*Sanctuaries of Earth, Stone, and Light* Gloria Fraser Giffords, 2022-08-23 Over nearly three centuries, Jesuit, Franciscan, and Dominican missionaries built a network of churches throughout the “new world” of New Spain. Since the early twentieth century, scholars have studied the colonial architecture of southern New Spain, but they have largely ignored the architecture of the north. However, as this book clearly demonstrates, the colonial architecture of Northern New Spain—an area that encompasses most of the southwestern United States and much of northern Mexico—is strikingly beautiful and rich with meaning. After more than two decades of research, both in the field and in archives around the world, Gloria Fraser Giffords has authored the definitive book on this architecture. Giffords has a remarkable eye for detail and for images both grand and diminutive. Because so many of the buildings she examines have been destroyed, she sleuthed through historical records in several countries, and she discovered that the architecture and material culture of northern New Spain reveal the influences of five continents. As she examines objects as large as churches or as small as ornamental ceramic tile she illuminates the sometimes subtle, sometimes striking influences of the religious, social, and artistic traditions of Europe (from the beginning of the Christian era through the nineteenth century), of the Muslim countries ringing the Mediterranean (from the seventh through the fifteenth centuries), and of Northern New Spain’s indigenous peoples (whose art influenced the designs of occupying Europeans). *Sanctuaries of Earth, Stone, and Light* is a pathbreaking book, featuring 200 stunning photographs and over 300 illustrations ranging from ceremonial garments to detailed floor plans of the churches.

El Camino Real de California Joseph P. Sánchez, 2019-11-01 The arrival of Spaniards in 1769 served as a defining moment for California’s future. They described the First Peoples and their cultures and provided a window into the evolution of California’s Camino Real. In an effort to establish the Camino Real de California as a UNESCO World Heritage Site, Joseph P. Sánchez explores the rich history of the path running from San Diego to San Francisco in this significant study. While records capture the stories and legends of the Camino Real there is little information on the exact ground route. Sánchez utilizes historical and archaeological literature and the documentation from Spanish and Mexican archives to begin the

much-needed process of authentication of this braided corridor to further establish the Camino Real de California's integrity and valuable history, which is shared with Spain, Mexico, and Native American tribes. Their story is part of the patrimony of the Camino Real de California, which ought to be authenticated, preserved, and protected for future generations to enjoy.

**Sixteenth-Century Mission** Robert L. Gallagher, Edward L. Smither, 2021-04-07 Did the Reformers lack a vision for missions? In *Sixteenth-Century Mission*, a diverse cast of contributors explores the wide-reaching practice and theology of mission during this era. Rather than a century bereft of cross-cultural outreach, we find both Reformers and Roman Catholics preaching the gospel and establishing the church in all the world. This overlooked yet rich history reveals themes and insights relevant to the practice of mission today.

**California Through Russian Eyes, 1806-1848** James R. Gibson, 2013-10-23 In the early nineteenth century, Russia established a colony in California that lasted until the Russian-American Company sold Fort Ross and Bodega Bay to John Sutter in 1841. This annotated collection of Russian accounts of Alta California, many of them translated here into English from Russian for the first time, presents richly detailed impressions by visiting Russian mariners, scientists, and Russian-American Company officials regarding the environment, people, economy, and politics of the province. Gathered from Russian archival collections and obscure journals, these testimonies represent a major contribution to the little-known history of Russian America. Well educated and curious, the visiting Russians were acute observers, generous in their appreciation of Hispanic hospitality but outspoken in their criticisms of all they found backward or abhorrent. In the various reports and reminiscences contained within this volume, they make astute observations of both Hispanic and Native inhabitants, describing the Catholic missions with their devout friars and neophyte workers; the corruptible Franciscan missionaries; the sorry plight of mission Indians; the Californios themselves, whose religion, language, dwellings, cuisine, dress, and pastimes were novel to the Russians; the economic and social changes in Alta California following Mexican independence; and the schemes of American traders and settlers to draw the province into the United States. Amplified by James R. Gibson's

informative annotations, and featuring a gallery of elegant color illustrations, this unique volume casts new light on the history of Spanish and Mexican California.

*Disaster in the Early Modern World* Ovanes Akopyan, David Rosenthal, 2023-11-17 How did early modern societies think about disasters, such as earthquakes or floods? How did they represent disaster, and how did they intervene to mitigate its destructive effects? This collection showcases the breadth of new work on the period ca. 1300-1750. Covering topics that range from new thinking about risk and securitisation to the protection of dikes from shipworm, and with a geography that extends from Europe to Spanish America, the volume places early modern disaster studies squarely at the intersection of intellectual, cultural and socio-economic history. This period witnessed fresh speculation on nature, the diffusion of disaster

narratives and imagery and unprecedented attempts to control the physical world. The book will be essential to specialists and students of environmental history and disaster, as well as general readers who seek to discover how pre-industrial societies addressed some of the same foundational issues we grapple with today.

**Death and Dying in Colonial Spanish America** Martina Will de Chaparro, Miruna Achim, 2011-12-01 When the Spanish colonized the Americas, they brought many cultural beliefs and practices with them, not the least of which involved death and dying. The essays in this volume explore the resulting intersections of cultures through recent scholarship related to death and dying in colonial Spanish America between the sixteenth and eighteenth centuries. The authors address such important questions as: What were the relationships between the worlds of the living and the dead? How were these relationships sustained not just through religious dogma and rituals but also through everyday practices? How was unnatural death defined within different population strata? How did demographic and cultural changes affect mourning? The variety of sources uncovered in the authors' original archival research suggests the wide diversity of topics and approaches they employ: Nahua annals, Spanish chronicles, Inquisition case records, documents on land disputes, sermons, images, and death registers. Geographically, the range of research focuses on the viceroyalties of New Spain, Peru, and New Granada. The resulting records—both documentary and archaeological—offer us a variety of vantage points from which to view each of these cultural groups as they came into contact with others. Much less tied to modern national boundaries or old imperial ones, the many facets of the new historical research exploring the topic of death demonstrate that no attitudes or practices can be considered either 'Western' or universal.

*A Century of Retablos* Charles M. Carrillo, Thomas J. Steele, 2007 In recent years, tremendous attention has been focused on the Arts of 18th and 19th century New Mexico. This colonial period benefited from a creative and religious community that populated the region. Retablos, painted panels depicting saints worshiped in churches and private homes, were an important part of the rich culture. The Lyon Collection beautifully illustrates the breadth of Retablo painting by examining specific Santo's stylistic development as well as the iconography and social history of each painting. This landmark publication will be of great use to the ongoing study of colonial southwestern art and history. 107 colour illustrations

*The First Viral Images* Stephanie Porras, 2022-10-25 As a social phenomenon and a commonplace of internet culture, virality provides a critical vocabulary for addressing questions raised by the global mobility and reproduction of early modern artworks. This book uses the concept of virality to study artworks' role in the uneven processes of early modern globalization. Drawing from archival research in Asia, Europe, and the Americas, Stephanie Porras traces the trajectories of two interrelated objects made in Antwerp in the late sixteenth century: Gerónimo Nadal's *Evangelicae historiae imagines*, an illustrated devotional text published and promoted by the Society of Jesus, and a singular composition by Maerten de Vos, *St. Michael the Archangel*. Both were reproduced and adapted across the early modern world in the seventeenth century. Porras examines how and why these objects traveled and were adopted as models by Spanish and Latin American painters, Chinese printmakers, Mughal miniaturists, and Filipino ivory carvers. Reassessing the creative labor underpinning the production of a diverse array of copies, citations, and reproductions, Porras uses virality to elucidate the interstices of the agency of individual artists or patrons, powerful gatekeepers and social networks, and economic, political, and religious infrastructures. In doing so, she tests and contests several analytical models that have dominated art-historical scholarship of the global early modern period, putting pressure on notions of copying, agency, context, and viewership. Vital and engaging, *The First Viral Images* sheds new light on how artworks, as agents of globalization, navigated and contributed to the emerging and intertwined global infrastructures of Catholicism, commerce, and colonialism.
