and Cyanobacteria Ross McKenzie, 2020-05-01 Australia's Poisonous Plants, Fungi and Cyanobacteria is the first full-colour, comprehensive guide to the major natural threats to health in Australia affecting domestic and native animals and humans. The overriding aim of the book is to prevent poisoning, as there are few effective treatments available, particularly in domestic animals. The species have been chosen because of their capacity to threaten life or damage important organs, their relative abundance or wide distribution in native and naturalised Australian flora, or because of their extensive cultivation as crops, pastures or in gardens. These include flowering plants, ferns and cone-bearing plants, macrofungi, ergot fungi and cyanobacteria. The plant species are grouped by life form such as herbs, grasses and sedges, shrubs, trees, and for flowering plants by flower type and colour for ease of identification. Species described have colour photographs, distribution maps and notes on confusing species, habitats, toxins, animals affected, conditions of poisoning, clinical signs and symptoms, post mortem changes, therapy, prevention and control. Symbols are used for quick reference to poisoning duration and available ways of managing poisoning. As further aids to understanding, poisoning hot-spots are highlighted and the book lists plants under the headings of animals affected and organs affected. A Digest gives brief details for all poisonous species in Australia. This book is written in a straightforward style making it accessible to a wide audience including farmers, veterinarians, agricultural advisors, gardeners, horticulturists, botanists and park rangers, medical practitioners and paramedics, teachers, parents and pet owners. First published in 2012 as a hardback and made

available in eBook format in 2020.

RHS: A Nation in Bloom Matthew Biggs, 2019-05-06 With a foreword by Alan Titchmarsh, this beautifully illustrated book tells the story of the Royal Horticultural Society, the perhaps the foremost gardening institution in the world. The RHS is the world's largest gardening charity but what it does and why is little understood and rarely celebrated. From defining new gardening trends at the Chelsea Flower Show, to ranking the best dahlias to grow at the Wisley trial grounds, to inspiring communities with Britain in Bloom, educating children to grow and eat their veg through the Campaign for School Gardening, the RHS works tirelessly to improve the gardener's lot. With the use of evocative archive images and contemporary photos by award-winning Jason Ingram, this beautiful book explores the past, present and future of this most influential organisation by listening to the voices of those working today. Gardening expert and regular Gardener's Question Time panellist Matthew Biggs tells this story in rich and intimate detail, from the society's origins at the start of the 19th Century right through to the present day, with fascinating insight into the evolution and operations of the RHS throughout the years. From the thousands of volunteers in the society's five unique gardens (Wisley in Surrey, Rosemoor in Devon, Hyde Hall in Essex, Harlow Carr in Yorkshire and new addition Bridgewater in Salford), to the one million visitors to its inspirational flower shows (including Chelsea, Hampton Court, Tatton Park, Cardiff, Wisley and Chatsworth); the society gives meaning to more than 475,000 members, millions of television viewers and visitors from around the world. The RHS is the best of gardening, and this book presents the best of the RHS. Behind the scenes, access all areas, this book will give lasting pleasure to anyone who enjoys their garden.

The dictionary includes temperate tree fruits and nuts, small fruits, viticulture, vegetables, ornamental plants, hops, industrial crops, and subtropical and tropical fruit and plantation crops. The names of diseases, pests and weeds of horticultural crops are included, accompanied by their scientific names. The genders of nouns are indicated throughout, as are feminine forms of adjectives and the plurals of certain words.
