The Roots of Community Organizing, 1917-1939 Neil Betten,Michael J. Austin,Robert Fisher,1990-01-01 Today's community organizers and social planners have a tendency to ignore their antecedents and to reinvent the wheel. What is found in textbooks today had its origins in the day-to-day, trial-and-error experiences of community organizers in the 1920s and 1930s, state Michael J. Austin and Neil Betten in their Introduction to this pioneering study of community organization. The historical analysis of the intellectual and practical roots of community organizing in the United States begins with urban political organizing in the late nineteenth and early twentieth centuries, the organizing of immigrant communities by the International Institutes beginning in 1910, and the Cincinnati Unit Experiment from 1917 to 1919.The authors and their collaborators focus on historical material that has received relatively little attention within the profession. This includes the organizing manuals of Steiner, McClenahan, Hart, Pettit, and Lindeman; the emergence, in the 1920s, of physical planning as practiced by city planners and social survey research as practiced by social planners; and the social action approach to community organizing with special reference to organizing the working class. There is clearly a dualism in this work, comment Betten and Austin. Not only does the book provide insight into the background of community organizing stemming from various social agencies, but it also explores the activities of people and groups that were organizing communities but did not consider themselves community organizers. These include the socialists involved with the Cincinnati Unit Experiment, political machines, and the Catholic Worker Movement.While the study encompasses a time period from the last years of the nineteenth century to the end of the 1930s, it focuses primarily on the years from 1917 to 1939, when community organizing associated with the social work profession was emerging. The study ends in 1939 with the Lane Report, which was the first effort to identify the educational foundations for training future community organizers. Author note: Neil Betten is Professor and Chair of the Department of History at Florida State University. >P>Michael J. Austin is Professor and Dean of the University of Pennsylvania School of Social Work.

Organizing Democracy Henk te Velde,Maartje Janse,2017-05-20 This book explores the new types of political organization that emerged in Western Europe and the United States during the nineteenth century, from popular meetings to single-issue organizations and political parties. The development of these has often been used to demonstrate a movement towards democratic representation or political institutionalization. This volume challenges the idea that the development of

'democracy' is a story of rise and progress at all. It is rather a story of continuous but never completely satisfying attempts of interpreting the rule of the people. Taking the perspective of nineteenth-century organizers as its point of departure, this study shows that contemporaries hardly distinguished between petitioning, meeting and association. The attraction of organizing was that it promised representation, accountability and popular participation. Only in the twentieth century did parties reliable partners for the state in averting revolution, managing the unpredictable effects of universal suffrage, and reforming society. This collection analyzes them in their earliest stage, as just one of several types of civil society organizations, that did not differ that much from each other. The promise of organization, and the experiments that resulted from it, deeply impacted modern politics.

Community Organizing Joan Kuyek, 2014-09-01T00:00:00Z History is full of stories of the oppressed rebelling against the oppressor, only to reinstate an equally oppressive system. What we learn from oppression is how to oppress. If we want a truly transformative politics, then we must take up methods that embody the kind of world we want to create; we have to change deeply embedded beliefs and behaviours. In this engaging and passionate book, long-time community organizer Joan Kuyek offers important insights and concrete tools to encourage people to get involved in social justice action at the community level. In Canada, activists are frustrated with their inability to effect change in the global economic system, overwhelmed by the number and complexity of issues and too often unaware or dismissive of the efforts of other activists. As a result, social forces for justice and the environment are fragmented and ineffective, and the economic elite grows more powerful. Community Organizing argues that it does not have to be this way. Suggesting that most of our attempts at change and community-building fail because we cannot get along with each other, Community Organizing starts at the community level to describe how we can work together and create organizations based on dignity and respect. It provides strategies to build movements from the community to assert democratic political power and tools to create a culture of hope in this time of despair. This book offers the means to reclaim political power in Canada.

Organizing for Social Change Kimberley A. Bobo, Jackie Kendall, Steve Max, 2001 This manual is for grassroots activists seeking social, political, environmental and economic change at all levels of organization -> local, state and national. The handbook has been used by Midwest Academy since 1973 in its organizing and activism seminars. Central to the Academy and the manual are

Progressive Community Organizing Loretta Pyles, 2013-07-24 The second edition of *Progressive Community Organizing* offers a concise intellectual history of community organizing and social movements while also providing practical tools geared toward practitioner skill building. Drawing from social-constructionist, feminist and critical traditions, *Progressive Community Organizing* affirms the practice of issue framing and offers two innovative frameworks that will change the way students of organizing think about their work. *Progressive Community Organizing* is ideal for both undergraduate and graduate courses focused on community theory and practice, community organizing, community development, and social change and service learning. The second edition presents new case studies, including those of a welfare rights organization and a youth-led LGBTQ organization. There are also new sections on the capabilities approach, queer theory, the Civil Rights movement, and the practices of self-inquiry and non-violent communication. Discussion of global justice has been expanded significantly and includes an account of a transnational action-research project in post-earthquake Haiti. Each chapter contains discussion questions, written and web resources, and a list of key terms; a full, free-access companion website is also available for the book.

Creative Community Organizing Si Kahn, 2010-02-15 Privatization has been on the right-wing agenda for years. Health care, schools, Social Security, public lands, the military, prisons-all are considered fair game. Through stories, analysis, impassioned argument-even song lyrics-Si Kahn and Elizabeth Minnich show that corporations are, by their very nature, unable to fulfill effectively what have traditionally been the responsibilities of government. They make a powerful case that the market is not the measure of all things, and that a vital public sector is an indispensable component of a healthy democracy.

Creative Community Organizing Angela Davis, Si Kahn, 2011-08 This latest work by legendary social activist, musician, and author Kahn outlines many of the practical tactics organizers use, but also emphasizes community organizing as a way of thinking and a way of life....

Contesting Community James DeFilippis, Robert Fisher, Eric Shragge, 2010 What do community organizations and organizers do, and what should they do? *Contesting Community* addresses one of the vital issues of our day-the role and meaning of community in people's lives and in the larger political economy. It paints a more critical picture of community work which, according to the authors-in both theory and practice-has amounted to less than the sum of its parts. Their comparative study of efforts in the United States, the United Kingdom, and Canada describes and analyzes the limits and potential of this work.

Transforming the City Marion Orr, 2007 A path-breaking book--the first to examine the evolution of community organizing in U.S. cities. While embracing mobilization, the contributors acknowledge the challenges inherent in globalization and the

norms and values that shape contemporary American culture. Still, they reaffirm that community organizing has an important role to play as part of a broader progressive movement.

Community Organizing George Brager, Harry Specht, 1987 Considered to be a classic book for social work practitioners, this thoroughly updated edition covers more recent literature, research findings, case illustrations, and cross-cultural perspectives. This edition also reviews and tries to explain the changes in community organization that have taken place in the last decade. It introduces new theoretical viewpoints--exchange theory and organizational change theory--to help better understand these changes. Theoretical material concerning reciprocity and alienation is also introduced in this edition. Other themes are: relative deprivation; accountability; stages of group development and participatory benefits; methods and techniques of community assessment; contracting prospective members and outreach; theories and techniques of establishment rapport; leadership and its development; and organizational theory. ISBN 0-231-05462-9: \$24.00.

The Handbook of Organizing Economic, Ecological and Societal Transformation Elke Weik, Chris Land, Ronald Hartz, 2024-08-19 This handbook gathers contributors from different disciplines of the social sciences, such as organization and management studies, sociology, anthropology and political science, to constructively discuss the kinds of transformations we need to see in coming years. These transformations concern the way we work, produce and consume but also the way in which we think about work, production and consumption. In an explicit rejection of the demand that the social sciences provide quick fixes, the contributors of this handbook discuss possible solutions in a critical and comprehensive manner and with an eye to both their environmental and societal implications. The handbook is divided into four parts: Opening up futures, Techno-economic transformations at work, Sustainable environmental transformation, and Radical democratic futures. The handbook is of interest to all critical academics interested in constructive suggestions regarding necessary societal transformations.

Community Organizing and Community Building for Health and Welfare Meredith Minkler, 2012-07-16 The third edition of Community Organizing and Community Building for Health and Welfare provides new and more established ways to approach community building and organizing, from collaborating with communities on assessment and issue selection to using the power of coalition building, media advocacy, and social media to enhance the effectiveness of such work. With a strong emphasis on cultural relevance and humility, this collection offers a wealth of case studies in areas ranging from childhood obesity to immigrant worker rights to health care reform. A tool kit of appendixes includes guidelines for assessing coalition effectiveness, exercises for critical reflection on our own power and privilege, and training tools such as policy bingo. From former organizer and now President Barack Obama to academics and professionals in the fields of public health, social work, urban planning, and community psychology, the book offers a comprehensive vision and on-the-ground examples of the many ways community building and organizing can help us address some of the most intractable health and social

problems of our times. Dr. Minkler's course syllabus: Although Dr. Minkler has changed the order of some chapters in the syllabus to accommodate guest speakers and help students prep for the midterm assignment she uses, she arranged the actual book layout in a way that should flow quite naturally if instructors wish to use it in the order in which chapters appear.

Community Organizing David S. Walls, 2015-02-03 This incisive book provides a critical history and analysis of community organizing, the tradition of bringing groups together to build power and forge grassroots leadership for social, economic, racial, and environmental justice. Begun by Saul Alinsky in the 1930s, there are today nearly 200 institution-based groups active in 40 U.S. states, and the movement is spreading internationally. David Walls charts how community organizing has transcended the neighborhood to seek power and influence at the metropolitan, state, and national levels, together with such allies as unions and human rights advocates. Some organizing networks have embraced these goals while others have been more cautious, and the growing profile of community organizing has even charged political debate. Importantly, Walls engages social movements literature to bring insights to our understanding of community organizing networks, their methods, allies and opponents, and to show how community organizing offers concepts and tools that are indispensable to a democratic strategy of social change. *Community Organizing* will be essential reading for advanced undergraduates and graduate students of sociology, social movements and social work. It will also inform organizers and grassroots leaders, as well as the elected officials and others who contend with them.

Democracy in Action Kristina Smock, 2004 In cities across the US, grass-roots organizations are working to revitalize popular participation in disenfranchised communities by bringing ordinary people into public life. This book examines the techniques used to achieve these goals.

Collective Action for Social Change A. Schutz, M. Sandy, 2011-04-11 Community organizers build solidarity and collective power in fractured communities. They help ordinary people turn their private pain into public action, releasing hidden capacities for leadership and strategy. In *Collective Action for Social Change*, Aaron Schutz and Marie G. Sandy draw on their extensive experience participating in community organizing activities and teaching courses on the subject to empower novices to think like an organizers.

Politics as Public Art Martin Zebracki, Z. Zane McNeill, 2022-12-30 *Politics as Public Art* presents a keystone collection that pursues new frameworks for a critical understanding of the relationship between public art and protest movements through the utilization of socially engaged and choreopolitical approaches. This anthology draws from a unique combination of interdisciplinary scholarship and activism where it integrates geographically rich perspectives from political and grassroots community contexts spanning the United States, Europe, Australia, and Southeastern Africa. The volume

questions, and reimagines, not only how public art practice can be integral to politics, including forms of surveillance and control of bodily movement. It also probes into how political participation itself can be construed as a form of public artmaking for radical social change and just worlds. This collection advocates for scholar-activist inquiry into how socially engaged public art practices can pave the way for thinking through—and working toward—championing more inclusive futures and, as such, choreographing greater intersectional justice. This book provides a wide appeal to audiences across humanities and social science scholarship, arts practice, and activism seeking conceptual and empirically informed tools for moving from public art and choreopolitical theory into modes of praxis: critical reflection and action.

Hope for Justice and Power Kathleen Staudt, 2020-03-15 Texas-based affiliates in the Industrial Areas Foundation (IAF)—built on ideas, principles, and actions from the late Saul Alinsky—offer a strong, mature organizing model compared with other community organizations in the state and the United States as a whole. IAF affiliates' members consist of institutions, most of them faith-based congregations and synagogues. Local volunteer leaders in those institutions work together in relationships of trust that draw strength, unity, and purpose from IAF principles and the social-justice precepts of their different faiths. In *Hope for Justice and Power*, Kathleen Staudt examines the twenty-first-century activities of the Texas IAF in multiple cities and towns around the state, drawing on forty years of academic teaching and on twenty years of active leadership experiences in the IAF. She identifies major contradictions, tensions, and their resolutions in IAF organizing related to centralism versus local control, reformist versus radical goals, stable revenue generation, greater gender balance in leadership, and evolving IAF principles. The political context in modern Texas is a challenging one compared to the Texas IAF founding period in the last quarter of the twentieth century, yet local IAF volunteer leaders achieve their goals with a strong political base in divergent urban regions around the state. With declining religious affiliation in U.S. society, the Texas IAF has begun to recruit members from broad-based institutions, such as schools and health clinics. The hope and winnable goals that sustain IAF organizing show the importance of organized power, trained volunteer leaders, and relationships with public officials in between elections. With cross-class alliances, IAF affiliates work to foster equitable change toward a more just society. To analyze the Texas IAF, Staudt draws on participant observation in El Paso, statewide meetings and training, on interviews, and on archival documents and media coverage. This book will appeal to those interested in community-based organizing and leadership, Mexican American and women's politics, civic-capacity building in education, political socialization, and both Texas and urban politics.
