*Text Competence and Academic Multiliteracy* Susanne Göpferich, 2015-01-28 How can text competence be fostered in a more efficient and effective manner? This book is among the first to combine the US-American discourse on this question with the German discourse. The topics covered range from text linguistic foundations via text comprehension and comprehensibility to text production, writing skills development and writing in a second or foreign language. Students interested in writing research will be introduced to the pertinent models and theories. Writing instructors, writing centre staff and subject-domain teachers will find guidance on how to improve their assignments and feedback. University administrators and program coordinators can inform themselves about best-practice approaches to writing instruction and support at different levels ranging from individual courses to central support structures.

Southern Asia, Australia and the Search for Human Origins Robin Dennell, Martin Porr, 2014-02-24 This volume summarizes what is - and is not - known about the earliest evidence of our species outside Africa, from Arabia to Australia. Most books on the origins of modern human behavior and the expansion of our species across the world focus on evidence from Africa, Europe, and the Levant, which have been extensively researched. This book focuses instead on the important areas of southern Asia such as Arabia and India, as well as evidence from Australia, which deserve far wider attention than they have hereto received.

**World Prehistory and Archaeology** Michael Chazan, 2017-08-22 An Integrated Picture of Prehistory as an Active Process of Discovery World Prehistory and Archaeology: Pathways through Time, fourth edition, provides an integrated discussion of world prehistory and archaeological methods. This text emphasizes the relevance of how we know and what we know about our human prehistory. A cornerstone of World Prehistory and Archaeology is the discussion of prehistory as an active process of discovery. Methodological issues are addressed throughout the text to engage readers. Archaeological methods are introduced in the first two chapters. Succeeding chapters then address the question of how we know the past to provide an integrated presentation of prehistory. The fourth edition involves readers in the current state of archaeological research, revealing how archaeologists work and interpret what they find. Through the coverage of various new research, author Michael Chazan shows how archaeology is truly a global discipline. Learning Goals Upon completing this book, readers will be able to: \* Gain new perspectives and insights into who we are and how our world came into being. \* Think about humanity from the perspective of archaeology. \* Appreciate the importance of the archaeological record for contemporary society.

**The Origin of Language** Madeleine Beekman, 2025-08-14 In a radical new story about the birth of our species, The Origin of Language argues that it was not hunting, fighting, or tool-making that forced early humans to speak, but the inescapable need to care for our children. Journeying to the dawn of Homo sapiens, evolutionary biologist Madeleine Beekman reveals the “happy accidents” hidden in our molecular biology—DNA, chromosomes, and proteins—that led to one of the most fateful events in the history of life on Earth: our giving birth to babies earlier in their development than our hominid cousins the Neanderthals and Denisovans. Faced with highly dependent infants requiring years of nurturing and protection, early human communities needed to cooperate and coordinate, and it was this unprecedented need for communication that triggered the creation of human language—and changed everything. Infused with cutting-edge science, sharp humour, and insights into the history of biology and its luminaries, Beekman weaves a narrative that’s both enlightening and entertaining. Challenging the traditional theories of male luminaries like Chomsky, Pinker, and Harari, she invites us into the intricate world of molecular biology and its ancient secrets. The Origin of Language is a tour de force by a brilliant biologist on how a culture of cooperation and care have shaped our existence.

**Theology and Survival Movies** Ioan Buteanu, 2023-03-03 This book provides an innovative analysis of the survival movie genre from an Orthodox Christian anthropological perspective. Grounded in the Orthodox tradition, the approach builds from the first chapter of Genesis where man is described as made in the ‘image’ and after the ‘likeness’ of God. It offers a nuanced theological exploration of the concept of the survival movie and examines a number of significant cinematic creations, illustrating how issues of survival intersect romantic, Western, science fiction and war films. The author reflects on how survival movies offer a path for the study of human nature given they depict people in crisis situations where they may reveal

their true characters. As well as discussing the role of a 'limit situation' as a narrative element, the book highlights the spiritual aspect of survival and points to the common hope in survival movies for something more than biological survival. It is valuable reading for scholars working in the field of religion and film.

**Harry Alan Towers** Dave Mann,2014-11-03 Harry Alan Towers' reputation rests upon a corpus of 95 low-budget productions shot post-haste in every corner of the globe. He took an integral part, however, in the development of the protocols that now underpin much transnational film production and he must be regarded as a pioneer. Towers' slash and burn strategy focused on parasitic, back-to-back productions, funded by rights bundles that were pre-sold globally. This strategy was substantially derived from his early days in broadcasting wherein he acted as a go-between in the American and the British Commonwealth markets. Though he became adept at procuring funds from pariah regimes and black market economies, primarily he continued to act as a broker bringing together American equity investment and European finance under the auspices of EC co-production agreements. He was also quick to exploit the burgeoning niche markets becoming available in the wake of technological developments and government initiatives.

*Handbook of East and Southeast Asian Archaeology* Junko Habu,Peter V. Lape,John W. Olsen,2017-12-08 The Handbook of East and Southeast Asian Archaeology focuses on the material culture and lifeways of the peoples of prehistoric and early historic East and Southeast Asia; their origins, behavior and identities as well as their biological, linguistic and cultural differences and commonalities. Emphasis is placed upon the interpretation of material culture to illuminate and explain social processes and relationships as well as behavior, technology, patterns and mechanisms of long-term change and chronology, in addition to the intellectual history of archaeology as a discipline in this diverse region. The Handbook augments archaeologically-focused chapters contributed by regional scholars by providing histories of research and intellectual traditions, and by maintaining a broadly comparative perspective. Archaeologically-derived data are emphasized with text-based documentary information, provided to complement interpretations of material culture. The Handbook is not restricted to art historical or purely descriptive perspectives; its geographical coverage includes the modern nation-states of China, Mongolia, Far Eastern Russia, North and South Korea, Japan, Taiwan, Vietnam, Cambodia, Laos, Thailand, Burma, Malaysia, Indonesia, the Philippines and East Timor.

The Archaeology of Sulawesi Sue O'Connor,David Bulbeck,Juliet Meyer,2018-11-14 The central Indonesian island of Sulawesi has recently been hitting headlines with respect to its archaeology. It contains some of the oldest directly dated rock art in the world, and some of the oldest evidence for a hominin presence beyond the southeastern limits of the Ice Age Asian continent. In this volume, scholars from Indonesia and Australia come together to present their research findings and views on a broad range of topics. From early periods, these include observations on Ice Age climate, life in caves and open sites, rock art, and the animals that humans exploited and lived alongside. The archaeology presented from later periods

covers the rise of the Bugis kingdom, Chinese trade ceramics, and a range of site-based and regional topics from the Neolithic through to the arrival of Islam. This carefully edited volume is the first to be devoted entirely to the archaeology of the island of Sulawesi, and it lays down a baseline for significant future research. Peter Bellwood Emeritus Professor The Australian National University

Little Species, Big Mystery Debbie Argue, 2022-08-02 There is only one kind of human on earth today: us. But we are only one of a number of human species - primates of the Hominini tribe - that have existed on our planet across the millennia. In 2004 the world was astounded by the discovery of *Homo floresiensis*, a species of human never encountered before, on the island of Flores in the Indonesian archipelago. A very short, thickset being, with long arms and feet and an appetite for stegodons (a now extinct relative of modern elephants), it was soon nicknamed 'the hobbit'. As recently as 52,500 years ago, at a time when our own ancestors were spreading around the world, these 'hobbit' cousins lived also, at least on Flores. In Little Species, Big Mystery archaeologist Debbie Argue takes us on a journey of thrilling scientific discovery, recounting the unearthing of *H. floresiensis*, the archaeological expeditions that have followed, other finds - including that of a small Philippines hominin - and new paths of research and discussion. Argue conveys the excitement of searching for and finding clues to a lost past, and the animated discussions that have flowed from their discovery. She provides much contextual information to strengthen our grasp of the essential coordinates of this field and stimulate our interest in the shadowy, fascinating realm of prerecorded time.

**South African Battles** Timothy Couzens, 2013-08-12 South African Battles describes 36 battles spread over five centuries. These are not the well-trodden battlefields of standard histories, but generally lesser-known ones. Some were of critical importance, while some were infinitely curious. Who, for instance, has heard of the battles of Nakob, Middelpoos, Mome Gorge or Mushroom Valley? Who knows about the four black women that Bartolomeu Dias brought with him on his pioneering voyage of exploration? Who knows that there was a significant battle in what is now the Kruger National Park in 1725? Who knows about the military episode where not a shot was fired but which brought South Africa into the Great War? Who knows that Germany once invaded South Africa? Written in a light, humorous and personal style, each chapter is self-contained, like a short story. They can be read one a night, and mulled over next day with the promise of further enjoyment to come. South African Battles is an ideal bedside book, as well as an engaging travel companion. But there is also a twist in the tale at the end. Caveat lector, or lectrix!

Projecting Empire James Chapman, Nicholas J. Cull, 2009-06-17 Popular cinema is saturated with images and narratives of empire. With Projecting Empire, Chapman and Cull have written the first major study of imperialism and cinema for over thirty years. This welcome text maps the history of empire cinema in both Hollywood and Britain through a series of case studies of popular films including biopics, adventures, literary adaptations, melodramas, comedies and documentaries, from

the 1930s and *The Four Feathers* to the present, with *Indiana Jones* and *Three Kings*. The authors consider industry-wide trends and place the films in their wider cultural and historical contexts. Using primary sources that include private papers, they look at the presence of particular auteurs in the cinema of Imperialism, including Korda, Lean, Huston and Attenborough, as well as the actors who brought the stories to life, such as Elizabeth Taylor and George Clooney. At a time when imperialism has a new significance in the world, this book will fulfil the needs of students and interested filmgoers alike.

*The Tomb of the Mili Mongga* Samuel Turvey, 2024-02-15 'The Tomb of the Mili Mongga lives up to its magnificent billing' DAILY TELEGRAPH - A fossil expedition becomes a thrilling search for a mythical beast deep in the Indonesian forest - and a fascinating look at how fossils, folklore, and biodiversity converge. A tale of exciting scientific discovery, *The Tomb of the Mili Mongga* tells the story of Samuel Turvey's expeditions to the island of Sumba in eastern Indonesia. While there, he discovers an entire recently extinct mammal fauna from the island's fossil record, revealing how islands support some of the world's most remarkable biodiversity, and why many of these unique endemic species are threatened with extinction or have already been lost. But as the story unfolds, an unexpected narrative emerges - Sumba's Indigenous communities tell of a mysterious wildman called the 'mili mongga', a giant yeti-like beast that supposedly lives in the island's remote forests. What is behind the stories of the mili mongga? Is there a link between this enigmatic entity and the fossils that Sam is looking for? And what did he discover when he finally found the tomb of a mili mongga? Combining evolution, anthropology, travel writing and cryptozoology, *The Tomb of the Mili Mongga* explores the relationship between biodiversity and culture, what reality means from different cultural perspectives, and how folklore, fossils and conservation can be linked together in surprising ways.

**'Curing queers'** Tommy Dickinson, 2015-01-31 Drawing on a rich array of source materials including previously unseen, fascinating (and often quite moving) oral histories, archival and news media sources, 'Curing queers' examines the plight of men who were institutionalised in British mental hospitals to receive 'treatment' for homosexuality and transvestism, and the perceptions and actions of the men and women who nursed them. It examines why the majority of the nurses followed orders in administering the treatment - in spite of the zero success-rate in 'straightening out' queer men - but also why a small number surreptitiously defied their superiors by engaging in fascinating subversive behaviours. 'Curing queers' makes a significant and substantial contribution to the history of nursing and the history of sexuality, bringing together two sub-disciplines that combine only infrequently. It will be of interest to general readers as well as scholars and students in nursing, history, gender studies, and health care ethics and law.

**Neuroproteomics** Oscar Alzate, 2009-10-26 In this, the post-genomic age, our knowledge of biological systems continues

to expand and progress. As the research becomes more focused, so too does the data. Genomic research progresses to proteomics and brings us to a deeper understanding of the behavior and function of protein clusters. And now proteomics gives way to neuroproteomics as we beg

**British Film Catalogue** Denis Gifford, 2016-04-01 First published in 2001. The standard work on its subject, this resource includes every traceable British entertainment film from the inception of the silent cinema to the present day. Now, this new edition includes a wholly original second volume devoted to non-fiction and documentary film--an area in which the British film industry has particularly excelled. All entries throughout this third edition have been revised, and coverage has been extended through 1994. Together, these two volumes provide a unique, authoritative source of information for historians, archivists, librarians, and film scholars.
