El Hacendado mexicano y fabricante de azucar ,1904

El presidencialismo mexicano Jorge Carpizo,2002 A pesar del interés creciente que despierta, el tema del poder ejecutivo en México ha sido poco estudiado. Este ensayo dibuja un panorama general del presidencialismo mexicano hoy en día, su organización, las más importantes facultades que el presidente posee, derivadas tanto de la constitución, de la ley, como del sistema político. En el libro se plantean por primera vez algunos de los principales problemas que presenta nuestro sistema presidencial y se proponen soluciones. Frente a las múltiples funciones que posee el presidente se señalan los límites que tiene, y se hacen resaltar los controles que el legislativo debe ejercer con el objeto de lograr el equilibrio de poderes que la constitución estructura. Este estudio aunque realizado con la metodología jurídica, no descuida los aspectos históricos, sociológicos, económicos y políticos, con el propósito de presentar qué es realmente el régimen presidencial mexicano. El autor no pretendió realizar un ensayo jurídico puro; al contrario, con frecuencia confronta la norma con la realidad. Esta es la clase de estudios constitucionales que un país como México necesita.
