*Progetto e racconto* Carlo Olmo, 2020-04-02T00:00:00+02:00 Perché le storie dell'architettura moderna passano in pochi anni da grandi affreschi a indagini per specialisti? Perché lo storico dell'architettura viveva il suo lavoro come impegno intellettuale che si esercitava non solo negli archivi, ma anche alla radio, nei circoli sindacali e politici, in definitiva in comunità più allargate, e oggi si accontenta di una riconoscibilità quasi tra adepti? Perché il nodo che arrovellava gli storici era la funzione di quella scrittura mentre oggi è la difesa di una professione, delle sue regole interne, del riconoscimento che altri storici possono tributare al lavoro di ricerca storiografica? L'architettura pone a chi la voglia indagare questioni complesse, a partire dall'incipit: quali sono le fonti di questa storia. I disegni, i cantieri, le opere costruite, gli usi? È una storia che si scontra con i problemi più delicati per chi esercita il mestiere dello storico: le grandi architetture, così come quelle quotidiane, sono esempi straordinari di anacronismo che le catastrofi rendono espliciti, come nel caso dell'incendio della cattedrale di Notre-Dame. Ma la storia dell'architettura è anche una storia dei limiti, delle scansioni temporali, dei protagonisti delle vicende giuridiche e politiche. Esistono valori, credenze, modelli che siano europei o universali, locali o nazionali? È la storia dell'architettura a contribuire a definire patrimoni, icone, valori che si vorrebbe appartenessero a un'umanità oggi davvero ardua da definire. Quello dello storico dell'architettura è un mestiere che entra nella vita quotidiana dei cittadini, e, insieme, è un mestiere chiamato a definire gli scenari, gli immaginari, le stesse retoriche del mondo in cui viviamo. L'architettura e le sue storie sono parte del nostro modo di abitare la città, di viaggiare e conoscere la diversità, di pensare il futuro. Il libro vuole offrire non solo l'occasione di una riflessione sulle storie, ma anche di una possibile verifica sul modo in cui poi la storia si scrive, scegliendo quattro esempi, che toccano temi tra i più delicati di questa straordinaria materia.

**Curating Fascism** Sharon Hecker,Raffaele Bedarida,2022-11-17 On the centenary of the fascist party's ascent to power in Italy, *Curating Fascism* examines the ways in which exhibitions organized from the fall of Benito Mussolini's regime to the present day have shaped collective memory, historical narratives, and political discourse around the Italian ventennio. It charts how shows on fascism have evolved since the postwar period in Italy, explores representations of Italian fascism in exhibitions across the world, and highlights blindspots in art and cultural history, as well as in exhibition practices. Featuring contributions from an international group of art, architectural, design, and cultural historians, as well as journalists and curators, this book treats fascism as both a historical moment and as a major paradigm through which critics, curators, and the public at large have defined the present moment since World War II. It interweaves historical perspectives, critical theory, and direct accounts of exhibitions from the people who conceived them or responded to them most significantly in order to examine the main curatorial strategies, cultural relevance, and political responsibility of art exhibitions focusing on the Fascist period. Through close analysis, the chapter authors unpack the multifaceted specificity of art shows, including architecture and exhibition design; curatorial choices and institutional history; cultural diplomacy and political history; theories of viewership; and constructed collective memory, to evaluate current curatorial practice. In offering fresh new perspectives on the historiography, collective memory, and understanding of fascist art and culture from a contemporary standpoint, *Curating Fascism* sheds light on the complex exhibition history of Italian fascism not just within Italy but in such countries as the USA, the UK, Germany, and Brazil. It also presents an innovative approach to the growing field of exhibition theory by bringing contributions from curators and exhibition historians, who critically reflect upon curatorial strategies with respect to the delicate subject of fascism and fascist art, into dialogue with scholars of Italian studies and art historians. In doing so, the book addresses the physical and cultural legacy of fascism in the context of the current historical moment.

**Cultural, Theoretical, and Innovative Approaches to Contemporary Interior Design** Crespi, Luciano,2020-02-07 Interior design can be considered a discipline that ranks among the worlds of art, design, and architecture and provides the cognitive tools to operate innovatively within the spaces of the contemporary city that require regeneration. Emerging trends in design combine disciplines such as new aesthetic in the world of art, design in all its ramifications, interior design as a response to more than functional needs, and as the demand for qualitative and symbolic values to be added to contemporary environments. *Cultural, Theoretical, and Innovative Approaches to Contemporary Interior Design* is an essential reference source that approaches contemporary project development through a cultural and theoretical lens and aims to demonstrate that designing spaces, interiors, and the urban habitat are activities that have independent cultural foundations. Featuring research on topics such as contemporary space, mass housing, and flexible design, this book is ideally designed for interior designers, architects, academics, researchers, industry professionals, and students.

**Developments in Design Research and Practice II** Emilia Duarte, Annalisa Di Roma, 2023-05-08 This book reports on innovative research and practices in contemporary design, showing how to integrate different concepts and discussing the emerging role of design in different field, its meaning for humans and citizens, as well as its impact on society and the global ecosystem. Gathering the best papers from Senses & Sensibility, held on December 9-11, 2021 in Bari, Italy, it highlights the role of design in fostering education, physical and social wellbeing, industrial innovation and cultural preservation, as well as inclusivity, sustainability and communication in a world facing complex challenges on a global scale.

*When Buildings Speak* Anthony Alofsin, 2006 The canonical inventors of International Style have long dominated studies of modern European architecture. But in this text, Anthony Alofsin broadens this scope by exploring the rich yet overlooked architecture of the late Austro-Hungarian Empire and its successor states.

**La transizione tra interno ed esterno nell'architettura contemporanea** Giovanna Grella, 2011-11-10T00:00:00+01:00 Questa collana raccoglie, opportunamente riscritte e depurate degli aspetti più 'scolastici', le migliori tesi del dottorato di Recupero, valorizzazione e tutela nei contesti insediativi e territoriali di elevato valore ambientale e paesistico (Facoltà di Ingegneria dell'Aquila). La multidisciplinarietà composita in cui è articolato il Collegio dei docenti ha prodotto, finora, filoni sicuramente troppo eterogenei, che è assai difficile tenere insieme. Ma una progressiva riflessione ha lentamente condotto ad affinare i temi e la possibilità di integrazione fra i docenti e le discipline presenti, convergendo verso ambiti più nettamente caratterizzati dai centri storiciminori e dal paesaggio/territorio. Non c'è dubbio che la recente, traumatica esperienza del terremoto del 6 Aprile, orienterà ulteriormente le tematiche di ricerca verso scienza, tecnica, storia, recupero del ben costruire, così necessario nella attuale situazione della città dell'Aquila e dei centri nell'area colpita dal sisma, dove sono tuttora irrisolti i problemi della sopravvivenza stessa e della rinascita urbana di un intero territorio. Il senso contestuale di un nuovo intervento costituisce un campo di riflessione e sperimentazione preciso nello sviluppo dell'architettura dal secondo dopoguerra ad oggi. L'attualità della questione sta nel fatto che negli ultimi anni si è verificata un'estesa utilizzazione di quei linguaggi del moderno (spesso dissonanti con i contesti) e, contemporaneamente si è alquanto dilatata la concezione inclusiva, contestuale dell'architettura. In particolare la storia e la città hanno attenuato il peso determinante che decenni addietro mantenevano nel sapere progettuale: l'astrattezza dei linguaggi contemporanei, le assume piuttosto come terreni di problematico confronto. Questo modo di sentire la complessità contestuale imposta delle strategie progettuali che coinvolgono tutto l'organismo architettonico e che in particolare trovano un'articolazione fondamentale nel rapporto interno-esterno. Sul tema, abbondanti studi hanno recentemente esaminato i nuovi orizzonti tecnologici dell'involucro: l'involucro come vetrate complesse, come maschera, come pelle, come schermo. In questo studio di Giovanna Grella il proposito è più esaustivo vedendo in un pacchetto complesso il convergere o lo sfumarsi dell'impianto interno e di quello esterno: una problematica non solo linguistico-tecnologica, ma anche: spaziale, tipologica, funzionale,

inquadrabile con una sua specificità nella cultura del progetto contemporaneo. (Sergio Rotondi) Giovanna Grella, ingegnere, è stata assegnista di ricerca presso il Dipartimento di Architettura e Urbanistica dell'Università dell'Aquila, dove collabora con il prof. Sergio Rotondi. Lavora nello Studio Transit di Roma. Prefazione di Sergio Rotondi e postfazione di Giovanni Ascarelli.

**Studies in Tectonic Culture** Kenneth Frampton, 2001-08-24 Composed of ten essays and an epilogue that trace the history of contemporary form as an evolving poetic of structure and construction, the book's analytical framework rests on Frampton's close readings of key French and German, and English sources from the eighteenth century to the present. Kenneth Frampton's long-awaited follow-up to his classic *A Critical History of Modern Architecture* is certain to influence any future debate on the evolution of modern architecture. *Studies in Tectonic Culture* is nothing less than a rethinking of the entire modern architectural tradition. The notion of tectonics as employed by Frampton—the focus on architecture as a constructional craft—constitutes a direct challenge to current mainstream thinking on the artistic limits of postmodernism, and suggests a convincing alternative. Indeed, Frampton argues, modern architecture is invariably as much about structure and construction as it is about space and abstract form. Composed of ten essays and an epilogue that trace the history of contemporary form as an evolving poetic of structure and construction, the book's analytical framework rests on Frampton's close readings of key French and German, and English sources from the eighteenth century to the present. He clarifies the various turns that structural engineering and tectonic imagination have taken in the work of such architects as Perret, Wright, Kahn, Scarpa, and Mies, and shows how both constructional form and material character were integral to an evolving architectural expression of their work. Frampton also demonstrates that the way in which these elements are articulated from one work to the next provides a basis upon which to evaluate the works as a whole. This is especially evident in his consideration of the work of Perret, Mies, and Kahn and the continuities in their thought and attitudes that linked them to the past. Frampton considers the conscious cultivation of the tectonic tradition in architecture as an essential element in the future development of architectural form, casting a critical new light on the entire issue of modernity and on the place of much work that has passed as avant-garde. A copublication of the Graham Foundation for Advanced Studies and The MIT Press.

The School of Mathematics at Rome's University Campus Simona Salvo, 2022-09-28 The School of Mathematics is a masterpiece of the early 1930s by Gio Ponti, who is today regarded as a master of Italian Modernism. Although World War II bombings shattered the coloured stained-glass window that once adorned the balanced and harmonious white travertine façade, the building remains a striking and significant piece of architecture. Although it underwent a series of transformations over the years before its historical and artistic relevance was recognised, it can still be appreciated and admired for its magnificent expressivity. Its uniqueness derives from its complexity, such as is often found in Italian

monuments of all ages: a rare synthesis of urban design, architecture, art, industrial design, historical archives and – perhaps the first of its kind – scientific production in the field of mathematics. This illustrated report is a synopsis of the extensive technical research documents produced by the research team for each step of the work. It is also a premise for the conservation management plan proposed at the end of the full report. As in any area of science, knowledge is at the basis of future action: we need to understand today how to take care of the historical buildings of our campus tomorrow – buildings recognised worldwide as architectural and historical monuments.

*Textile in Architecture* Didem Ekici, Patricia Blessing, Basile Baudez, 2023-06-30 This book investigates the interconnections between textile and architecture via a variety of case studies from the Middle Ages through the twentieth century and from diverse geographic contexts. Among the oldest human technologies, building and weaving have intertwined histories. Textile structures go back to Palaeolithic times and are still in use today and textile furnishings have long been used in interiors. Beyond its use as a material, textile has offered a captivating model and metaphor for architecture through its ability to enclose, tie together, weave, communicate, and adorn. Recently, architects have shown a renewed interest in the textile medium due to the use of computer-aided design, digital fabrication, and innovative materials and engineering. The essays edited and compiled here, work across disciplines to provide new insights into the enduring relationship between textiles and architecture. The contributors critically explore the spatial and material qualities of textiles as well as cultural and political significance of textile artifacts, patterns, and metaphors in architecture. *Textile in Architecture* is organized into three sections: “Ritual Spaces,” which examines the role of textiles in the formation and performance of socio-political, religious, and civic rituals; “Public and Private Interiors” explores how textiles transformed interiors corresponding to changing aesthetics, cultural values, and material practices; and “Materiality and Material Translations,” which considers textile as metaphor and model in the materiality of built environment. Including cases from Morocco, Samoa, France, India, the UK, Spain, the Ancient Andes and the Ottoman Empire, this is essential reading for any student or researcher interested in textiles in architecture through the ages.
