The Crime of Maldevelopment María Laura Böhm,2018-09-13 This book explores the causal relationship between the deregulation of international economic interests and the forms of violence that prevail in a large part of the Global South. More specifically, this book tells the story of how transnational corporations benefitting from increasing deregulation of their international economic interests, account for severe harm, the unrelenting violation of human rights, and maldevelopment in Latin America. Dependent on the structural deficiencies of the Latin American region, this book tests the examples of the extractive industries and multinational expansionism and the link between deregulated economies at the international level and the damaging local effects that increase what is here called maldevelopment. Introducing the conceptual category of maldevelopment to criminology, the author makes recommendations for further research and outlines a network of possible mechanisms for its prevention and sanction - and for the work of reparation and construction towards the satisfaction of the needs of the victim or victimizable populations. This provocative and original text will be essential reading for those concerned with white collar crime and crimes of the powerful, and for researchers in criminology, sociology, law, political science, development studies and international political economy.

Water and Conflict: Incorporating Peacebuilding Into Water Development Jason Gehrig,Mark M. Rogers,2009-08-14 Water is a simple but necessary part of life. Yet much of the world's population lacks adequate clean water, either because of physical scarcity or because they are denied equitable access to water resources. Such conditions inevitably breed conflict. Water-related violence is common in many parts of the world and is generally expected to increase in the years ahead.This document is intended to assist water development practitioners, civil society peacebuilders and

human rights advocates seeking to integrate water and peacebuilding in their work. The purpose is twofold: to furnish a conceptual framework for understanding problems of scarcity and equity, and to provide practical guidance and tools for action. The text distills an extensive literature on water, conflict, and cooperation produced in recent years by researchers and development practitioners. Case studies and reflections are included to keep theory grounded in reality.

The Violence of Development Martin Mowforth, 2014-03-20 This book examines the failure of 'development' in Central America, where despite billions of dollars of development funding and positive indicators of economic growth, poverty remains entrenched and violence endemic. Martin Mowforth shows how development is predicated on force and systematic violence, through which the world's most powerful governments, financial institutions and companies punish the global south. Crucially, the analysis in *The Violence of Development* comes from many development project case studies and over sixty interviews with a range of people in Central America, including nuns, politicians, NGO representatives, trade unionists, indigenous leaders and human rights defenders. This book is a compelling synthesis of first-hand research and development theory.

Green Crime in the Global South David R. Goyes, 2023-06-24 This book presents a socio-criminological study of environmental crime in the global South. It gathers contributors from all the regions of the geographical global South (Africa, Asia, Oceania, and Latin America) to discuss instances of environmental crime and conflict. Overall, it seeks to further decolonise the knowledge production of green criminology. It considers the legacy of colonisation, North-South and the core-periphery divides in the production of environmental crime, the epistemological contributions of the marginalised, impoverished, and oppressed, and the unique contexts of the global South. This book has three sections: drivers of green crime in the global South; responses to environmental harm in the global South; and global dialogues about crime and destruction in the global South. The first two sections represent the breadth of the topics that green criminologists have historically studied but from unique perspectives. The third section explores ethical and decolonial ways for Southern green criminology to collaborate with Western academia. This book speaks to scholars in criminology, political ecology, decolonial theory, along with the many readers interested in the interactions between humans and nature.

Extracting Honduras James J. Phillips, 2022-01-04 With a focus on Honduras, James J. Phillips explores the deeper causes of the massive emigration of Central Americans to the United States. Going beyond the frequently given reasons for migration, Phillips provides a detailed account of how the frenzied extraction of natural resources has created massive community displacement, dependency, poverty, and vulnerability, while encouraging corruption, violence, gang recruitment,

drug trafficking, militarization of Honduran society, and systematic repression of popular protest and resistance. Highlighting how this situation is tied to the colonial (or imperial) extractive relationship of Honduras to the United States, Phillips contends that the usual policy of development aid and investment to stem migration will only worsen the conditions that create migration. With this book, Phillips depicts how the Central American immigration “crisis” shapes life in the United States and Honduras, while making clear that the effects are not what populist politics imagine.

Contesting Trade in Central America Rose J. Spalding, 2014-04-15 In 2004, the United States, five Central American countries, and the Dominican Republic signed the Central American Free Trade Agreement (CAFTA), signaling the region’s commitment to a neoliberal economic model. For many, however, neoliberalism had lost its luster as the new century dawned, and resistance movements began to gather force. *Contesting Trade in Central America* is the first book-length study of the debate over CAFTA, tracing the agreement’s drafting, its passage, and its aftermath across Central America. Rose J. Spalding draws on nearly two hundred interviews with representatives from government, business, civil society, and social movements to analyze the relationship between the advance of free market reform in Central America and the parallel rise of resistance movements. She views this dynamic through the lens of Karl Polanyi’s “double movement” theory, which posits that significant shifts toward market economics will trigger oppositional, self-protective social countermovements. Examining the negotiations, political dynamics, and agents involved in the passage of CAFTA in Costa Rica, El Salvador, and Nicaragua, Spalding argues that CAFTA served as a high-profile symbol against which Central American oppositions could rally. Ultimately, she writes, post-neoliberal reform “involves not just the design of appropriate policy mixes and sequences, but also the hard work of building sustainable and inclusive political coalitions, ones that prioritize the quality of social bonds over raw economic freedom.”

Transnational Activism and National Movements in Latin America Eduardo Silva, 2013-08-21 During the 1990s, as widespread perception spread of declining state sovereignty, activists and social movement organizations began to form transnational networks and coalitions to pressure both intergovernmental organizations and national governments on a variety of issues. Research has focused on the formation of these transnational networks, campaigns, and coalitions; their objectives, strategies and tactics; and their impact. Yet the issue of how participation in transnational networks influences national level mobilization has been little analyzed. What effects has the experience of social movement organizations at the transnational scale had for the development at the national scale? This volume addresses this significant gap in the literature on transnational collective action by building on approaches that stress the multi-level characteristics of transnational relations. Edited by noted Latin American politics scholar Eduardo Silva, the contributions focus on four distinct themes to

which the empirical chapters contribute: Building a Transnational Relations Approach to Multi-Level Interaction; Transnational Relations and Left Governments; North-South and South-South Linkages; and The Normalization of Labor. Bridging the Divide will add considerably to empirical knowledge of the ways in which transnational and national factors dynamically interact in Latin America. Additionally, the mid-range theorizing of the empirical chapters, along with the mix of positive and negative cases, raises new hypotheses and questions for further study.

The Taiwan Crisis: a showcase of the global arsenic problem Jiin-Shuh Jean,Jochen Bundschuh,Chien-Jen Chen,How-Ran Guo,Chen-Wuing Liu,Tsair-Fuh Lin,Yen-Hua Chen,2011-03-03 In the 1950s, the residents of the southwestern coastal areas of Taiwan suffered greatly from Blackfoot disease (BFD) due to the consumption of arsenic-contaminated groundwater.

Groundwater with high levels of arsenic in southwestern and northeastern Taiwan received much attention. After arsenic-safe tap water was utilized for drinking instead of groundwater in the 1970s, BFD cases decreased greatly. After 1990, no new BFD cases were reported, and as a consequence, BFD problems disregarded. However, arsenic is still present in the groundwater. This book will improve the knowledge and understanding of the occurrence and genesis of arsenic-rich groundwaters in Taiwan. It deals with constraints on the mobility of arsenic in groundwater, its uptake from soil and water by plants, arsenic-propagation through the food chain, human health impacts, and arsenic-removal technologies. Taiwan case experiences are described in this book and can be applied worldwide. This book is a state-of-the-art overview of research on arsenic in Taiwan and is designed to: create interest in regions within Taiwan that are affected by the presence of arseniferous aquifers; draw attention from the international scientific community; increase awareness among researchers, administrators, policy makers, and company executives; improve the international cooperation on arsenic problems worldwide.
