**Dancing Jacobins** Rafael Sánchez, 2016-04-28 Since independence from Spain, a trope has remained pervasive in Latin America's republican imaginary: that of an endless antagonism pitting civilization against barbarism as irreconcilable poles within which a nation's life unfolds. This book apprehends that trope not just as the phantasmatic projection of postcolonial elites fearful of the popular sectors but also as a symptom of a stubborn historical predicament: the cyclical insistence with which the subaltern populations menacingly return to the nation's public spaces in the form of crowds. Focused on Venezuela but relevant to the rest of Latin America, and drawing on a rich theoretical literature including authors like Derrida, Foucault, Lacoue-Labarthe, Nancy, Lyotard, Laclau, Taussig, and others, *Dancing Jacobins* is a genealogical investigation of the intrinsically populist "monumental governmentality" that in response to this predicament began to take shape in that nation at the time of independence. Informed by a Bolivarian political theology, the nation's representatives, or "dancing Jacobins," recursively draw on the repertoire of busts, portraits, and equestrian statues of national heroes scattered across Venezuela in a montage of monuments and dancing—or universal and particular. They monumentalize themselves on the stage of the polity as a ponderously statuesque yet occasionally riotous reflection of the nation's general will. To this day, the nervous oscillation between crowds and peoplehood intrinsic to this form of government has inflected the republic's institutions and constructs, from the sovereign "people" to the nation's heroic imaginary, its constitutional texts, representative figures, parliamentary structures, and, not least, its army. Through this movement of collection and dispersion, these institutions are at all times haunted and imbued from within by the crowds they otherwise set out to mold, enframe, and address.

**Genericity** Alda Mari, Claire Beyssade, Fabio Del Prete, 2012-12-20 This book provides an up-to-date introduction to the study of generics and pursues the enterprise of the influential *Generic Book* edited by Gregory Carlson and Jeffry Pelletier, which was published in 1995. *Genericity* is a key notion in the study of human cognition as it reveals our capacity to organize our perceived reality into classes and to describe regularities. The generic can be expressed at the level of a word or phrase (ie the potato in The Irish economy became dependent upon the potato) or an entire sentence (eg in John smokes a cigar after dinner, the generic aspect is a property of the expression, rather than any single word or phrase within it). This book gathers new work from senior and young researchers to reconsider the notion of genericity, examining the distinct

contributions made by the determiner phrase (eg the notions of kind/individual) and the verbal predicate (eg the notions of permanency, disposition, ability, habituality, and plurality). Finally, in connection with the whole sentence, the analytic/synthetic distinction is discussed as well as the notion of normality. The book will appeal to both students and scholars in linguistics, philosophy and cognitive science

**Reconstructing Italy** Stephanie Zeier Pilat,2016-04-08 Reconstructing Italy traces the postwar transformation of the Italian nation through an analysis of the Ina-Casa plan for working class housing, established in 1949 to address the employment and housing crises. Government sponsored housing programs undertaken after WWII have often been criticized as experiments that created more social problems than they solved. The neighborhoods of Ina-Casa stand out in contrast to

their contemporaries both in terms of design and outcome. Unlike modernist high-rise housing projects of the period, Ina-Casa neighborhoods are picturesque and human-scaled and incorporate local construction materials and methods resulting in a rich aesthetic diversity. And unlike many other government forays into housing undertaken during this period, the Ina-Casa plan was, on the whole, successful: the neighborhoods are still lively and cohesive communities today. This book examines what made Ina-Casa a success among so many failed housing experiments, focusing on the tenuous balance struck between the legislation governing Ina-Casa, the architects who led the Ina-Casa administration, the theory of design that guided architects working on the plan, and an analysis of the results—the neighborhoods and homes constructed. Drawing on the writings of the architects, government documents, and including brief passages from works of neorealist literature and descriptions of neorealist films by Pier Paolo Pasolini, Italo Calvino and others, this book presents a portrait of the postwar struggle to define a post-Fascist Italy.

Ray Barry Hannah, 2007-12-01 “A shorthand epic of extraordinary power . . . A novel of brilliant particulars and dizzying juxtapositions” from the acclaimed southern author of *Geronimo Rex* (Newsweek). Nominated for the American Book Award, Ray is the bizarre, hilarious, and consistently adventurous story of a life on the edge. Dr. Ray—a womanizer, small-town drunk, vigilante, poet, adoring husband—is a man trying to make sense of life in the twentieth century. In flight from the death he dealt flying over Vietnam, Dr. Ray struggles with those bound to him by need, sickness, lunacy, by blood and by love. “This novel hangs in the memory like a fishhook. It will haunt you long after you have finally put it down. Barry Hannah is a talent to reckon with, and I can only hope that Ray finds an audience it deserves.” —Harry Crews, *The Washington Post Book World*

**Code and Clay, Data and Dirt** Shannon Mattern, 2017-11-01 For years, pundits have trumpeted the earthshattering changes that big data and smart networks will soon bring to our cities. But what if cities have long been built for intelligence, maybe for millennia? In *Code and Clay, Data and Dirt* Shannon Mattern advances the provocative argument that our urban spaces have been “smart” and mediated for thousands of years. Offering powerful new ways of thinking about our cities, *Code and Clay, Data and Dirt* goes far beyond the standard historical concepts of origins, development, revolutions, and the accomplishments of an elite few. Mattern shows that in their architecture, laws, street layouts, and civic knowledge—and through technologies including the telephone, telegraph, radio, printing, writing, and even the human voice—cities have long negotiated a rich exchange between analog and digital, code and clay, data and dirt, ether and ore. Mattern’s vivid prose takes readers through a historically and geographically broad range of stories, scenes, and locations, synthesizing a new

narrative for our urban spaces. Taking media archaeology to the city's streets, Code and Clay, Data and Dirt reveals new ways to write our urban, media, and cultural histories.
