Doing Business 2007 World Bank,2006-01-01 Doing Business 2007 focuses on reforms, identifies top reformers in business regulation, and best practices in how to reform. This volume is the fourth in a series of annual reports investigating global regulations that enhance business activity and those that constrain it. Co-sponsored by the World Bank and the International Finance Corporation - the private sector arm of the World Bank Group - this year's report measures quantitative indicators on business regulations and their enforcement compared across 175 countries - from Afghanistan to Zimbabwe - and over time. Doing Business 2007 updates indicators developed in the three preceding reports. The ten indicators are: starting a business, dealing with licenses, hiring and firing, registering property, getting credit, protecting investors, trading across borders, paying taxes, enforcing contracts, and closing a business. The indicators are used to analyze economic and social outcomes, such as informality, corruption, unemployment, and poverty. This annually published report gives policymakers the ability to measure regulatory performance in comparison to other countries, learn from best practices globally, and prioritize reforms. This year's report covers 20 additional countries.

The book will be updated and published every year. Any company that considers it is eligible for inclusion in the next edition of MAJOR COMPANIES OF THE FAR EAST & AUSTRALASIA, should write to the publishers. Entrepreneurship and Development in Nepal Pawan Adhikari, Jay Mitra, Shovita Dhakal Adhikari, Rupesh Krishna Shrestha, 2024-09-27 This book illustrates a connection between entrepreneurship and development in an emerging economy context, focusing on Nepal. That entrepreneurship contributes to sustainable development by creating jobs, elevating economic growth, promoting innovation, and mitigating social and environmental challenges is discussed in other works. Entrepreneurship is linked to several sustainable development goals. However, relatively little is known about entrepreneurship in Nepal at an international level and rarely have researchers attempted to explore the relationship between entrepreneurship and development in the Nepalese context. In this regard, this book generates valuable insights, not only contributing to policy implications but also setting a direction for entrepreneurship research in Nepal within a wider context of sustainable development. In particular, the book discusses several important issues on entrepreneurship, including migrant entrepreneurship, entrepreneurial ecosystem, social entrepreneurship, entrepreneurial finance, community-based entrepreneurship, and tourism entrepreneurship, issues which are intrinsically connected to the sustainable development of the country. In addition to policy contributions, the book provides a direction for facilitating theoretically underpinned work in entrepreneurship and development in the Nepalese context. The factors driving entrepreneurship, including specific social-cultural and historical factors that remain relevant for emerging economies, and emancipation, inclusion and participation, which are central to achieving development, are to be theorized in order to better understand the relationship between entrepreneurship and development. The topics covered by the book will be of interest to policy-makers from

ministries and departments, international organizations, and development partners.

Business Governance and Society Rajagopal, Ramesh Behl, 2018-09-14 This volume critically analyzes the convergence of technology, business practices, public policies, political ideologies, and societal values for improving business performance at the global-local paradigm. It also enriches knowledge on contemporary business strategies against conventional wisdom of managing companies today. Shifts in the global economic and political order have significantly affected the business patterns within developed, developing, and emerging markets. The reversal of political ideologies from liberal to protectionist business frameworks are disrupting the trade flows that were rooted in the international economy since the mid-twentieth century. The essays contemplate developing new visions and business perspectives to match with the changing political ideologies in emerging markets. This volume will serve as a valuable tool to readers looking for global market management strategies to generate cost-effective business models and create convergence with political and social values to drive better governance of businesses.
